Preface

Original Call for Papers

Schedule of Presentations

Disjunctive Deductive Databases

Charli F. Obimbo, E. Bruce Spencer: Access Clause Trees in Disjunctive Deductive Databases

Peter Baumgartner, Ulrich Furbach: Hyper Tableaux and Disjunctive Logic Programming

Query Optimization

Ulrich Zukowski, Burkhard Freitag: The Differential Fixpoint of General Logic Programs

Parke Godfrey, Jarek Gryz: A Framework for Intensional Query Optimization

J. Aldana, J. Troya: Data Flow Evaluation of Datalog Queries

Advanced Concepts

Carl-Alexander Wichert, Burkhard Freitag: Logical Specification of Bulk Updates and Sequential Updates

Heinrich Herre, Gerd Wagner: Temporal Deductive Databases

Riccardo Rosati: On the complexity of reasoning with negation as failure

Applications

P. Asirelli, S. Cook, K. Jeffery: A Logic Database for Validating System Models

M. Carboni, A. Di Deo, F. Giannotti, M.V. Masserotti: Spatio-Temporal Reasoning with LDLT: first steps towards a deductive system for geographical applications
