ADVANCES
AND
PERSPECTIVES
IN THE
TEACHING OF
MATHEMATICAL
MODELLING
AND APPLICATIONS

CLIFF SLOYER,
University of Delaware, USA

WERNER BLUM,
University of Kassel, Germany

IAN HUNTLEY
Sheffield-Hallam University, UK
Table of Contents

Preface ................................................................. v

Section A Surveys

1 Applications and Modelling in Mathematics
Teaching and Mathematics Education – Some
Important Aspects of Practice and of Research
Werner Blum
Kassel University, Germany ........................................ 1

2 Modelling, Teaching, Reflecting – What I Have
Learned
Peter Galbraith
The University of Queensland, Australia ...................... 21

3 Modelling – A UK Perspective
Ian Huntley
Sheffield Hallam University, UK............................... 47

Section B Empirical Investigations

4 Developing Metacognitive Skills in Mathematical
Modelling- A Socio-Constructivist Interpretation
Howard Tanner and Sonia Jones
University College of Swansea, UK .............................. 61
5 Cognitive Processes and Representations
Involved in Applied Problem Solving
João Matos and Susana Carreira
University of Lisbon, Portugal ........................................ 71

6 Results from a Comparative Empirical
Study in England and Germany on the
Learning of Mathematics in Context
Gabriele Kaiser
Kassel University, Germany ........................................ 83

7 From Computer Explorations to Models – An
Empirical Investigation
Charlene Sheets
Western Michigan University, USA .............................. 97

8 Remodeling Mathematics Teachers’ Conceptions
Using Performance Assessment Activities
Miriam Amit
Ministry of Education and Culture, Israel
and
Susan Hillman
University of Delaware, USA ................................. 107

9 Mathematical Modelling as a Context for Preservice
Teacher Education
Barry Shealy
University of Georgia, USA ................................. 119

Section C Assessment

10 Assessment in Context for Mathematical Modelling
Christopher Haines
City University, UK
and
John Izard
Australian Council for Educational Research ............. 131
11 Assessing Mathematical Comprehension
Ken Houston
University of Ulster, UK .............................................. 151

12 Assessment and Mathematical Modelling
James Hirstein
University of Montana, USA ....................................... 163

13 The Assessment of Core Skills in the
Context of Mathematical Modelling
Andrew Battye and Maggie Challis
Sheffield Hallam University, UK ................................. 175

Section D  Industrial Collaboration

14 Authentic Applications of Mathematics
Lars Ebbensgaard
Lemvig Gymnasium, Denmark ..................................... 197

15 Partnership Modelling between Industry and
University
Michael Hamson
Glasgow Caledonian University, UK ............................ 207

16 Scope of Mathematics Practitioner Involvement in
Undergraduate Mathematics
Michael Herring and A. Bloomfield
Cheltenham and Gloucester College
of Higher Education, UK .............................................. 219

Section E  Primary and Secondary Examples

17 The Value of a Modelling
View on Primary Children’s Problem Solving
Wendy Otley
Blackrod County Primary School, Bolton, UK
and
Jane Govender
Gorse Hill Primary School, Manchester, UK .................. 233
18 Modelling Growth Heuristically
   John Golobe
   The Renaissance School, New York, USA .................... 241

19 Mathematics Projects Course in Teacher Training – Constructing Nice Puzzles
   Yasar Ersoy
   Middle East Technical University, Ankara, Turkey
   and
   Tibor Nemetz
   Mathematical Inst. of the Hungarian Academy of Sciences,
   Budapest, Hungary ............................................. 263

20 Using the Laboratory Interface in the Mathematics Classroom- What, Why and How
   Ted Hodgson and John Amend
   Montana State University, USA .................................. 275

Section F Tertiary Examples

21 The Importance of Student Autonomy in Developing Mathematical Modelling Ability
   Thomas Naylor
   Edge Hill College of Higher Education, Lancashire, UK ..... 291

22 Teaching Mathematics to Biologists –Some General Aspects and Modelling Examples
   Adolf Riede
   University of Heidelberg, Germany .............................. 301

23 Mathematical Modeling In Higher Distance Education
   Fred Mulder
   Open University of the Netherlands ............................. 311

24 An Attempt to Integrate Traditional Applied Mathematics and Modern Mathematical Modelling Activities
   Bryan A. Orman
   University of Southampton, UK ................................ 325
