Interfaces to Databases (IDS-3)

Proceedings of the 3rd International Workshop on Interfaces to Databases, Napier University, Edinburgh, 8-10 July 1996

http://www.springer.co.uk/eWiC/Workshops/IDS3.html

Published in collaboration with the British Computer Society

Springer
Contents

Interface Design: More Craft than Science? (Invited Paper)
M. Chalmers (Ubilab, Union Bank of Switzerland, Zürich) ...................... 1

Exploitation of Object-Oriented and Active Constructs in Database Interface Development
N.W. Paton, K. Doan, O. Diaz and A. Jaime ........................................... 1

A Graphical User Interface to the Object-Oriented Database System VODAK on the Basis of the Generic Visualisation Toolkit Lyberworld
T. Schweickert and M. Hemmje .............................................................. 2

Desktop Objects: Directly Manipulating Data and Meta Data
A. Kadyamatimba, J.A. Mariani and P. Sawyer ....................................... 2

DRIVE: An Environment for the Organised Construction of User-Interfaces to Databases
K. Mitchell and J. Kennedy ................................................................. 3

A Survey of Query Languages for Geographic Information Systems
M.-A. Aufaure-Portier and C. Trépied ................................................... 3

Comparative Ease of Use of a Diagrammatic vs. an Iconic Query Language
A.N. Badre, T. Catarci, A. Massari and G. Santucci .............................. 4

Visionary: A Visual Query Language Based on the User Viewpoint Approach
F. Benzi, D. Maio and S. Rizzi ............................................................. 4

VR Queries and Their Transformations in a Progressive Querying Environment
S.K. Chang, M.F. Costabile and M. Vairo ............................................. 5
LibSearch: A Window-Based Front-End to Remote Bibliographic Databases on the Internet
E.-P. Lim and S.-Y. Cheng ................................................................. 5

Hypertabular Representations of Database Relations in World Wide Web Front-Ends
L. Tarantino .................................................................................... 6

TOTEM: An Interactive Tool for Creative Data Modelling
A. Crerar, P.J. Barclay and R. Watt ...................................................... 6

The Use of the Data Dictionary in DBMS Based on Graphs
M. Gemis ....................................................................................... 7

Dynamic Maps: An Intuitive Interface for Naive Users of Spatial Database Systems
M. Dhouk, D. Kvedarauskas and P. Boursier ........................................ 7

Visualising Large Data Sets in Molecular Biology
J. Boyle, H. Horch and M. Scharf ....................................................... 8

Abstracts of Poster Presentations*

* Abstracts of Poster Presentations are available on the World Wide Web Site, but are not included in this booklet.
