I GLOBAL WARMING: PERSPECTIVES FROM LAND AND SEA, 1

1. Biotic Feedbacks from the Warming of the Earth, 3
   George M. Woodwell

2. Global Climatic Change: Climatically Important Biogenic Gases and Feedbacks, 22
   Fred T. Mackenzie

II BIOTIC PROCESSES AND POTENTIAL FEEDBACKS, 47

A Plants and Plant Communities, 49

3. Plant Physiological Responses to Elevated CO₂, Temperature, Air Pollution, and UV-B Radiation, 51
   Leon Hartwell Allen, Jr., and Jeffrey S. Amthor

4. On the Potential for a CO₂ Fertilization Effect in Forests: Estimates of the Biotic Growth Factor, Based on 58 Controlled-Exposure Studies, 85
   Stan D. Wullschleger, W. M. Pöst, and A. W. King

5. Indicators of Climatic and Biospheric Change: Evidence from Tree Rings, 108
   Gordon C. Jacoby and Rosanne D. D’Arrigo

6. Global Climate Change: Disturbance Regimes and Biospheric Feedbacks of Temperate and Boreal Forests, 119
   Werner A. Kurz, Michael J. Apps, Brian J. Stocks, and W. Jan A. Volney

7. Permafrost and Vegetation Response to Global Warming in North Eurasia, 134
   A. A. Velichko, O. K. Borisova, E. M. Zelikson, and V. P. Nechayev

B Soils, 157

8. Soil Respiration and Changes in Soil Carbon Stocks, 159
   William H. Schlesinger

9. The Biogeochemistry of Northern Peatlands and Its Possible Responses to Global Warming, 169
   Eville Gorham

10. Methane Output from Natural and Quasi-Natural Sources: A Review of the Potential for Change and for Biotic and Abiotic Feedbacks, 188
    E. G. Nisbet and B. Ingham
11. Linkages between Carbon and Nitrogen Cycling and Their Implications for Storage of Carbon in Terrestrial Ecosystems, 219
   Eric A. Davidson

C Oceans and Estuaries, 231
12. Biofeedback in the Ocean in Response to Climate Change, 233
   Gilbert T. Rowe and Jack G. Baldauf
13. Net Carbon Metabolism of Oceanic Margins and Estuaries, 246
   Stephen V. Smith
14. The Vanishing Climatic Role of Dimethyl Sulfide, 251
   R. J. Charlson
15. Implications of Increased Solar UV-B for Aquatic Ecosystems, 263
   Raymond C. Smith

III GLOBAL CARBON BUDGETS, MODELS, AND GEOPHYSICAL CONSTRAINTS, 279

A Terrestrial and Oceanic Interactions, 281
16. Modeling Interactions of Carbon Dioxide, Forests, and Climate, 283
   Robert J. Luxmoore and Dennis B. Baldocchi
17. Vegetation Geography and Global Carbon Storage Changes, 304
   I. Colin Prentice and Martin T. Sykes
18. CO$_2$-Climate Feedbacks: Aspects of Detection, 313
   Ian G. Enting

B Modeling the Carbon Sink, 331
19. Effects of Land-Use Change, Surface Temperature, and CO$_2$
   Concentration on Terrestrial Stores of Carbon, 333
   R. A. Houghton
20. Storage versus Flux Budgets: The Terrestrial Uptake of CO$_2$ during the 1980s, 351
   Pieter P. Tans, Inez Y. Fung, and Ian G. Enting
   Inez Y. Fung

IV BIOTIC FEEDBACKS IN THE GLOBAL CLIMATIC SYSTEM, 375
22. What We Need to Know: Some Priorities for Research on Biotic Feedbacks in a Changing Biosphere, 377
   W. D. Billings
23. Will the Warming Speed the Warming?, 393
   George M. Woodwell, Fred T. Mackenzie, R. A. Houghton, Michael J. Apps, Eville Gorham, and Eric A. Davidson

Index, 413
