Jurassic Magmatism and Tectonics
of the North American Cordillera

Edited by

David M. Miller

Contents

Preface .................................................................................................................... v

1. Subduction Cycles Under Western North America During the Mesozoic and Cenozoic Eras ...................................................... 1
   Peter L. Ward

2. Provenance Constraints for Whitehorse Trough Conglomerate: U-Pb Zircon Dates and Initial Sr Ratios of Granitic Clasts in Jurassic Laberge Group, Yukon Territory .................................................. 47

3. Magmatic Flow and Emplacement Foliations in the Early Jurassic Aishihik Batholith, Southwest Yukon: Implications for Northern Stikinia .................................................. 65
   Stephen T. Johnston and Philippe Erdmer

4. Age and Tectonic Setting of Early Jurassic Episodic Volcanism Along the Northeastern Margin of the Hazelton Trough, Northern British Columbia ............................................................................. 83
   Derek J. Thorkelson, James K. Mortensen, Henry Marsden, and Richard P. Taylor

5. Jurassic and Cretaceous Geochronology of the Southern Coast Belt, British Columbia, 49° to 51° N. .............................................. 95
   Richard M. Friedman and Richard L. Armstrong

6. Nd-Sr Isotope Geochemistry and Petrogenesis of Jurassic Granitoid Intrusives, Southeast British Columbia, Canada ..................................................... 141
   Dipak K. Ghosh and Richard St J. Lambert

7. New Geochronological Constraints on Jurassic Deformation of the Western Edge of North America, Southeastern Canadian Cordillera ..................................................... 159
   Donald C. Murphy, Peter van der Heyden, Randall R. Parrish, D. W. Klepacki, W. McMillan, L. C. Struik, and J. Gabites
## Contents

8. Metamorphism in the Northern Klamath Mountains, Oregon .......................... M. Allan Kays 173

10. Late Jurassic Dike Swarms in the Southwestern Sierra Nevada Foothills Terrane, California: Implications for the Nevadan Orogeny and North American Plate Motion ............................................................. Michael B. Wolf and Jason B. Saleeby 203

11. Geology of the Humboldt Igneous Complex, Nevada, and Tectonic Implications for the Jurassic Magmatism in the Cordilleran Orogen .............................. Yildirim Dilek and Eldridge M. Moores 229

13. Jurassic Tectonics of Northeastern Nevada and Northwestern Utah from the Perspective of Barometric Studies .......................................................... David M. Miller and Thomas D. Hoisch 267

15. Evidence of Jurassic Tectonism from the Barneys Canyon Gold Deposit, Oquirrh Mountains, Utah .......................................................... Ricardo Presnell and William T. Parry 313

16. Structural and Stratigraphic Development of the Middle Jurassic Magmatic Arc in the Cowhole Mountains, Central-Eastern Mojave Desert, California .................. William B. Wadsworth, Horacio Ferriz, and Dallas D. Rhodes 327

17. Plutonism at the Interior Margin of the Jurassic Magmatic Arc, Mojave Desert, California ................................. Miquette E. Gerber, Calvin F. Miller, and Joseph L. Wooden 351

18. Jurassic Thrusting of Precambrian Basement Over Paleozoic Cover in the Clipper Mountains, Southeastern California .................. K. A. Howard, K. J. W. McCaffrey, J. L. Wooden, D. A. Foster, and S. E. Shaw 375

19. Middle Jurassic Magmatism: The Volcanic Record in the Eolian Page Sandstone and Related Carmel Formation, Colorado Plateau .................. Ronald C. Blakey and Roderick A. Parnell, Jr. 393

Index ........................................................................................................ 413
