Global Surgery Formula for the Casson-Walker Invariant

by

Christine Lescop
Table of contents

Chapter 1: Introduction and statements of the results 5

§1.1 Introduction
§1.2 Conventions
§1.3 Surgery presentations and associated functions
§1.4 Introduction of the surgery formula F
§1.5 Statement of the theorem
§1.6 Sketch of the proof of the theorem and organization of the book
§1.7 Equivalent definitions for F

Chapter 2: The Alexander series of a link in a rational homology sphere and some of its properties 21

§2.1 The background
§2.2 A definition of the Alexander series
§2.3 A list of properties for the Alexander series
§2.4 Functions of the linking numbers of a link
§2.5 The first terms of the Alexander series

Chapter 3: Invariance of the surgery formula under a twist homeomorphism 35

§3.1 Introduction
§3.2 Variation of the different pieces of $F_M$ under an $\omega$-twist: the statements
§3.3 Proofs of 3.2.13 and 3.2.16
§3.4 More linking functions: semi-open graphs and functions $\alpha$
§3.5 Variation of the $\zeta$-coefficients under an $\omega$-twist
§3.6 Proof of 3.2.11 (variation of the piece containing the $\zeta$-coefficients under the $\omega$-twist)

Chapter 4: The formula for surgeries starting from rational homology spheres 60

§4.1 Introduction
§4.2 Sketch of the proof of Proposition T2
§4.3 Proof of Lemma 4.2.2
§4.4 Proof of Lemma 4.2.3
§4.5 Proof of Lemma 4.2.5
§4.6 The Walker surgery formula
§4.7 Comparing $T_2$ with the Walker surgery formula  

Chapter 5: The invariant $\lambda$ for 3-manifolds with nonzero rank  
§5.1 Introduction  
§5.2 The coefficients $a_1$ of homology unlinks in rational homology spheres (after Hoste)  
§5.3 Computing $\lambda$ for manifolds with rank at least 2  

Chapter 6: Applications and variants of the surgery formula  
§6.1 Computing $\lambda$ for all oriented Seifert fibered spaces using the formula  
§6.2 The formula involving the figure-eight linking  
§6.3 Congruences and relations with the Rohlin invariant  
§6.4 The surgery formula in terms of one-variable Alexander polynomials  

Appendix: More about the Alexander series  
§A.1 Introduction  
§A.2 Complete definition of the Reidemeister torsion of $(N,o(N))$ up to positive units  
§A.3 Proof of the symmetry property of the Reidemeister torsion  
§A.4 Various properties of the Reidemeister torsion  
§A.5 A systematic way of computing the Alexander polynomials of links in $S^3$  
§A.6 Relations with one-variable Alexander polynomials
