Contents

Preface	vii
Chapter 1	
Preliminary Notions	1
1.1 Introduction	1
1.2 Sufficiency	2
1.3 Complete Sufficient Statistics	4
1.4 Exponential Families of Distributions	5
1.5 Invariance	7
1.6 Maximum Likelihood Estimation	9
1.7 Unbiased Estimation	12
1.8 Least Squares Estimation	15
1.9 Interval Estimation	18
Exercises	22
Chapter 2	
Notions in Significance Testing of Hypotheses	25
2.1 Introduction	25
2.2 Test Statistics and Test Variables	26
2.3 Definition of p-Value	29
2.4 Generalized Likelihood Ratio Method	35
2.5 Invariance in Significance Testing	37
2.6 Unbiasedness and Similarity	39
2.7 Interval Estimation and Fixed-Level Testing	42
Exercises	45

Chapter 3	
Review of Special Distributions	48
3.1 Poisson and Binomial Distributions	48
3.2 Point Estimation and Interval Estimation	51
3.3 Significance Testing of Parameters	53
3.4 Bayesian Inference	55
3.5 The Normal Distribution	57
3.6 Inferences About the Mean	58
3.7 Inferences About the Variance	63
3.8 Quantiles of a Normal Distribution	64
3.9 Conjugate Prior and Posterior Distributions	67
3.10 Bayesian Inference About the Mean and the Variance	69
Exercises	73
Chapter 4	
Exact Nonparametric Method	77
4.1 Introduction	77
4.2 The Sign Test	79
4.3 The Signed Rank Test and the Permutation Test	81
4.4 The Rank Sum Test and Allied Tests	86
4.5 Comparing k Populations	92
4.6 Contingency Tables	95
4.7 Testing the Independence of Criteria of Classification	96
4.8 Testing the Homogeneity of r Populations	101
Exercises	104
Chapter 5	
Generalized p-Values	108
5.1 Introduction	108
5.2 Generalized Test Variables	112
5.3 Definition of Generalized p-Values	117
5.4 Frequency Interpretations and Generalized Fixed-Level Tests	121
5.5 Invariance	123
5.6 Comparing the Means of Two Exponential Distributions	127
5.7 Unbiasedness and Similarity	133
5.7 Comparing the Means of an Exponential Distribution and a Normal Distribution	136
Exercises	139

Chapter 6

Generalized Confidence Intervals 143

6.1 Introduction	143
6.2 Generalized Definitions	145
6.3 Frequency Interpretations and Repeated Sampling Properties	149
6.4 Invariance in Interval Estimation	151
6.5 Interval Estimation of the Difference Between Two Exponential Means	153
6.6 Similarity in Interval Estimation	158
6.7 Generalized Confidence Intervals Based on p-Values	159
6.8 Resolving an Undesirable Feature of Confidence Intervals	161
6.9 Bayesian and Conditional Confidence Intervals	163
Exercises	165

Chapter 7

Comparing Two Normal Populations 169

7.1 Introduction	169
7.2 Comparing the Means when the Variances are Equal	170
7.3 Solving the Behrens-Fisher Problem	174
7.4 Inferences About the Ratio of Two Variances	182
7.5 Inferences About the Difference in Two Variances	184
7.6 Bayesian Inference	186
7.7 Inferences About the Reliability Parameter	190
7.8 The Case of Known Stress Distribution	194
Exercises	198

Chapter 8

Analysis of Variance 203

8.1 Introduction	203
8.2 One-way Layout	204
8.3 Testing the Equality of Means	207
8.4 ANOVA with Unequal Error Variances	210
8.5 Multiple Comparisons	216
8.6 Testing the Equality of Variances	221
8.7 Two-way ANOVA without Replications	225
8.8 ANOVA in a Balanced Two-way Layout with Replications	229
8.9 Two-way ANOVA under Heteroscedasticity	234
Exercises	238

Chapter 9	
Mixed Models	242
9.1 Introduction	242
9.2 One-way Layout	243
9.3 Testing Variance Components	248
9.4 Confidence Intervals	253
9.5 Two-way Layout	259
9.6 Comparing Variance Components	264
Exercises	268
Chapter 10	
Regression	272
10.1 Introduction	272
10.2 Simple Linear Regression Model	273
10.3. Inferences about Parameters of the Simple Regression Model	274
10.4 Multiple Linear Regression	278
10.5 Distributions of Estimators and Significance Tests	282
10.6 Comparing Two Regressions with Equal Variances	288
10.7 Comparing Regressions without Common Parameters	291
10.8 Comparison of Two General Models	294
Exercises	298
Appendix A	301
Elements of Bayesian Inference	301
A.1 Introduction	301
A.2 The Prior Distribution	302
A.3 The Posterior Distribution	303
A.4 Bayes Estimators	306
A.5 Bayesian Interval Estimation	308
A.6 Bayesian Hypothesis Testing	309
Appendix B	
Technical Arguments	313
References	316
Index	325
