IAG Opening Address

W. Torge

Session 1  Progress in Gravity Instrumentation
Chairman, J. Faller

An Ocean Bottom Absolute Gravity Meter
Zumberge, M.A. and E.L. Canuteson

Session 2  Intercomparison Campaigns
Chairman, I. Marson

Problems of Gravimeter Calibration in High Precision Gravimetry
Meurers, B.

Intercomparison of IMGC Absolute and GWR Superconducting Gravimeters
Baldi, P., G. Casula, S. Focardi, F. Palmonari, G. Cerutti, P. De Maria, and I. Marson

Session 3  Standards, Networks, Data Bases and Software
Chairman, G. Boedecker

British Precise Gravity Network 1993
Charles, K. and R.G. Hipkin

Large Scale Absolute Gravity Control in South America
Torge, W., L. Timmen, R.H. Röder, and M. Schnüll
Gravity Variations in Microgravity Networks in Central Italy
Di Filippo, M., T. Ruspandini, and B. Toro

British and French Gravity Datums Connected via the Channel Tunnel
Hipkin, R.G., J.F. Kirby, and K. Charles

Unified Gravity Network of the Czech Republic, Slovakia and Hungary
Csapó, G., G. Szatmári, M. Klobušiak, J. Kováčik, S. Olejník, and L. Träger

The Adjustment of the Unified European Gravity Network 1994 (UEGN 94)
Boedecker, G., I. Marson, and H.-G. Wenzel

Worldwide Synthetic Gravity Tide Parameters
Timmen, L. and H.-G. Wenzel

Gravity Anomalies for the Southern Part of Baltic Sea and their Statistics
Lyszkowicz, A.

Session 4 Space Gradiometry and Airborne Gravimetry
Chairman, R. Rummel

Global Gravity Field Recovery by Use of STEP Observations
(Extended Abstract)
Albertella, A., F. Migliaccio, and F. Sansò

Solving the STEP-Observation Equation Using Banach’s Fixed-Point Principle
Keller, W.

Some Unsolved Problems in Airborne Gravimetry
Schwarz, K.P. and M. Wei

State-of-the-Art and Future Sensor Technology for Airborne Gravimetry
Neumeyer, J. and K. Hehl

Fundamentals and Applications of Digital Filtering in Airborne Gravimetry
Hehl, K.

GPS Software Development for Airborne Gravimetry and First Results
Xu, G., K. Hehl, and D. Angermann
Accelerometer/GPS Integration for Strapdown Airborne Gravimetry: First Test Results

State-of-the-Art Airborne Gravimetry
Brozena, J.M. and M.F. Peters

A Survey of Worldwide Research Activities on Airborne Gravimetry – Open and Solved Problems – (Extended Abstract)
Hein, G.W.

Session 5 Geophysical Inversion of Gravity and Geoid
Chairman, P. Holota

Two Branches of the Newton Potential and Geoid
Holota, P.

Geodetic and Geophysical Inverse Gravimetric Problem, the Most Adequate Solution and the Information Content
Strykowski, G.

A New Approach to Approximate the Earth’s Gravity Field

The Maximum Entropy Geoid - A Solution for an Internal Level Surface
Lehmann, R.

Upward Continuation to the Brillouin Level of the Romanian Gravity Map
Ivan, M.F.

Geoid Undulation Caused by the Heterogeneity of the Litosphere and Mantle in Qinghai-Xizang Plateau, China
Hsu, H.T. and X.L. Li

Theoretical Background of the Vening Meinesz Isostatic Model
Abd-Elmotaal, H.A.

Computation of the Moho Depths from Gravity Data in the Ross Sea (Antarctica)
Coren, F., C. Zanolla, and I. Marson
Using the Geophysical Inversion of the Gravity Data to Explain the Crustal Structure of South-East China
Wang, Q.

Covariance Functions Set Derived from Radial Multipoles Potentials: Theory and Some Results for Regional Gravity Field in Central Europe
Marchenko, A. and O. Abrikosov

Session 6  Altimetry
Chairman, F. Sansò

A Uniform Approach to the Estimation Problems of Satellite Altimetry
van Gysen, H. and R. Coleman

Gravity Disturbances from GEOSAT Data and Forward Geopotential Models in the Labrador Sea
Zhang, C. and M.G. Sideris

A New Approach to Sea Surface Topography Estimation
Barrile, V., R. Barzaghi, L. Giacobbe, and F. Negrini

D-PAF Mean Sea Surfaces and High Resolution Gravity Field Models Based on ERS-1 Altimeter Data
Gruber, Th., M. Anzenhofer, and M. Rentsch

A Datum Defect and Spectral Analysis in Regional Cross-over Adjustments of Satellite Altimeter Data
Lenk, U., K. Seitz, and B. Heck

Long-Term Vertical Control in Satellite Altimetry, Deficiencies and Concepts
Schmidt, M. and W. Bosch

Gravity and Geoid in the Mediterranean from a Common Adjustment of ERS-1 and TOPEX Altimeter Data
Arabelos, D. and I.N. Tziavos

First Analysis of ERS-1 Altimeter Data in the Red Sea Area
Elsayed, M.S. and E. Hoeck

The Use of Transponders in Altimetry
Pesec, P., H. Sünkel, and N. Windholz
Session 7 International Projects and Advanced Techniques
Chairman, M.G. Sideris

Comparison of Geopotential Recovery Capabilities of Some Future Satellite Missions
Balmino, G. and F. Perosanz

A Joint GSFC/DMA Project for Improving the Model of the Earth's Gravitational Field
Rapp, R.H. and R.S. Nerem

European Gravimetric Geoid: Status Report 1994
Denker, H., D. Behrend, and W. Torge

Problems with Geoid Evaluations in South East Asia
Kearsley, A.H.W. and Z. Ahmad

Height Comparisons on the Australian National GPS Network (ANN): First Results
Pearse, M.B., A.H.W. Kearsley, and P. Morgan

Geoid Computations in Taiwan
Tsuei, G.-C., D. Arabelos, R. Forsberg, M.G. Sideris, and I.N. Tziavos

The Local Geoid Determination in China – The Combination of Nationwide Network of GPS Levelling with that of Astro-Gravimetric Levelling (Abstract)
Chen, J.

Parallel Line Data Gridding Using Radon Domain Information
Zhou, Y. and R. Haagmans

A Comparison of Stokes' Numerical Integration and Collocation, and a New Combination Technique (Abstract)
de Min, E.

Does the Spherical Approximation Affect the Datum Transformation?
Abd-Elmotaal, H.A. and M. El-Tokhey

Non Tidal Gravity Variations and Geodynamic Processes
Stus, Y.F., G.P. Arnautov, E.N. Kalish, and V.Y. Timofeev

A Comparison of Geoid and Quasigeoid Modeling Methods in Rough Topography
Mainville, A., M. Véronneau, R. Forsberg, and M.G. Sideris
Dynamics of the Adriatic Microplate and the Eastern Alps

Pesec, P. and N. Windholz

Session 8  The Geoid in Europe
Chairman, M. Vermeer

Using High Precision GPS to Aid Absolute Geoid Datum Definition
Dodson, A.H., R.M. Bingley, and M.P. Stewart

Geoid Determination by GPS and Levelling
Ihde, J.

How Close are we to a Centimetric Geoid?
Hipkin, R.G.

Basic Relations for Evaluating the Global and Regional Quasigeoid
Heights on the Base of Gravity Data and a Global Model of the
Geopotential
Petrovskaya, M.S.

Determination of a Gravimetric Geoid Solution for South Korea
Yun, H.S.

Geoid Determination and Levelling by GPS: Some Experiments on a Test
Network
Duquenne, H., Z. Jiang, and C. Lemarié

Data Preprocessing toward a South American Geoid
Blitzkow, D. and J.D. Fairhead

The Hungarian Contribution to the Determination of a Precise European
Reference Geoid
Ádám, J., H. Denker, A. Sárhidai, and Z. Szabó

Test of Collocation Models for the Swiss Geoid Computation
Marti, U.

Towards a High Precision Geoid for Egypt
Hanafy, M.S.A. and M.E.A. El Tokhey

Estonian Geodetic and Gravimetric Networks and Geoid Undulation
Ostonen, A., J. Randjärv, and H. Sildvee
The Total Terrain Effect in the Modified Stokes' Formula

Sjöberg, L.E.

Geoid in the West Ukraine Area Derived by Means of Non-Central Multipole Analysis Technique

Marchenko, A. and O. Abrikosov

Tidal Models of the Mediterranean Sea. Main Diurnal and Semidiurnal Constituents

de Toro, C., R. Vieira, and M.J. Sevilla

Global Geopotential Models and Gravity Data for the Territory of Romania

Ioane, D. and I. Radu

Gravity Field Determination in Croatia – Status Report

Čolić, K., T. Bašić, B. Pribičević, and D. Medak

Author Index
