Management in Logistics Networks and Nodes
Concepts, Technology and Applications

Edited by
Thorsten Blecker, Wolfgang Kersten
and Carsten Gertz

With Contributions by
Hatem Aldarrat, Mahmoud Ameri, Brahmanandan Anil,
Amrinder Arora, Marie-Laure Baron, Thorsten Blecker, Lars Braubach,
Bülent Çatay, Tugrul Daim, Albert M. Douma, Tamer Doyuran,
Matthew Ferguson-Calderon, Hitesh K. Gadhia, Carsten Gertz,
Mohammad Ghorbani Salanghooch, Alexander Goudz, Anna Granlund,
Jos van Hillegersberg, Frank Himpel, Tarak A. Housein, Wolfgang Kersten,
Herbert Kotzab, Elfriede I. Krauth, Winfried Lammersdorf, Matthias Lorenz,

ERICH SCHMIDT VERLAG
Table of Content

Preface ......................................................................................................................................... V
Table of Content ......................................................................................................................... VII

I. Distribution

Rule Based Logistics Management for a Single Warehouse Multi Distributor System ................................................................. 3
*Brahmanandan Anil and M. B. Nidhi*

Lean Retail Logistics: What if We Focused on the Store? ......................... 15
*Marie-Laure Baron*

Characteristics and Structure of the International Container Port Network – An Analysis of Network and Node Design ......................... 33
*Hitesh K. Gadhia and Herbert Kotzab*

Designing and Improving Distribution Strategies in a Complex Distribution Logistical Network Using a Hybrid Simulation Modeling Approach [HSMA] ................................................................. 45
*Tarak A. Housein*

Distribution Logistics Network Planning: A Hybrid Metaheuristics Capacitated Multi-Depot Location Routing Model ......................... 59
*Hatem Aldarrat, Alexander Goudz, Matthias Lorenz, Fathi Rhoma, and Bernd Noche*

A Model for Roads Pricing and Valuation in Iran ...................................... 81
*Mahmoud Ameri, Fatemeh Zahed, and Abdolreza Rezaee Arjoody*

Implementation of Location Strategy Tools ................................................................. 97
*Evi Oktaviana*
## II. Supply-Chain Management

A Study of Management of Intermediate Inventory in the Manufacture of Paper Products in Brazilian Companies.................................................................109  
*Paulo Cesar Chagas Rodrigues, and Otávio José de Oliveira*

Logistics Automation – an Enabler for Competing...........................................129  
*Anna Granlund*

Supply Chain Management in the Brazilian Automotive Industry – Analysis and Improvements Proposal .................................................................147  
*Ricardo Alexandre Soares and Renato da Silva Lima*

Managing Supply Chain Networks: Strategies for Logistics Integration ....163  
*Claudine A. Soosay*

Project Cargo Standard Process for Logistics Service Provider: The Cimosa Approach ..........................................................................................181  
*Phanthian Zuesongdham*

True Cost of Outsourcing ..............................................................................199  
*Christopher McGinnis, Tugrul Daim, and Matthew Ferguson-Calderon*

Case Study of a Portuguese Supply Chain Management Model in Construction...................................................................................................211  
*Tiago Pinho*

## III. Agency and SOA Approaches

Using a Management Game to Exemplify a Multi-Agent Approach for the Barge Rotation and Quay Scheduling Problem in the Port of Rotterdam.....227  
*Albert M. Douma, Jos van Hillegersberg, and Peter C. Schuur*

Two Enhanced Savings Functions for the Clark-Wright Algorithm..............245  
*Tamer Doyuran and Bülent Çatay*

Service Oriented Architecture Enabling a Global Market-Place for the Supply Chain .....................................................................................................259  
*Hervé Mathieu*

Obstacles to Multi-Agent Systems Implementation Expert Opinions Confronted with Literature.................................................................269  
*Hans M. Moonen, Albert M. Douma, Elfriede I. Krauth, and Jos van Hillegersberg*
Simulation and Implementation of Logistics Systems Based on Agent Technology .......................................................... 291
Alexander Pokahr, Lars Braubach, Jan Sudeikat, Wolfgang Renz, and Winfried Lamersdorf

Intelligent Transportation Systems Applications for Winter Maintenance...309
Hassan Zoghi, Kianoush Siamardi, and Morteza Toulouei

Developing a Mathematical Six Section’s Supply Chain Model with its Evaluation in Khorasan Razavi Iran Khodro Iranian Company.................319
Mohammad Ghorbani Salanghooch and A. Norang

IV. New Technology in Container Logistics

Benefits of Standardised RFID Transponders in Container Logistics ..........335
Thomas Will and Thorsten Blecker

The Application of Radio Frequency Identification (RFID) in the Context of Ground Handling Processes at a Major International Airline.................................................................353
Frank Himpel and Heike Petri

Applying Stochastic Capacity Management to Manage Truck Traffic around a Sea Port.........................................................................................365
Amrinder Arora and Dhiren Patel

RFID Supports SCEM in Container Transport Networks............................377
Nils Meyer-Larsen and Rainer Müller

Addressing False RFID Reads in Supply Chains........................................387
Yu-Ju Tu and Selwyn Piramuthu

DETCCM Networks Analyse Model Applied for Short-Sea-Shipping Opportunities Prospecting. Le Havre, Hamburg, Marseille and Valencia Port’s Cases .................................................................399
Hipolito Martell Flores

The Security Eco-System: How Supply Chains’ Players Affect Cargo Vulnerability.........................................................................................417
Luca Urciuoli

Authors ..........................................................................................................437
