Matrices of sign-solvable linear systems
Contents

Preface xi

1 Sign-solvability 1
1.1 A problem in economics 1
1.2 Sign-solvable linear systems 4
Bibliography 16

2 L-matrices 18
2.1 Signings 18
2.2 Indecomposability 22
2.3 L-canonical form 31
Bibliography 33

3 Sign-solvability and digraphs 35
3.1 Partial sign-solvability 35
3.2 Digraph characterizations 42
3.3 Sign-solvability and digraphs 53
Bibliography 60

4 S*-matrices 62
4.1 S*-matrices and SNS*-matrices 62
4.2 Recursive structure 66
4.3 Zero patterns of S-matrices 73
4.4 Maximal S-matrices 79
Bibliography 85
Beyond $S^*$-matrices
5.1 Totally $L$-matrices
5.2 Recursive structure of totally $L$-matrices
5.3 Signed compound
5.4 Sign-central matrices
Bibliography

SNS-matrices
6.1 Zero patterns of SNS-matrices
6.2 Maximal SNS-matrices
6.3 Zero patterns of partly decomposable maximal SNS-matrices
6.4 SNS-matrices and the permanent
6.5 Characterizations of zero patterns of SNS-matrices
6.6 Combinatorially symmetric SNS-matrices
Bibliography

$S^2 NS$-matrices
7.1 Fully indecomposable $S^2 NS$-matrices
7.2 Zero patterns of $S^2 NS$-matrices
7.3 Partly decomposable $S^2 NS$-matrices
7.4 $S^2 NS$-matrices whose inverses are $S^2 NS$-matrices
7.5 Inverses of fully indecomposable $S^2 NS$-matrices
Bibliography

Extremal properties of $L$-matrices
8.1 Maximal SNS-matrices
8.2 SNS-matrices
8.3 Barely $L$-matrices
Bibliography

The inverse sign pattern graph
9.1 General properties of the inverse sign pattern graph
9.2 Inverse-positive sign patterns
Bibliography

Sign stability
10.1 A problem from ecology
10.2 Sign-stable matrices
10.3 Stably sign-solvable linear systems
10.4 SNS-matrices with other eigenvalue restrictions
Bibliography
