Contents

Foreword ................................................................. 1

Africa’s floodplains: a hydrological overview
J.R. Thompson ........................................................... 5

Economics and hydrological management of African floodplains
W.M. Adams ............................................................... 21

Health aspects of Sahelian floodplain development
H. Verhoef ................................................................. 35

Hydrological controls of Sudd ecology
J.V. Sutcliffe and Y.P. Parks ........................................... 51

Maintaining the floods - hydrological and institutional aspects of managing the Komadugu-Yobe River basin and its floodplain wetlands
G. Polet and J.R. Thompson ........................................... 73

Water management and rural development in the Hadejia-Nguru wetlands, north-east Nigeria
D. Thomas ................................................................. 91

Water management for the conservation of the Kafue wetlands, Zambia and the practicalities of artificial flood releases
T. Scudder and M.C. Acreman ........................................ 101

The effects of Kariba Dam and its management on the people and ecology of the Zambezi River
H. Masundire ............................................................. 107

Effect of Zambezi River management on the prawn fishery of the Safola Bank
T. Gammelsrød ............................................................ 119
Social science inputs to water management and wetland conservation in the Senegal River Valley

M. Salem-Murdock ........................................ 125

The integrated development programme for the left bank of the Senegal River Valley

P-P. Vincke ............................................... 145

Hydrological inputs to management policy for the Senegal River and its floodplain

G.E. Hollis ............................................... 155

Rehabilitation of the Logone floodplain, Cameroon, through hydrological management

J.W. Wesseling, E. Naah, C.A. Drijver and D. Ngantou .................. 185

Community based hydrological management of the Phongolo floodplain

C. Bruwer, C. Poultney and Z. Nyathi ............................. 199

The review of the Southern Okavango Integrated Water Development Project

R.E. Manley and E.P. Wright ..................................... 213

Contributors ................................................. 225
