Technical Papers

OODB Issues

Schema Integration Meta-knowledge Classification and Reuse . . 1
R.M. Duwairi, N.J. Fiddian, W.A. Gray (UK)

View Mechanism for Schema Evolution in Object-Oriented DBMS 18
Zohra Bellahsene (FRANCE)

An Active Rule Language for ROCK and ROLL ............... 36
Andrew Dinn, Norman W. Paton, M. Howard Williams,
Alvaro A.A. Fernandes (UK)

Integrity Issues

Integrity Constraints in Multiversion Databases ............. 56
Anne Doucet, Stéphane Gançarski, Geneviève Jomier,
Sophie Monties (FRANCE)

The Development of a Semantic Integrity Constraint Subsystem
for a Distributed Database ............................... 74
H. Ibrahim, W.A. Gray, N.J. Fiddian (UK)

Understanding the Tension Between Transition Rules and
Confidentiality ............................................. 92
Xavier C. Delannoy (FRANCE)

SPEAR: Extending ER for Dynamic Behaviour and Refinement 107
Simon Wiseman, Bryony Pomeroy (UK)
Optimisation/Performance Issues

Speeding up Knowledge Discovery in Large Relational Databases by Means of a New Discretization Algorithm .......................... 124
Alex Alves Freitas, Simon H. Lavington (UK)

Integration of Load Measurement Parameters into the Cost Evaluation of Database Queries .......................... 134
Guntram Flach, Holger Meyer (GERMANY)

High Performance OO Traversals in Monet .......................... 152
Peter A. Boncz, Fred Kwakkel, Martin L. Kersten (NETHERLANDS)

Language Issues

A Modular Compiler Architecture for a Data Manipulation Language ................................................. 170
Suzanne M. Embury, Peter M.D. Gray (UK)

Querying Graph Databases Using a Functional Language Extended with Second Order Facilities .......................... 189
Robert Ayres, Peter J.H. King (UK)

SQL+i: Adding Temporal Indeterminacy to the Database Language SQL ................................................. 204
Antony Griffiths, Babis Theodoulidis (UK)

Invited Papers

Full Paper

Pearls, Swines and Sows’ Ears: Interface Research Inside a Multinational Bank ......................................... 222
Matthew Chalmers (Ubilab, Zürich)

Abstract

Dissemination-Based Information Systems: Your Data May Be Where You Least Expect It ................................................. 230
Stanley B. Zdonik (Brown University, USA)
Abstracts of Industrial Papers

Microsoft Database Technologies – An Inside View .......... 231
Nigel Stanley (ICS)

Predicate Maintained Queries: An Active OODBMS For Financial Applications ............................................ 232
Mark Butterfield, Nicholas Caine, Stephen Ross-Talbot
(Nomura Research Institute)

Universal Data Management ........................................... 233
A. Bailey, (Oracle)
