SEISMIC SOURCE SIGNATURE
ESTIMATION AND MEASUREMENT

Edited by
Osman M. Osman
Enders A. Robinson

Series Editor
Daniel A. Ebrom

Geophysics reprint series
No. 18
Contents

Chapter 1—Introduction
O. M. Osman and E. A. Robinson  
1

Chapter 2—Statistical approach
Seismic time-invariant convolutional model
E. A. Robinson  
15

Estimation of the primary seismic pulse
R. E. White and P. N. S. O’Brien  
18

Robust wavelet estimation by structural deconvolution
D. Stone  
28

A statistical approach to the extraction of the seismic propagating wavelet
G. P. Angeleri  
53

Recursive removal and estimation of minimum-phase wavelet
M. A. Alam and C. J. Sicking  
97

Wavelet estimation and deconvolution
D. W. Oldenburg, S. Levy, and K. P. Whittall  
119

Applications of median filtering to deconvolution, pulse estimation, and statistical editing of seismic data
J. B. Bednar  
132

An examination of the exponential decay method of mixed-phase wavelet estimation
G. D. Lazear  
147

Deconvolution of noisy seismic data—A method for prestack wavelet extraction
B. J. Newman  
159

Wavelet estimation from noisy data
M. S. Maklad, J. A. Rodriguez, and A. J. Dilay  
165

Wavelet estimation using the multitaper method
A. T. Walden  
176

Mixed-phase wavelet estimation using fourth-order cumulants
G. D. Lazear  
179

Wavelet estimation by exponential decay
M. T. Tamer and L. Lu  
196

Adaptive minimum prediction-error deconvolution and source wavelet estimation using Hopfield neural networks
L.-X. Wang and J. M. Mendel  
204
Chapter 3—Phase unwrapping and decomposition methods

Chapter 4—Inversion approach
Source signature determination from ministreamer data
*M. Landrø, J. Langhammer, R. Sollie, L. Amundsen, and E. Berg*

**Chapter 5—Deterministic approach**

The signature of an air-gun array: Computation from near field measurements including interactions
*A. Ziolkowski, G. Parkes, L. Hatton, and T. Haugland*

The signature of an air gun array: Computation from near field measurements including interactions—practical considerations
*G. Parkes, A. Ziolkowski, L. Hatton, and T. Haugland*

Far-field signatures by wavefield extrapolation
*N. D. Hargreaves*

Post-critical wavelet estimation and deconvolution
*P. G. Kelamis and E. F. Chiburis*

Use of near-field measurements to compute far-field marine source signatures—evaluation of method
*M. Landrø, S. Strandenes, and S. Vaage*

Determination of the signature of a dynamite source using source scaling, Part 1: Theory
*A. Ziolkowski*

Determination of the signature of a dynamite source using source scaling, Part 2: Experiment
*A. Ziolkowski and K. Bokhorst*

**Chapter 6—Wavelet extraction from seismic and well data**

Extraction of signatures from seismic and well data
*V. Danielson and T. V. Karlsson*

Wavelets, well logs and Wiener filters
*L. R. Lines and S. Treitel*

Seismic wavelet estimation using well control
*D. Nyman, M. J. Parry and R. D. Knight*

Wavelet analysis using well log information
*V. Richard and J. Brac*

Net downgoing energy and the minimum-phase property of downgoing waves
*E. A. Robinson and S. Treitel*

The spectral function of a layered system and the determination of the waveforms at depth
*E. A. Robinson and S. Treitel*

Detailed reservoir definition by integration of well and 3-D seismic data using space adaptive wavelet processing
*E. Poggiagliolmi and R. D. Allred*
