Periodicity and Stochastic Trends In Economic Time Series

Philip Hans Franses

OXFORD UNIVERSITY PRESS
1996
Contents

List of abbreviations xi

1. Introduction 1

2. Concepts in time series analysis 4
   2.1 Univariate time series models 4
   2.2 Multivariate time series models 15
   2.3 Unit roots in univariate time series 17
   2.4 Unit roots in multivariate time series 23

3. An introduction to seasonal time series 32
   3.1 Characteristics of seasonal time series 32
   3.2 Univariate time series aspects 40

4. Seasonal adjustment 49
   4.1 Seasonal adjustment methods 50
   4.2 Evaluating seasonally adjusted data 54

5. Seasonal integration and cointegration 61
   5.1 Seasonal integration 62
   5.2 Seasonal cointegration 73
   Appendix 78

6. Are seasons, trends, and cycles always independent? 79
   6.1 Correlation between seasonal and nonseasonal components 80
   6.2 Business cycles and changes in seasonal patterns 84
   6.3 Seasonality in consumer confidence 88

7. Periodic autoregressive time series models 92
   7.1 Notation and representation 93
   7.2 Stationarity in periodic autoregression 98
   7.3 Estimation and model selection 101
Contents

7.4 Effects of neglecting periodicity 117
7.5 Multivariate periodic autoregression 123

8. Periodic integration 126

8.1 Testing for unit roots in periodic autoregression 127
8.2 Periodic integration 150
8.3 Effects of nonperiodic analysis 166

9. Periodic cointegration 177

9.1 Representation of periodic VAR models 178
9.2 Common aspects in periodic integration 181
9.3 Periodic cointegration 193
9.4 Seasonal variation in business cycles 207

10. Conclusion 211
