Ryszard Engelking

Theory of Dimensions
Finite and Infinite

Heldermann Verlag

Contents

Preface	vii
Chapter 1: Dimension theory of separable metric spaces	
1.1 Definition of the small inductive dimension	2
1.2 The separation and enlargement theorems for dimension 0	8
1.3 The sum, Cartesian product, universal space, compactification and embedding theorems for dimension 0	15
1.4 Various kinds of disconnectedness	24
1.5 The sum, decomposition, addition, enlargement, separation and Cartesian product theorems	31
1.6 Definitions of the large inductive dimension and the covering dimension. Metric dimension	40
1.7 The compactification and coincidence theorems. Characterization of dimension in terms of partitions	47
1.8 Dimensional properties of Euclidean spaces and the Hilbert cube. Infinite-dimensional spaces	56
1.9 Characterization of dimension in terms of mappings to spheres. Cantor-manifolds. Cohomological dimension	69
1.10 Characterization of dimension in terms of mappings to polyhedra	79
1.11 The embedding and universal space theorems	94
1.12 Dimension and mappings	106
1.13 Dimension and inverse sequences of polyhedra	114
1.14 Axioms for dimension	123
Chapter 2: The large inductive dimension	
2.1 Hereditarily normal and strongly hereditarily normal spaces	127
2.2 Basic properties of the dimension Ind in normal and hereditarily normal spaces	133
2.3 Basic properties of the dimension Ind in strongly hereditarily normal spaces	144
2.4 Relations between the dimensions ind and Ind . Cartesian product theorems for the dimension Ind . Dimension Ind and mappings	155
Chapter 3: The covering dimension	
3.1 Basic properties of the dimension dim in normal spaces. Relations between the dimensions ind , Ind and dim	168
3.2 Characterizations of the dimension dim in normal spaces	182
3.3 Dimension dim and mappings	193

3.4	The compactification, universal space and Cartesian product theorems for the dimension \dim . Dimension \dim and inverse systems of compact spaces	205
Chapter 4: Dimension theory of metrizable spaces		
4.1	Basic properties of dimension in metrizable spaces	217
4.2	Characterizations of dimension in metrizable spaces. The universal space theorems	228
4.3	Dimension and mappings in metrizable spaces	240
Chapter 5: Countable-dimensional spaces		
5.1	Definitions and characterizations of countable-dimensional and strongly countable-dimensional spaces	253
5.2	Basic properties of countable-dimensional and strongly countable-dimensional spaces	261
5.3	The compactification and universal space theorems for countable-dimensional and strongly countable-dimensional spaces	271
5.4	Countable dimensionality and mappings	280
5.5	Locally finite-dimensional spaces	288
Chapter 6: Weakly infinite-dimensional spaces		
6.1	Definition and basic properties of weakly infinite-dimensional spaces	300
6.2	An example of a totally disconnected strongly infinite-dimensional space	312
6.3	Weak infinite dimensionality and mappings	316
Chapter 7: Transfinite dimensions		
7.1	Definitions and basic properties of the transfinite dimensions trind and trInd	325
7.2	The separation, sum, enlargement, completion and universal space theorems for the transfinite dimensions trind and trInd	338
7.3	Transfinite dimensions trker and trdim	351
