Desired Future Conditions for Piñon-Juniper Ecosystems

August 8-12, 1994
Flagstaff, Arizona

Technical Coordinators:
Douglas W. Shaw
USDA Forest Service
Southwestern Region

Earl F. Aldon
USDA Forest Service (Retired)
Rocky Mountain Station

Carol LoSapio
USDA Forest Service
Rocky Mountain Station
Contents

Welcoming and Opening Remarks
Jose Salinas and Chip Cartwright ................................................................. 1

Western Juniper Woodlands: 100 Years of Plant Succession
Rick Miller, Jeffrey Rose, Tony Svejcar, Jon Bates, and Kara Paintner .............. 5

Soil Loss in Piñon-Juniper Ecosystems and Its Influence on Site Productivity and Desired Future Condition
Malchus B. Baker Jr., Leonard F. DeBano, and Peter F. Ffolliott ....................... 9

Plant Species Composition Patterns with Differences in Tree Dominance on a Southwestern Utah Piñon-Juniper Site
Robin J. Tausch and Neil E. West ............................................................... 16

Acid and Alkaline Phosphatase Dynamics in Soils of a Piñon-Juniper Woodland
Susanne Krämer ......................................................................................... 24

Environmental Stress Influences Aboveground Pest Attack and Mycorrhizal Mutualism in Piñon-Juniper Woodlands: Implications For Management in the Event of Global Warming
Catherine Gehring and Thomas Whitham ..................................................... 30

Stand Dynamics on Upper Elevation Piñon-Juniper Watersheds at Beaver Creek, Arizona
Gerald J. Gottfried and Peter F. Ffolliott ...................................................... 38

Preliminary Results of Decomposition and Cellulose Degradation Along an Environmental Gradient in Northern Arizona
Carole Coe Klopatek, Kenneth L. Murphy, Julie Rosen, John R. Obst, and Jeffrey M. Klopatek ................................................................. 46

Deer, Small Mammal, and Songbird Use of Thinned Piñon-Juniper Plots: Preliminary Results
Steven K. Albert, Nelson Luna, and Albert L. Chopito ..................................... 54

Relationships Among Plant Species Composition and Mule Deer Winter Range Use on Eastern Nevada Piñon-Juniper Chainings
Robin J Tausch and Paul T. Tueller ............................................................. 65

Characteristics of Piñon-Juniper Habitats Selected for Feeding by Wintering Merriam’s Turkey
Brian F. Wakeling and Timothy D. Rogers .................................................. 74

Wildlife Associations in Rocky Mountain Juniper in the Northern Great Plains, South Dakota
Mark A. Rumble and John E. Gobeille ......................................................... 80

Effects of Fuelwood Harvesting on Small Mammal Populations in a Piñon-Juniper Woodland
William H. Kruse ....................................................................................... 91
Cone and Seed Insects Associated with Piñon Pine
Jose F. Negron ................................................................. 97

Insect and Disease Associates of the Piñon-Juniper Woodlands
Terrence J. Rogers .......................................................... 107

Hydrology and Ecology of Piñon-Juniper Woodlands: Conceptual Framework and Field Studies
Bradford P. Wilcox and David D. Breshears ......................... 109

Understory Production and Composition in Piñon-Juniper Woodlands in New Mexico
Rex D. Pieper ................................................................. 120

A Checklist for Ecosystem Management in Southwestern Piñon-Juniper
Earl F. Aldon, Reggie Fletcher, and Doug Shaw ..................... 125

Woodland Inventory Procedures and Analyses Conducted for Management Planning Purposes on Indian Lands
John Waconda ................................................................. 130

Sid Goodloe ................................................................. 136

"Can't We All Just Get Along"
Jon S. Bumstead ............................................................. 141

Responding to Tribal Voices in Managing Woodland Resources
Ronald K. Miller ............................................................. 146

The Capulin Piñon-Juniper Ecosystem Management Project The Archaeological and Ecological Components
John C. Phillips and Martha D. Yates Ph.D ............................. 153

Community Based Piñon-Juniper Woodland Resource Management Planning for the Nahat’aa’ Dziil Chapter
Usha Little and Denver Hospodarsky .................................. 160

An Overview Of Woodland Projects Incorporated At Four Pueblos In New Mexico
Buff Jebsen-Ross and Richard Schwab ................................. 168

The Effects of Fire on Cultural Resources Mesa Verde National Park, Colorado
Kathleen Fiero ............................................................... 176

Western Juniper: An Evolving Case Study in Commercialization, Ecosystem Management, and Community Development
Larry Swan ................................................................. 179

Tres Piedras Piñon-Juniper Silviculture: A Partnership Project Between the USDA Forest Service and New Mexico State University
John T. Harrington, Jim Fitch, and Patrick A. Glass .................. 184
Piñon Pine Seed Production, Collection, and Storage
   Richard M. Jeffers................................................................. 191

Carrizo Demonstration Area Restoration of a Southwest Forest Ecosystem
   Richard S. Edwards ............................................................... 198

Silvicultural Systems for Piñon-Juniper
   James R. Ellenwood ............................................................. 203

Trial Applications of Low-Impact Herbicides for Piñon-Juniper Control in
   the Southwest
   Douglas Parker, Max Williamson, Richard Edwards, and Russell Ward...... 209

Piñon-Juniper Fuelwood Markets in the Southwest
   Lawrence A. Schmidt ................................................................ 214

Ecosystem Management Research in an “Old Growth” Piñon-Juniper
   Woodland
   William H. Kruse and Hazel M. Perry ........................................ 219

The Composition of Oils in Pinus edulis
   Michael Blair, Telletha Valenski, Andrew Sykes, Russell Balda, and
   Gerald Caple ............................................................................ 225
