### 1 Analysis on the Wiener space

1.1 Wiener chaos and stochastic integrals .......................... 3
1.1.1 The Wiener chaos decomposition ......................... 4
1.1.2 Multiple Wiener-Itô integrals .......................... 7
1.1.3 The Itô stochastic integral .......................... 14

1.2 The derivative operator ...................................... 23

1.3 The Skorohod integral ........................................ 34
1.3.1 Properties of the Skorohod integral ...................... 37
1.3.2 The Itô stochastic integral as a particular case of the Skorohod integral ................. 41
1.3.3 Stochastic integral representation of Wiener functionals ......................... 42
1.3.4 Local properties ......................................... 43

1.4 The Ornstein-Uhlenbeck semigroup ........................... 49
1.4.1 The semigroup of Ornstein-Uhlenbeck .................... 49
1.4.2 The generator of the Ornstein-Uhlenbeck semigroup 53
1.4.3 Hypercontractivity property and the multiplier theorem ................. 56

1.5 Sobolev spaces and the equivalence of norms ................ 61
2 Smoothness of probability laws
2.1 Existence and smoothness of densities
  2.1.1 A criterion for absolute continuity
  2.1.2 Absolute continuity using Bouleau
         and Hirsch's approach
  2.1.3 Criterion for the smoothness of the density
  2.1.4 Regularity of the law of the maximum
         of continuous processes
2.2 Stochastic differential equations
  2.2.1 Existence and uniqueness of solutions
  2.2.2 Weak differentiability of the solution
2.3 Hypoellipticity and Hörmander's theorem
  2.3.1 Absolute continuity in the case
         of Lipschitz coefficients
  2.3.2 Absolute continuity under Hörmander's conditions
  2.3.3 Smoothness of the density
         under Hörmander's condition
2.4 Stochastic partial differential equations
  2.4.1 Stochastic integral equations on the plane
  2.4.2 Absolute continuity for solutions
         to the stochastic heat equation
3 Anticipating stochastic calculus
3.1 Approximation of stochastic integrals
  3.1.1 Stochastic integrals defined by Riemann sums
  3.1.2 The approach based on the $L^2$ development
         of the process
3.2 Stochastic calculus for anticipating integrals
  3.2.1 Skorohod integral processes
  3.2.2 Continuity and quadratic variation
         of the Skorohod integral
  3.2.3 Itô's formula for the Skorohod
         and Stratonovich integrals
  3.2.4 Substitution formulas
3.3 Anticipating stochastic differential equations
  3.3.1 Stochastic differential equations
         in the Skorohod sense
  3.3.2 Stochastic differential equations
         in the Stratonovich sense
4 Transformations of the Wiener measure
4.1 Anticipating Girsanov theorems
  4.1.1 The adapted case

A Appendix

| A.1     | Khintchine's inequality                                             | 235  |
| A.2     | Martingale inequalities                                             | 235  |
| A.3     | Continuity criteria                                                 | 237  |
| A.4     | Carleman-Fredholm determinant                                       | 238  |
