Practical Handbook of
SOIL, VADOSE ZONE,
and GROUND-WATER
CONTAMINATION
Assessment, Prevention,
and Remediation

J. Russell Boulding
# Part I: Basic Concepts

Part III: Prevention and Remediation

Chapter 11 Prevention and Minimization of Contamination
11.1 General Approaches
11.2 Delineation of Wellhead Protection Areas
11.3 Identification of Potential Contaminant Sources
11.4 Assessing The Risk From Potential Contaminants
11.5 Wellhead Protection Area Management
11.6 Guide to Major References

Chapter 12 Remediation Planning
12.1 Conceptual Approach to Soil and Ground Water Remediation
12.2 Methodology
12.3 Selection of Treatment Methods
12.4 Measurement and Interpretation of Treatment Effectiveness
12.5 Guide to Major References

Chapter 13 Remediation of Contaminated Soils
13.1 General Approaches to Soil Remediation
13.2 Soil Vacuum Extraction (SVE)
13.3 Bioremediation
13.4 Other Treatment Approaches
13.5 Prepared Bed Reactors
13.6 Guide to Major References

Chapter 14 Remediation of Contaminated Ground Water
14.1 Overview
14.2 Source Control
14.3 Containment: Ground Water Barriers and Flow Control
14.4 Ground Water Collection
14.5 Ground Water Pump-and-Treat Methods
14.6 In Situ Treatment
14.7 Guide to Major References

Appendix A Summary Information on Major Subsurface Characterization and Monitoring Techniques and Index to ASTM Methods
Appendix B Manufacturers and Distributors of Field Characterization and Monitoring Equipment
Appendix C Tables and Figures for Estimation of Aquifer Parameters
Appendix D Worksheets and Checklists for Ground-Water and Wellhead Protection
Appendix E PC-Based Geoenvironmental Software
Appendix F Master List of Figures and Tables with Credits

Key Word Index
