Plant-Soil Interactions at Low pH: Principles and Management

Proceedings of the Third International Symposium on Plant-Soil Interactions at Low pH, Brisbane, Queensland, Australia, 12–16 September 1993

Edited by

R.A. DATE, N.J. GRUNDON, G.E. RAYMENT and M.E. PROBERT

Contents

Preface

OVERVIEW PAPER

*1. Global extent, development and economic impact of acid soils
H.R. von Uexküll, E. Mutert

SECTION I: CHEMISTRY AND PHYSICS OF ACID SOILS

*2. Soluble aluminium in acidic soils: Principles and practicalities
G.S.P. Ritchie

3. Potential solid phases controlling dissolved aluminium and iron concentrations in acidic soils
K.J. Reddy, L. Wang, S.P. Gloss

4. Amelioration of aluminium phytotoxicity with organic matter
M.T.F. Wong, R.S. Swift

*5. Chromatographic techniques for the separation of Al and associated organic ligands present in soil solution

*6. Quantitative $^{27}$Al NMR spectroscopic studies of Al (III) complexes with organic acid ligands and their comparison with GEOCHEM predicted values
G.L. Kerven, P.L. Larsen, L.C. Bell, D.G. Edwards

*7. Aluminium reactions with polygalacturonate and related organic ligands
Z. Ostatek-Boczynski, G.L. Kerven, F.P.C. Blamey

8. Forms of extractable aluminium in Canadian acid soils and their relations to plant growth
Y.K. Soon

9. Phenolic acids in boreal peats from Finland and comparison with those from tropical and temperate areas
T. Katase

10. Rates and sources of acidification in agricultural systems of southern Australia
W.M. Porter, C.D.A. McLay, P.J. Dolling

11. Effects of long-term application of phosphate fertilisers on soil acidity under pasture in New Zealand
V. Manoharan, P. Loganathan, R.W. Tillman

*Chapters indicated with an asterisk are reprinted from Plant and Soil Volume 171, No. 1 (1995).
VI  Contents

12. A model for understanding the importance of various chemical, physical and biological processes in the development of soil profile acidity  
J.B. Robinson, K.R. Helyar, Z. Hochman 93

*13. Models for relating pH measurements in water and calcium chloride for a wide range of pH, soil types and depths  

14. Long-term effects of ammonium nitrate application on soil pH, and micronutrients in soil and bromegrass hay  
S.S. Malhi, M. Nyborg, J.T. Harapiak, D.J. Heaney 105

15. Nitrogen mineralisation and nitrification in acidic subsurface layers of soil  
S.R. Young, A.S. Black, M.K. Conyers 111

16. Reactions buffering pH in acid soils treated with lime  
K.R. Helyar, M.K. Conyers, A.M. Cowling 117

17. Phosphorus sorption of coal-mine soils in Galicia, NW Spain  
M.L. Fernández Marcos, E. Alvarez Rodríguez, C. Monterroso 125

18. Quantity/intensity relation and phosphorus availability in south Brazilian latosols as affected by form and placement of phosphorus and farmyard manure  
W. Werner, E.E. Scherer 129

19. The effect of flooding on S sorption capacity and AEC of variable charge soils  
A. Triana, R.D.B. Lefroy, G.J. Blair 135

*20. Solubility and mobility of copper, zinc and lead in acidic environments  
K.J. Reddy, L. Wang, S.P. Gloss 141

21. Acid surface soil distribution and extent in Queensland, Australia  
C.R. Ahern, R.F. Isbell, M.M.G. Weinand 147

22. Does climate influence the pH of Queensland surface soils?  
C.R. Ahern, M.M.G. Wein 155

*23. Influence of acid rain and ozone on soil heavy metals under loblolly pine trees: A field study  
P.A. Nouri, G.B. Reddy 161

SECTION 2: MICROBIAL AND FAUNAL ACTIVITY IN ACID SOILS

24. Microbial activity in acid soils  
J.M. Lynch 167

*25. A mechanism of aluminium toxicity to soil bacteria and possible ecological implications  
M. Wood 173

*26. Characteristics of an ideotype acid tolerant pasture legume symbiosis in Mediterranean agriculture  
J.G. Howieson 181
27. Effect of pH on nitrogenase activity and mineral composition of *Medicago truncatula* cv. Jamalong and *M. polymorpha* cv. Serena inoculated with *Rhizobium meliloti*
   Y. Lestari, A.H. Gibson, R.D. Graham 187

28. Effects of excess aluminium and manganese on growth and phosphorus nutrition of mycorrhizal sorghum grown under acidic conditions
   C.A.B. Medeiros, R.B. Clark, J.R. Ellis 193

29. Faunal activity in acid soils
   P. Lavelle, A. Chauvel, C. Fragoso 201

30. Abundance of earthworms in soils used for cereal production in south-eastern Australia and their role in reducing soil acidity

### SECTION 3: MECHANISMS OF ACID TOLERANCE OF PLANTS

31. Techniques for assessing plant responses on acid soils
   D.C. Edmeades, F.P.C. Blarney, M.P.W. Farina 221

32. Adaptation of tropical forage species to acid soils: the influence of varying phosphorus supply and soil type on plant growth
   I.M. Rao, V. Borrero, M.A. Ayarza, R. Garcia 235

*33. Tolerance and avoidance of Al toxicity by *Mucuna pruriens* var. *utilis* at different levels of P supply
   K. Hairiah, M. van Noordwijk, S. Setijono 243

*34. Tolerance of Australian tropical and subtropical *Acacias* to acid soil
   N. Ashwath, P.J. Dart, D.G. Edwards, P.K. Khanna 249

*35. Overcoming barriers to understanding the cellular basis of aluminium resistance
   G.J. Taylor 255

*36. Plasma membrane of younger and outer cells is the primary specific site for aluminium toxicity in roots
   T. Wagatsuma, S. Ishikawa, H. Obata, K. Tawaraya, S. Katohda 271

*37. Effect of aluminium on membrane properties of soybean (*Glycine max*) cells in suspension culture
   A. Staß, W.J. Horst 279

*38. Involvement of plasma membrane potential in the tolerance mechanism of plant roots to aluminium toxicity
   M. Sasaki, M. Kasai, Y. Yamamoto, H. Matsumoto 285

*39. Transmembrane calcium fluxes during Al stress
   Z. Rengel, M. Piñeros, M. Tester 291

*40. Aluminium and calcium transport interactions in intact roots and root plasmalemma vesicles from aluminium-sensitive and tolerant wheat cultivars
   J.W. Huang, D.L. Grunes, L.V. Kochian 297
*41. Antagonism between aluminium and calcium for sorption by calcium pectate  
F.P.C. Blarney, A.J. Dowling 303

*42. Magnesium uptake by AL-stressed maize plants with special emphasis on cation interactions at root exchange sites  
W.G. Keltjens 307

*43. Analysis of acid-soil stress in sorghum genotypes with emphasis on aluminium and magnesium interactions  
K. Tan, W.G. Keltjens 313

*44. Root growth analysis: An underutilised approach to understanding aluminium rhizotoxicity  
D.R. Parker 317

*45. The effect of aluminium concentration on root hairs in white clover (Trifolium repens L.)  
D.A. Care 325

*46. Physiological response of root tip of alfalfa to low pH and aluminium stress in water culture  
S. Yokota, K. Ojima 329

*47. Ultrastructural investigations and EDX-analyses of Al-treated oat (Avena sativa) roots  
S. Marienfeld, H. Lehmann, R. Stelzer 333

48. Increase of ATP-dependent H⁺ pump activity of tonoplast of barley roots by aluminium stress: Possible involvement of abscisic acid for the regulation  

*49. Solution pH modifies the response of Norway spruce seedlings to aluminium  
D.L. Godbold, G. Jentschke, P. Marschner 345

50. Effect of nitrogen source and aluminium on the growth of two wheat cultivars known to differ in aluminium tolerance  
D.M. Wheeler 349

*51. Characteristics of carrot plant regenerated from two cell line selected as either ionic-Al tolerant cell or Al-phosphate utilizing cells  
H. Koyama, K. Ojima, T. Yamaya, Y. Sonoda 353

52. Determining factors for aluminium toxicity in cultured tobacco cells: medium components and cellular growth conditions  
Y. Yamamoto, K. Ono, H. Matsumoto 359

53. Aluminium tolerance caused by phosphate starvation in cultured tobacco cells  
Y. Yamamoto, K. Mametsuka, B. Ezaki, H. Matsumoto 363

54. Phytotoxicity of monomer aluminium ions and hydroxy-aluminium polymer ions in an Andosol  
Masahiko Saigusa, Toru Matsumoto, Tokuro Abe 367

55. Performance of soybean cultivars at different concentrations of manganese in nutrient solution  
H.A.A. Mascarenhas, R.T. Tanaka, M.A.C. Miranda, V. Nagai, Q.A. de C. Carmello 371
56. Cadmium and copper interactions on the accumulation and distribution of Cd and Cu in birch (*Betula pendula* Roth) seedlings
   M. Gussarsson, S. Adalsteinsson, P. Jensén, H. Asp
   375

57. Physiological state of shoots and roots and of energy transformation systems in plants at low pH
   N.V. Budagovskaya
   379

58. Regulation of electrogenesis of root cells at low pH
   385

SECTION 4: SELECTION AND BREEDING OF ACID TOLERANT PLANTS

59. Advances in the selection and breeding of acid-tolerant plants: rice, maize, sorghum and tropical forages
   R.S. Zeigler, S. Pandey, J. Miles, L.M. Gourley, S. Sarkarung
   391

60. Use of improved tolerant cultivars to increase rice production on acid histosols of southern Sri Lanka
   P.A.N. Chandrasiri, R. Pathirana
   407

61. Response of rice cultivars to increased iron and aluminium concentrations
   R. Pathirana, P.A.N. Chandrasiri, S.G. Sirisena
   413

62. Progress from selection for tolerance to soil acidity in five tropical maize populations
   H. Ceballos, S. Pandey, E.B. Knapp, J. Duque
   419

63. Soil acidity effects on agribotanical traits of durum and common wheat
   L. Bona, V.C. Baligar, R.J. Wright
   425

64. A proposal for a working group on acid soil tolerance in grain legumes
   429

65. The effect of aluminium on the growth of a range of temperate legume species and cultivars: A summary of results
   D.M. Wheeler, M.B. Dodd
   433

66. Chemical content of Al-tolerant and Al-susceptible breeding lines of white clover
   J.R. Caradus, A.D. Mackay
   439

67. Distribution of Al-tolerance in crosses between genotypes of white clover selected for either Al-tolerance or Al-susceptibility
   J.R. Caradus, A.D. Mackay
   447

68. In vitro selection for aluminium tolerance in red clover (*Trifolium pratense* L.)
   W. Pawlowski, B. Skucinska
   451

69. Improving the acid-soil tolerance of *Medicago sativa* by asymmetric somatic hybridisation
   P.A. Stoutjesdijk, P.J. Larkin, P.W.G. Sale
   455
X Contents

70. Quantitative genetic variation for acid soil tolerance in a *Phalaris aquatica* × *P. arundinacea* × *P. aquatica* backcross population
   R.N. Oram, A.M. Ridley 459

SECTION 5: DIAGNOSIS AND CORRECTION OF ACID SOIL INFERTILITY

71. Acidification of sub-surface soils under pastures in Victoria, Australia
   D.M. Crawford, C.D. Parnell, J. Maheswaran 467

72. Soil acidification under pastures of north-eastern Victoria five years after liming
   A.M. Ridley, D.R. Coventry 473

73. Field calibration of lime requirement soil tests
   R.L. Aitken, P.W. Moody, T. Dickson 479

74. Modified lime requirement for South African sugar belt soils based on an aluminium to sulphur ratio
   B.L. Schroeder, J.H. Meyer, R.A. Wood 485

75. Agronomic efficiency of limestones with different acid-neutralizing capacity, under field condition
   J.A. Quaggio, P.B. Gallo, H.A.A. Mascarenhas 491

76. Evaluation of liming materials used in South Australia
   R.H. Merry, T.J.V. Hodge, D.C. Lewis, J. Jacka 497

77. Limestone efficiency and boron effects on forage yield and soil properties
   V.A. Haby, R.H. Loeppert, R. Villavicencio, A.T. Leonard, J.V. Davis 505

78. Residual effects of dolomitic limestone on corn grown on an acidic Malaysian Ultisol

79. Effects of coal flue gas desulphurisation by-products and calcium-sulfite, -sulfate and -carbonate on maize grown in acid soil
   R.B. Clark, S.K. Zeto, K.D. Ritchey, R.R. Wendell, V.C. Baligar 519

80. Effect of gypsum application rate and leaching regime on wheat growth in a highly acidic subsoil
   C.D.A. McLay, G.S.P. Ritchie 527

81. Efficiency of surface-applied ameliorants for alleviating acidity in two vineyard soil types
   W.J. Conradie 531

82. Diagnosis of maize yield response to lime in some weathered acidic soils
   P.W. Moody, R.L. Aitken, T. Dickson 537

83. Soybean yield and root growth as affected by lime rate and quality
   C.A. Rosolem, S.J. Bicudo, O.M. Marubayashi 543

84. Crop response to amendments on two high manganese soils in southeast Queensland
   T. Dickson, R.L. Aitken, P.W. Moody 549

85. Fertilizer and lime response in acid soils of Sumatra
   C.P. Mamaril, G.O. San Valentin, Erythryna Gustami, Z. Zaini, W.S. Diah 555
86. Response of round-leafed cassia (Cassia rotundifolia) to phosphorus, potassium and lime on ultisol soils in subtropical China
   D.L. Michalk, Huang Zhi-Kai
   561

87. Effect of lime and sulphur on an acid alfisol and yield of cowpea (Vigna unguiculata (L.) Walp.) and sunflower (Helianthus annuus L.) in the semiarid tropics
   H.C. Parvathappa, H. Puttaswamy, T. Satyanarayana
   565

88. Effect of liming an acidic Malaysian Ultisol on element concentrations in the soil solution and element uptake by corn and groundnut
   M. Norhayati, S. Siti Hawa, Mohd Yusoff Mohd Noor
   569

89. Amelioration of acidity in subsurface soil using organic and inorganic calcium compounds
   C.J. Smith, K.M. Goh, W.J. Bond, J.R. Freney, S. Tuomi
   573

90. The effect of different organic materials on the alleviation of Al toxicity in soybean on a red-yellow podzolic soil
   Arnoldus Klau Berek, B. Radjagukguk, Azwar Maas
   579

*91. Effects of organic acid fractions extracted from Eucalyptus camaldulensis leaves on root elongation of maize (Zea mays) in the presence and absence of aluminium
   585

*92. Relationship between soil solution aluminium and low molecular weight organic acids in a conservation cropping system
   W.J. Slattery, G.R. Morrison
   589

93. Evaluation of paper mill lime sludge as an acid soil amendment in Northeast Thailand
   P. Vityakon, S. Seripong
   595

94. Changes in pH of a Florida citrus soil in response to basic slag and calcium hydroxide applications
   Heinz K. Wutscher
   601

95. Long-term plant persistence on highly acidic soils amended with organic materials in two climatic zones
   A.J. Palazzo, C.R. Lee, R. Price
   605

96. Effects of soil amendments on plant growth in pyritic soil
   R.A. Price, C.R. Lee, J.G. Skogerboe
   611

97. Effects of silicic acid on the chemistry of monomeric and polymeric (Al_{13}) aluminium species in solutions
   P.L. Larsen, G.L. Kerven, L.C. Bell, D.G. Edwards
   617

98. Effect of ionic strength on wheat yield in the presence and absence of aluminium
   D.M. Wheeler, D.C. Edmeades
   623

99. Growth of sweet potato (Ipomoea batatas L.) as affected by pH in solution culture
   V.P. Ila'ava, C.J. Asher, F.P.C. Blamey
   627

100. Hydrogen ion inhibition of copper uptake by citrus seedlings
    A.K. Alva, E.Q. Chen
    631
101. Acidity and phosphorus interactions: Some preliminary observations on rhizosphere soil
P. Adamo, A.C. Edwards, M.J. Wilson 635

102. Liming effect of reactive phosphate rocks: A laboratory evaluation
P. Loganathan, M.J. Hedley, S. Saggar 641

103. Use of phosphate rocks for sweet corn production on a Malaysian Ultisol
A.R. Zaharah, H.A.H. Sharifuddin 647

*104. Effect of rock phosphate on soil properties and apparent phosphorus recovery in acid soil of Sumatra
M. Utomo 653

105. Evaluation of soil tests for predicting pasture response on acid soils to phosphate supplied in water
soluble and sparingly soluble forms
S. Saggar, M.J. Hedley, R.E. White, P.E.H. Gregg, K.W. Perrott, I.S. Cornforth 657

SECTION 6: SOCIO-ECONOMIC ASPECTS OF ACID SOIL MANAGEMENT

106. Socio-economic aspects of acid soil management
Emilio F. Moran 663

107. A socio-economic assessment of smallholder maize farming on acid soils in Northern Mindanao,
The Philippines
I.O. Mugot, R.A. Cramb 671

108. Socio-economic aspects of rubber intercropping on acid soils in Southern Thailand
A. Masae, R.A. Cramb 679

109. A socio-economic assessment of land-use practices in a transmigration settlement on acid soils in
South Kalimantan, Indonesia
Masyhuri, R.A. Cramb 685

110. Socio-economic aspects of acid soil management and alternative landuse systems for north eastern
states of India
U.C. Sharma, R.N. Prasad 689

111. Socio-economic considerations in the planning of agroforestry systems for the acid uplands of
northern Vietnam
N.D. Tai, H.D. Nhan, N.T.Yen, D.M. Cameron 697

112. Longevity of liming in western Canada: Soil pH, crop yield and economics
S.S. Malhi, G. Mumey, M. Nyborg, H. Ukrainetz, D.C. Penney 703

113. A group approach to improving understanding of soil acidity
C.J. Hollier 711

114. Marketing soil acidity knowledge in Western Australia
Karen Connell 717
115. Acid soils: A farmer awareness program
   C. Dellavedova

SECTION 7: MANAGEMENT SYSTEMS FOR AGRICULTURE,
HORTICULTURE AND FORESTRY ON ACID SOILS

116. Strategies for the management of soil acidity
   R.J.K. Myers, E. De Pauw

117. Applying information from research on soil acidity through decision support systems
   I.G. Fenton, K.R. Helyar

118. Soil acidification and lime use in some agricultural systems in Queensland, Australia
   P.W. Moody, R.L. Aitken

119. Historical review of liming practices in Hokkaido, Northern Japan
   Mannosuke Saito, Toshio Sakuma

120. Management of acid soils for sustainable food crop production in the Philippines
   C.M. Duque Sr., R.B. Cagmat, N.P. Daquiado, A.R. Maglinao

121. Management of acid soils for opportunity food crop production in southern Thailand
   S. Suthipradit, L. Nualsri, P. Sophanodora, Y. Limchitti, N. Kungpisdan

122. Crop residue management for increasing production of pearl millet on acid sandy soil in Niger, West
   Africa
   H. Marschner, F.-P. Rebafka, H. Hafner, A. Buerkert

123. Acid upland soil in Vietnam and their management for agriculture
   Nguyen Tu Siem, Thai Phien

124. Rock phosphate and minimum tillage for management of acid soil in Sumatra
   M. Utomo, Sunyoto

125. Nitrogen supply from rotational or spatially zoned inclusion of Leguminosae for sustainable maize
   production on an acid soil in Indonesia
   Meine van Noordwijk, S.M. Sitompul, Kurniamum Hairiah, Endang Listyarini, Syekhfani Ms.

126. Soil acidification under nitrogen-fertilised pastures in tropical Australia
   M.A. Gilbert, G. Dickinson, P.W. Moody, D. Cooksley

127. The effects of soil pH on Cd concentration in wheat grain grown in south-eastern Australia
   D.P. Oliver, K.G. Tiller, M.K. Conyers, W.J. Slattery, R.H. Merry, A.M. Alston

128. Acid soil management in orchard soils of the South Western Cape Province, South Africa
   J. Wooldridge, W.A. Kotzé, M.E. Joubert

129. Effect of low soil pH from different fertilisers on performance of apple and pear trees
   J. Thomas Raese
130. Effects of NK fertiliser on soil pH and exchangeable K status on acid soils in an oil palm plantation in Malaysia
   Khan Kiang Kee, Kah Joo Goh, Poh Soon Chew 809

131. Aluminium species and pH in soil solution under different crops
   R.L. Parfitt, H.J. Percival, G. van der Lee 817
