2 A ROBUST DISCRETE OPTIMIZATION FRAMEWORK 26
2.1 The Robust Discrete Optimization Problem 26
2.2 Efficiency and Expected Performance of Robust Solutions 59
2.3 A Brief Guide Through Related Literature 69

REFERENCES 70
3 COMPUTATIONAL COMPLEXITY RESULTS OF ROBUST DISCRETE OPTIMIZATION PROBLEMS

3.1 Complexity Results for the Robust Assignment Problem
3.2 Complexity Results for the Robust Shortest Path Problem
3.3 Complexity Results for the Robust Minimum Spanning Tree Problem
3.4 Complexity Results for the Robust Resource Allocation Problem
3.5 Complexity Results for the Robust Machine Scheduling Problem
3.6 Complexity Results for the Robust Multi-period Production Planning Problem
3.7 Complexity Results for the Robust Knapsack Problem
3.8 Complexity Results for the Robust Multi-Item Newsvendor Problem
3.9 A Brief Guide Through Related Literature

4 EASILY SOLVABLE CASES OF ROBUST DISCRETE OPTIMIZATION PROBLEMS

4.1 Robust 1-Median Location Problem on a Tree
4.2 Robust Multi-period Production Planning with Demand Uncertainty
4.3 Robust Economic Order Quantity (EOQ) Model
4.4 Robust Newsvendor Problems
4.5 Robust Multi-Item Newsvendor Models with a Budget Constraint and Interval Demand Data
4.6 Parameter Robust Distribution Free Newsvendor Models
4.7 A Brief Guide Through Related Literature

6 ROBUST 1-MEDIAN LOCATION PROBLEMS:
DYNAMIC ASPECTS AND UNCERTAINTY 193
6.1 Notation, Problem Formulation and Basic Results 197
6.2 Robust 1-Median with Linear Node Demands and Edge Distances 204
6.3 Robust 1-Median with Linear Node Demands 209
6.4 Robust 1-Median with Linear Edge Distances 215
6.5 Observations on Uncertain Node Demands and Edge Distances,
and Conclusions on Robust 1-Median with Discrete Scenarios 221
6.6 Robust 1-Median Problem on a Tree with Interval Input Data 223
6.7 Robust 1-Median on a Tree with Mixed Scenarios 235

7 ROBUST SCHEDULING PROBLEMS 241
7.1 Properties of Robust Schedules for Single Machine Scheduling
with Interval Processing Time Data 243
7.2 Properties of Robust Schedules for Two Machine Flowshop
Scheduling with Interval Processing Time Data 249
7.3 Algorithms for the Robust Single Machine Scheduling Problem
with Interval Processing Time Data 254
7.4 Algorithms for the Robust Two Machine Flowshop Scheduling
Problem with Interval Processing Time Data 266
7.5 Algorithms for the Robust Two Machine Flowshop Scheduling
Problem with Discrete Processing Time Data 277
7.6 A Brief Guide Through Related Literature 286

## 8 ROBUST UNCAPACITATED NETWORK DESIGN AND INTERNATIONAL SOURCING PROBLEMS

8.1 Notation and Problem Formulation of Uncapacitated Network Design Problems

8.2 Adaptation of the Benders Decomposition Methodology to the Generation of Robust Network Designs

8.3 A Multi-Master Benders Algorithm For Robust Uncapacitated Network Design Problems

8.4 Robust Network Designs and the Expected Cost Uncapacitated Network Design Problem

8.5 Computational Results

8.6 Notation and Formulation of Robust International Sourcing Problem

8.7 An Algorithm to Generate the $N$ Best Robust Solutions to the International Sourcing Problem

8.8 Computational Performance of the Robust International Sourcing Algorithm

8.9 Managerial Uses of the Robust International Sourcing Model

8.10 A Brief Guide Through Related Literature
