

H. Sandermann A.R. Wellburn R.L. Heath (Eds.)

Forest Decline and Ozone

A Comparison of Controlled Chamber and Field Experiments

With 77 Figures, 12 in Color and 22 Tables

Springer

Contents

1	Ozone Formation, Destruction and Exposure in Europe and the United States W.R. Stockwell, G. Kramm, H.-E. Scheel, V.A. Mohnen and W. Seiler	1
1.1	Introduction	1
1.2	The Chemistry of Tropospheric Ozone Formation	4
1.3	Urban Ozone Formation and Transport to Mountain Sites	10
1.4	Meteorological Effects on Tropospheric Ozone Concentrations	11
1.5	Ozone Networks and the Analysis of Measurements	14
1.6	The Global Distribution of Ozone Concentrations and the Seasonal Cycle	17
1.7	Long-Term Trends in Tropospheric Ozone Concentrations	18
1.8	Present Ozone Concentrations and Ozone Exposure over Europe and North America	24
1.9	Dry Deposition of Ozone	27
1.10	Conclusions	31
	References	32
2	Ozone and Its Known and Potential Effects on Forests in Western United States P.R. Miller, M.J. Arbaugh and P.J. Temple	39
2.1	Introduction	39
2.2	Spatial Distribution and Temporal Trends of Ozone in Relation to Geographic Setting and Summer Climate	40

2.2.1	Daily Patterns of Ozone Concentrations in Rural Mountain Locations	42
2.2.2	Spatial Variation of Ozone in the Sierra Nevada and San Bernardino Mountains	42
2.2.3	Temporal Trends of Ozone and the Outlook for the Future	42
2.3	History of Ozone Damage to Californian Forests .	43
2.3.1	Field Identification of Ozone Injury	43
2.3.2	Role of Other Biotic and Abiotic Stresses	44
2.3.3	Crown Changes Associated with Chronic Ozone Injury	45
2.3.4	Spatial Distribution and Temporal Changes of Ozone Damage	45
2.3.4.1	Southern California	45
2.3.4.2	Sierra Nevada	47
2.4	Experimental Exposures of Western Conifers to Ozone	48
2.4.1	Foliar Injury Symptomatology	48
2.4.2	Physiological Responses: Gas Exchange and Photosynthesis	50
2.4.3	Growth Responses of Seedlings and Saplings	52
2.5	Effects of Chronic Ozone Exposure on Radial Growth in the Sierra Nevada and San Bernardino Mountains	53
2.5.1	Seasonal Radial Growth Responses	55
2.5.2	Long-Term Radial Growth Responses	55
2.5.2.1	Direct Effects of Ozone on Radial Growth	55
2.5.2.2	Effects of Ozone Together with Climate on Tree Growth	57
2.5.3	Relationship Between Needle Retention and Radial Growth Reductions	57
2.5.4	Development and Composition of Ozone-Exposed Forests Under Euro-American Settlement Influences	58
2.5.4.1	Chronic Ozone Injury and Mortality of Pines Due to Bark Beetle	58
2.5.4.2	Ozone Influences on Recruitment and Mortality of Ponderosa Pine Seedlings	60
2.5.5	Status of Models for Simulating Ozone Effects on Tree Growth and Stand Development	60
2.6	Summary	61
	References	63

3	Ozone and Its Known and Potential Effects on Forests in Eastern United States J.M. Skelly, A.H. Chappelka, J.A. Laurence and T.S. Fredericksen	69
3.1	Introduction	69
3.2	Recent Findings from Northeastern Forests	71
3.3	Recent Findings from Northcentral Pennsylvania	73
3.4	Recent Findings from the Shenandoah National Park, Virginia	76
3.5	Recent Findings from Southern United States	80
3.6	Recent Findings from Great Smoky Mountains National Park	86
3.7	General Conclusions	86
	References	88
4	Ozone and the Forests in Austria and Switzerland R. Matyssek, W.M. Havranek, G. Wieser and J.L. Innes	95
4.1	Introduction	95
4.2	O ₃ Levels and Areas at Risk in the Alps of Central Europe	96
4.3	Tree Responses to O ₃ Levels at Forest Sites	98
4.3.1	Experimental O ₃ Exposure of Twigs of Mature Norway Spruce and European Larch Trees in Austrian Forests	98
4.3.1.1	Study Sites, Pollution Load, and Experimental Design	99
4.3.1.2	The Effects of the Various O ₃ Exposure Regimes	101
4.3.1.3	Stomatal Control of Ozone Uptake	104
4.3.1.4	Detoxification Capacity	107
4.3.2	The Swiss Research Program "Air Pollution and Forest Decline".	109
4.3.2.1	Effects of Air Pollutants on the Gas Exchange of Spruce	109
4.3.2.2	Analysis of the Needle Wax Layer, Stem Production, and Fungal Impact	111
4.3.2.3	Experiments on the O ₃ Sensitivity of Forest Trees	113
4.3.3	Other Field Research on Trees in Switzerland	115

4.4	Mechanisms of O ₃ Impact on Trees Under Controlled Exposure Conditions	116
4.5	Evidence of O ₃ Injury on a Regional Scale?	119
4.5.1	Methods of Estimating Forest Condition	119
4.5.2	Spatial Associations Between the Occurrence of Ozone and Crown Conditions	120
4.5.3	Associations of Temporal Trends in O ₃ Concentration and Crown Condition	122
4.5.4	Is there any Unambiguous Evidence of O ₃ Injury to Trees in Switzerland and Austria?	123
4.6	Conclusions	124
	References	126
5	Role of Ozone in Forest Decline on Wank Mountain (Alps) H. Rennenberg, A. Polle and M. Reuther	135
5.1	Introduction	135
5.2	Site Characteristics	136
5.2.1	The Bavarian Alps	136
5.2.2	The Wank Mountain Research Site	137
5.2.3	Tree Vitality at the Research Site	140
5.3	Atmospheric Exposure	141
5.4	Soil Characteristics and Tree Nutrition	145
5.5	Physiological Observations	146
5.5.1	Ozone	146
5.5.2	Other Photo-oxidants	154
5.6	Conclusions	155
	References	157
6	Ozone Responses of Trees: Results from Controlled Chamber Exposures at the GSF Phytotron C. Langebartels, D. Ernst, W. Heller, C. Lütz, H.-D. Payer and H. Sandermann Jr.	163
6.1	Introduction	163
6.2	Chamber Design and Performance	165
6.3	Selected Exposure Experiments	169
6.3.1	Interactions Between Ozone and Acidic Mist	169
6.3.2	Interactions Between Ozone and Carbon Dioxide	170

6.3.3	Effects of Mixtures of Air Pollutants	171
6.4	Biochemical Responses to Ozone	172
6.4.1	Response Levels	172
6.4.2	Photosynthetic Pigments	173
6.4.3	Polyphenolic Metabolites	175
6.4.4	Polyamines and Ethylene	178
6.4.5	Ozone-Related Proteins	181
6.4.6	Lignins	183
6.5	Premature Senescence in Beech	184
6.6	“Memory” Effects for Ozone in Conifers	186
6.7	Conclusions	190

10 Physiological Processes and Plant Responses to Ozone Exposure

R.L. Heath and G.E. Taylor Jr. 317

10.1 Introduction 317

10.1.1 Air Pollution Injury 318

10.1.1.1 Types of Oxidant Stress 320

10.1.1.2 Overview 320

10.2 The Assault of Air Pollutants upon Plants 321

10.2.1 Sequence of Events Following Air Pollutant Exposure 322

10.2.1.1 Entry of the Pollutant into the Leaf 323

10.2.1.2 Reactions of the Gas Within the Leaf 325

10.2.1.3 Movement of Product(s) and Transformations . . . 328

10.2.2 Amount of Exposure at the Physiological Level . . 328

10.2.2.1 Initial Site of Direct Ozone “Attack” 328

10.2.2.2 Ionic Flows Maintained by the Plasma Membrane 335

10.2.3 Responses of Metabolic Processes 337

10.2.3.1 Wounding 337

10.2.3.2 Stress-Induced Alterations in Gene Expression . . . 338

10.2.4 Tissue Level 345

10.2.4.1	Photosynthesis	345
10.2.4.2	Photoinhibition	348
10.2.4.3	Ozone Injury and Carbohydrate Status	350
10.2.4.4	Translocation	351
10.3	Summary of Physiological and Biochemical Events	352
10.3.1	O ₃ -Induced Changes in the Plant's Ability to Respond to Other Stresses	354
10.4	Role of Models	355
10.4.1	Is an Effect Real?	357
10.5	Conclusion	357
