EUROPEAN SPACE AGENCY
PROGRAMME ADVISORY COMMITTEE
ON THE SPECIAL PROJECT
CONCERNING THE LAUNCHING OF
SOUNDING ROCKETS

12th ESA Symposium on
European Rocket and Balloon Programmes
and Related Research

LILLEHAMMER, NORWAY
29 MAY - 1 JUNE 1995
CONTENTS

WELCOME AND NATIONAL REPORTS
(Chair: A. Gundersen & T.A. Blix)

Opening remarks
A. Gundersen (Norway) 3

Welcome speech
N.C. Ihlen, Senior Executive Officer, The Ministry of Industry and Energy (Norway) 5

Welcome speech
G. Seibert, Head of Microgravity Department (ESA/HQ, Paris) 7

The German scientific balloon and sounding rocket programme
A.F. Dahl, W.R. Kübler & O. Röhrig (Germany) 9

Swiss scientific balloon and sounding rocket experiments 1993-1995
E. Kopp & D. Huguenin (Switzerland) 17

The French balloon programme
I. Sadourny (France) 23

The Swedish sounding rocket and balloon programme
K. Lundahl (Sweden) 29

ISAS sounding rocket activities in 1994 and 1995
M. Hinada et al., presented by J. Kawaguchi (Japan) 35

The Canadian space science programme
J.G. Rumbold (Canada) 41

The Norwegian balloon and sounding rocket programme
R. Skatteboe (Norway) 47

MESOSPHERE AND LOWER THERMOSPHERE
(Chair: E. Kopp & F.J. Lübken)

The role of charged aerosols in connection with noctilucent clouds and polar mesosphere summer echoes
T.A. Blix, E.V. Thrane, J. Tröm & U.-P. Hoppe 55

Simultaneous measurements of noctilucent clouds, polar mesosphere summer echos, and the temperature near the mesopause
F.J. Lübken, K.-H. Fricke, M. Langer et al. 61
First results of mesospheric structures and dynamics observed with the ALOMAR SOUSY radar
R. Rüster, P. Czechowsky, P. Hoffmann & W. Singer

PMSE observations with the ALOMAR-SOUSY radar and the EISCAT VHF radar during summer 1994
P. Hoffmann, J. Bremer, W. Singer et al.

Application of the Rayleigh-lidar technique to observations of noctilucent clouds
M. Langer, K.P. Müller, K.H. Fricke et al.

First positive ion depletion in a noctilucent cloud and its implication on the particle size distribution
F. Balsiger, E. Kopp & M. Friedrich

Electrical structure and E-fields in the high-latitude mesosphere
J.D. Mitchell, D.J. Walter, C.L. Croskey et al.

Density and temperature measurements in the lower thermosphere with the CONE instrument
J. Giebeler & F.-J. Lübben

Visual and lidar observation of rocket-induced effects in the upper atmosphere above Andøya on January 25, 1995
K.H. Fricke, K.-P. Müller, M. Langer et al.

MALTED: a rocket/radar study of dynamics and turbulence in the equatorial mesopause region
R.A. Goldberg, M. Friedrich, G.A. Lehmacher et al.

Rocket measurements of oxygen, OH and continuum airglow

Hygrosonde: direct measurement of water vapour in the mesosphere
M. Khaplanov, V. Yashkov, G. Kokin et al.

The heating efficiency of the triplet channel of ozone photodissociation including \( \text{O}_2(v) \)
G. Koppers

A comparison of measured and modelled non-LTE radiations in the upper atmosphere
K. Vollmann, K.U. Grossmann, A. Stepanovich et al.

Rocket-borne measurements and modeling of high-latitude winter mesospheric minor constituents
A.J. Ratkowski, R.H. Picard, J.R. Winick et al.

Poster
Some ground-based truth measurements of hydroxyl airglow conducted in support of the CRISTA experiment conducted during STS-66 (November 1994)
A.J. Ratkowski, R.H. Picard, R.J. Huppi et al.
MICROGRAVITY
(Chair: G. Seibert)

Study of the continuous flow electrophoresis process: a sounding rocket programme
H. Roux-de Balman, V. Sanchez & F.J. Changeart

Cell biology on sounding rockets — Report on CIS-3 and CIS-4 flights
and preparations for CIS-5

The scientific interface of MITE-2 experiment on Texus 32
F.M. Sacerdoti

INEX-MAM: a flexible, interactive facility for fluid science experimentation
on board sounding rockets
R. Monti, R. Fortezza, G. Desiderio & G. Capuano

The solutal Marangoni effect module on the Maser 6 sounding rocket

‘GIZERO’ microgravity project using stratospheric balloon — technological solution
O. Cosentino, D. Spoto & G. Rum

ESA participation in the European sounding rocket projects — an overview
S. Debouzy & W. Herfs

Poster
Development of a microwave oven for materials processing and crystal
growth on sounding rockets
R.H. Huijser, J.R.M. Scholten, R.J. Postema & R. Schelling

IONOSPHERE/MAGNETOSPHERE
(Chair: A. Brekke & S. Kirkwood)

Results from Japanese sounding rocket experiments from Andøya
K. Tsuruda et al.

PULSAUR II: a sounding rocket project to study pulsating aurora and
related phenomena
K. Måseide, F. Søraas, K. Aarsnes et al.

PULSAUR II: rocket and ground-based measurements in a pulsating aurora
F. Søraas, K. Aarsnes, J. Bjordal et al.

PULSAUR II: observations of aurora and bremsstrahlung — X-rays in a pulsating aurora
J. Stadsnes, K. Aarsnes, J. Bjordal & F. Søraas
PULSAUR II: ionospheric electron density and temperature measurements above a pulsating aurora
K.R. Svenes, B.T. Narheim & J. Trøim

ENA observations in an aurora
F. Saraas & K. Aarsnes

An attempt to parameterise negative ions in the ionospheric D-region
M. Friedrich & K.M. Torkar

Effective recombination coefficients in the D- and E-regions during auroral absorption events
A. Osepian, S. Kirkwood & N. Smirnova

Anomalous E-region ion layers in twilight conditions. Experiment and model
N. Smirnova, S. Kirkwood & A. Osepian

The microsatellite Astrid
O. Norberg, S. Barabash, I. Sandahl et al.

Opportunities for correlated ground and satellite observations during the NISSE mission
K.R. Svenes & J. Moen

Resonance cone diagnostics of electron density and temperature in the equatorial ionosphere over India
V. Rohde, C. Steigies, A. Piel et al.

Gradient drift waves at the edge of the equatorial electrojet over Shar phenomena
H. Thiemann, V. Rohde, A. Piel et al.

STRATOSPHERE
(Chair: N. Papineau & C. Camy-Peyret)

The SESAME balloon campaign — second European stratospheric Arctic and mid-latitude experiment
P. Faucon

Ground-based measurements of stratospheric OCIO, NO₂ and O₃ at Harestua, Norway (60°N, 10°E) during SESAME
M. Van Roozendael, C. Hermans, Y. Kabbadj et al.

The state of the stratospheric aerosol at the Arctic Circle above Andøya during winter 1994/1995

DESCARTES: tracer measurements with a lightweight balloon-borne instrument
F. Danis, N.R.P. Harris, W.H. Taylor et al.
The LPMA balloon-borne FTIR spectrometer for remote sensing of atmospheric constituents
C. Camy-Peyret, P. Jeseck, T. Hawat et al.

The long-duration ‘MIR’ balloon
P. Malaterre, V. Dubourg, G. Leterenne & M. Durand

Differential absorption lidar measurements of stratospheric ozone at ALOMAR: first results
U.-P. Hoppe, G. Hansen & D. Opsvik

Balloon campaigns at Kiruna-Esrange planned in ILAS correlative measurements programme
H. Kanzawa, Y. Kondo, C. Camy-Peyret & Y. Sasano

Formation of ozone laminae at the edge of the Arctic polar vortex
Y.J. Orsolini

The STRATÉOLE experiment project
F. Vial, A. Babiano, C. Basdevant et al.

Numerical wind analysis due to topography
N. Kubberud

Poster
SESAME balloon campaign in Russia
D. Shifrin

NEW TECHNOLOGIES AND FUTURE ACTIVITIES
(Chair: K. Adolfsen, K. Zdarsky & S. Kemi)

The ALOMAR facility: status and outlook
U. von Zahn, E.V. Thrane & R. Skatteboe

Modern technologies employed in the ALOMAR Rayleigh/Mie/Raman lidar
G. Von Cossart, J. Fiedler, U. von Zahn et al.

Alexandrite lasers for temperature sounding of the sodium layer
S. Schmitz, U. von Zahn, J.C. Walling & D. Heller

Mesopause temperature profiling by potassium lidar: recent progress and outlook for ALOMAR
J. Höffner & U. von Zahn

The ALOMAR-SOUSY radar: technical design and further developments
W. Singer, D. Keuer, P. Hoffmann et al.

Mesosphere stratosphere troposphere radar at Esrange
L. Marcus
A high-altitude tethered balloon
J. Rand, D.A. Grant & J.R. Crenshaw

Over-pressurized balloon system with pumpkin shape
J. Nishimura & K. Yoshida

Virtual ballast
J.L. Rand, D.A. Grant & J.R. Crenshaw

Unification of Raven and Winzen creates new opportunities for balloon development and manufacturing
L. Seely, T. Lachenmeier, M. Smith et al.

Description and performances of a balloon-borne heliostat for solar absorption measurements
T. Hawat, C. Camy-Peyret, P. Jeseck & R. Torguet

Les fusées-sondes pour le programme spatial brésilien
J. Boscov

Rocket systems for meteorological and upper atmospheric soundings
D.J. Krause

Guidance and control systems manufactured by SAAB Ericsson Space
L. Hall

General-purpose rocket instrumentation and payload system — GRIPS — flight results and current developments
W. Gabriel, P. Turner, K.-H. Zdarsky et al.

On the flight verification of the hyperbolic re-entry capsule via the sounding rocket
M. Hinada, J. Kawaguchi, Y. Inatani et al.

Valve regulation of cryogenic rocket engine through high-speed and high-accuracy polarimetric optical fibre rotation sensor
N. Mancier, A. Chakari, P. Meyrueis & M. Clément

Flight safety programs and enhancements for sounding rockets at Wallops flight facility
D. Balach

GPS in balloon activities. New applications
A. Carlier

The pointing- and the star-reference system of the MIPAS-B2 gondola
Part 1: the pointing system
M. Seefeldner & C. Keim

The pointing- and the star-reference system of the MIPAS-B2 gondola
Part 2: the star-reference system
G. Maucher
The PERSEUS and THESEUS robotic aircraft for European research
J.S. Langford

A rocket-borne rayleigh lidar experiment in the middle atmosphere
T. Eriksen, U.-P. Hoppe, E.V. Thrane & T.A. Blix

PULSAUR II: a versatile rocket payload for studying pulsating aurora
S. Njaastad, F. Saraas & A. Søreide

SVAL-RAK: new sounding rocket launch facility at Ny-Ålesund, Svalbard
R. Skatteboe

Integrated launching facilities for high-flying sounding rockets
K. Bøen

13-meter tracking antenna for sounding rocket and satellite data reception
P.E. Olsen

Posters:
Balloon flight test for descent and recovery qualification of A.R.D. capsule
M.C. Falvella, O. Cosentino, A. Leonardi et al., presented by O. Cosentino

A balloon-borne differential absorption spectrometer with temperature-stabilized detector
M. Gil, J. Iglesias, J. Ramón et al., presented by J. Iglesias-Mendez
