PREFACE  xxi

1—INTRODUCTION: SCIENCE WRITING
AND THE IMAGINATION  1
Science Is Communication  1
Writing as a Creative Opportunity in Science  3
Finding Your Real Audience  5
  Define the Goals of Your Writing  6
  Imagine Your Audience’s Needs  6
  Practice for Real-World Writing  8

2—WHY GOOD SCIENTIFIC THINKING
CAN LEAD TO BAD SCIENCE WRITING  10
Why Science Writing Tends to Be So Complex  11
Why Science Writing Contains So Much
Passive Voice  12
Why Scientists Are Wary of Descriptiveness  13
Why Science Writing Is Plagued by Overly
Conditional Language  14
Why the Style of Scientific Prose Is Conservative  18
A Simple Cure  19
3—WRITING FROM THE MOMENT OF OBSERVATION: LAB AND FIELD NOTEBOOKS 21

Writing Begins in the Lab and the Field 21
What Is a Lab Notebook For? 23
What Must Go in the Lab Notebook? 24
Prepare the Notebook 25
Introduce the Experiment 27
Describe the Materials Completely 27
Describe the Assembly of Your Apparatus 29

Sample Setup Description 31
Describe the Method or Procedure of Your Experiment 32
Prepare Data Sheets 33
Follow Guidelines for Recording Data 34
Should You Substitute the Computer for a Handwritten Lab Notebook? 35
Analyze the Data Briefly 37
Draw Basic Tables and Graphs 39
Interpret the Data Briefly 43
Define and Calculate the Precision, Error, or Standard Deviation in Your Observations 46
Draw Conclusions Briefly 47
Some Final Words about the Lab Notebook 47

4—FROM LAB NOTEBOOK TO LAB REPORT 48

Lab Notebook Versus Lab Report 49

Letter of Transmittal 50

Title/Cover Page 51
Informative Abstracts 79
Indicative Abstracts 81
Descriptive Abstracts (Executive Summary) 83
Some Final Words about Abstracts 84

8—HOW TO WRITE THE INTRODUCTORY SECTION 85
Taking Too Broad an Approach 85
Taking Too Narrow an Approach 86
Finding the Middle Ground 87
Finding the Proper “Pitch” 87
A Digression on the Question of Where Problems Come From 90
Define the Problem Using “Prewriting” Exercises 91
  What Am I Trying to Discover or Prove? 92
  Which Kind of Problem Am I Working On? 92
Relate the Problem to Theory 93
Why Is This Problem New or Distinctive? 95

9—HOW TO WRITE ABOUT HYPOTHESES, MODELS, AND THEORIES (HMT) 98
Theories 99
Models 100
Hypotheses 101
Formulate the Hypothesis with the Help of Prewriting 101
How to Evaluate and Compare Different Hypotheses, Models, or Theories 104
Discussions of HMT Require Especially Careful Wording 105
Where to Put Your Discussion of Hypotheses, Theories, and Models 109
10—HOW TO CITE AND LIST REFERENCES  112
   Why Cite the Literature?  112
   Where to Cite the Literature  113
   How to Cite a Reference from the Text  113
   How to List References: The Bibliography  115
   Final Words about Citations  120

11—HOW TO WRITE THE MATERIALS AND METHODS
   SECTION  121
   Parts of the M & M  121
   What Is Method?  122
   Points to Consider in the M&M  123

12—HOW TO PRESENT RESULTS  131
   Final Words  135

13—HOW TO COMPOSE AND USE VISUAL MATERIAL  136
   Visual Presentations Should Simplify Information  139
   Tables  142
   General Guidelines for Using Figures  144
      Graphs  144
      Charts/Computer Flowcharts  145
      Illustrations, Schematic Diagrams, and Line Drawings  147
   Final Words About Pictures  148

14—HOW TO WRITE ABOUT YOUR INTERPRETATION
   OF RESULTS  150
   Make a Convincing Case  151
      Order Your Presentation of the Data Logically  152
Logical Language 156
Biased Language 157
How to Coordinate Your Presentation of Data 158

15—HOW TO WRITE CONCLUSIONS 164
State Your Conclusions 164
Restrict or Expand Your Results 165
Compare Your Conclusions with Those of Others in the Field 167
Define Unanswered Questions 169
  Don't Be Afraid to Express Uncertainties 169
  Recommend Directions for Future Research 170
  Express a Broader Vision 171
Final Words about the Research Report and Article 172

16—HOW TO WRITE ABOUT SCIENCE IN ESSAYS AND TERM PAPERS OR REPORTS 174
Formal Scientific Reports Versus Term Papers and Essays on Science 175
Steps In Writing the Essay, Report, or Term Paper 178
  Choose a Topic 178
  Begin Researching the Topic 178
  Narrow Your Topic and Refine Your Thesis 179
  Adopt an "Angle" or Point of View 179
  Write the Paper 180
Kinds of Science Essays 180
  Leads or Introductory Sentences 181
  Exits or Closings 186
Themes and Topics for Science Essays and Term Papers 189

The Style of Science Essays 194

  Establish a Point of View 195
  Use Analogies 196
  Use Metaphors, But Exercise Caution 197

Some Cautionary Words about Telling Science as a Story 198

17—REVISING AND EDITING 200

  The Real Writing Is in the Rewriting 200
  An Exercise in Editing 201
  Editing Means More than Fixing Errors 204
  Six Steps to Deep Editing 206

18—A SCIENTIFIC APPROACH TO STYLE 209

  How Do Sentences Work? 210

    Avoid Orphaned Verbs 211
    Links, Contexts, and/or the Subject of a Sentence Should Come First 213
    Use Transitional Words to Help the Flow of Ideas 213
    New and/or Important Information Should Be Placed in the Last Part of the Sentence 215
    Using Forms of the Verb “to be” Makes Weak Links 216
    Use Active Voice and Avoid Passive Voice 216
    Use Verbs; Avoid Nominalization and Noun Strings 222

Getting Cheap With Words Is Inefficient 223

Don't Bury Important Points in Subordinate Clauses or Sub-Subordinate Clauses 225

Final Words about Scientific Style 227
19—HOW AND WHEN TO DEFINE YOUR TERMS 228
   How to Define Terms 229
   A Note on Jargon 233
      The Perils of Assuming Your Audience
      Is "In the Know" 234

20—HOW TO USE NUMBERS, SYMBOLS, UNITS,
FORMULAS, AND EQUATIONS 235
   Numbers 235
   Measures and Dimensions 237
   Numbering Lists and Items 238
   Equations and Formulas 238
   Final Words about Mathematics and Science Writing 239

21—CONCLUSION: ONE WORLD—
SCIENCE AND WRITING 240
   Science Is Not Only a Rational Activity 241
   Science Always Involves a Point Of View 242
   There Is No Science Without Someone Telling
   Its Story 244
   The History and Future of Science Writing 246
   Science Tells Many Different Stories 247
   The Scientist Coauthors the Script of Science 249

APPENDIX A: AVOIDING SEXIST LANGUAGE 250
   Less Desirable Solutions to Sexist Language 253

APPENDIX B: STYLE GUIDES, ARTICLES, MANUALS,
AND BOOKS ON WRITING ABOUT SCIENCE 256
   Disciplinary Style Guides 256
   American National Standards Institute Publications 256
General Style Guides 257
Research about Science Writing 258

APPENDIX C: SCIENCE AND ENGINEERING DICTIONARIES AND ENCYCLOPEDIAS 259

ENDNOTES 263
INDEX 269
