Contents

Preface xiii

1. Introduction 1

PART 1. THE SYSTEM CONCEPT

2. Systems, Domains, and Truth Assertions 15
3. Sysreps and the Human Mind 30

PART 2. COMPLEXITY

4. An Index for Complexity 49
5. Thinking About Complex Systems 69
6. Feedback as a Source of Complexity 80

PART 3. STRUCTURE

7. Hierarchy as a Structural Feature: The Hierarchy of Constitution 101
8. Interfaces of Mutual Constraint and Levels of Control: Polanyi's Principle 110
9. The Theory of Dimensions 122
Contents

10. Integrated Control Information  129
11. Disciplines at One Level: Disciplines and the Human Design Process  137
12. Consistency as a Primary Criterion: The Limits of Reductionism and Synoptism  143
13. Operational Procedures in Forming Sysreps for Complex Systems  156
14. Examples of Multidisciplinary Analysis  171
15. The Evolution of Disciplines, 1500–1900  194
16. Relations Among the Disciplines in the Twentieth Century: Similarities and Differences  213

PART 4. FALLACIES OF PROJECTION

17. Fallacies of Projection: Illustrations  235
18. Fallacies of Projection: Possible Sources  244

PART 5. CONCLUSIONS

19. What Have We Learned? A Summary of Results and Conclusions  263
20. What Have We Learned? Implications and Inferences  276

Appendix A. Implications for Education  295
Appendix B. Two Standing Bets  301
Appendix C. Hypotheses, Guidelines, Dicta, and Queries  311
Appendix D. Glossary  315

References  319
