CONTENTS

Preface xiif
Acknowledgments xv
List of Symbols xvii

1. An Introduction to Orbital Mechanics 1
   The Mystery of the Wandering Stars 2
   Ptolemy’s Earth-Centered System 2
   The Heliocentric Theory of Copernicus 3
   Galileo’s Critical Insights 7
   Tycho Brahe’s Landmark Observations 8
   Kepler’s Three Laws of Planetary Motion 9
   Isaac Newton’s Clever Generalizations 11
      Newton’s Universal Law of Gravitation 12
      Newton’s Simple Laws of Motion 16
      Generalizing Kepler’s Laws 17
   Early Pioneers in Orbital Mechanics 19
   Why Doesn’t a Satellite Fall? 20
   Why Do Satellites Travel Around in Elliptical Orbits? 22
   The Conic Sections 23
   Launching a Satellite into Orbit 24
   Weightlessness 25

2. Satellite Orbits 29
   Isaac Newton’s Vis Viva Equation 30
   Evaluating the Gravitational Parameter of Earth 32
   Escaping from the Surface of a Three-Mile Asteroid 34
   Elliptical Orbits 37
   The High Cost of Launching a Satellite 40
The Best Place to Escape from an Elliptical Orbit 42
Gravity Wells 44
Kepler’s Equation 45
The Six Classical Keplerian Orbital Elements 53
Launch Azimuths and Ground-Trace Geometry 56
Orbital Perturbations 58

3. The Orbital Environment 63
The Beneficial Properties of Space 64
No Gravity 64
No Air 64
Nothin’ to Block Your View 65
The Emerging Benefits of Space Technology to the Residents of Springfield, Kentucky 66
The Salient Characteristics of the Orbital Environment 66
Earth’s Atmosphere 67
Earth’s Gravitational Field 69
The Magnetic Field Surround Earth 71
Meteoroids in Space 74
Man-Man Space Debris 76

4. Powered Flight Maneuvers 81
The Classical Hohmann Transfer Maneuver 81
Low-Thrust and Multi-Impulse Maneuver Sequences 84
Pure Plane-Change Maneuvers 85
Combined Plane Changes 88
The Bielliptic Transfer 90
Walking-Orbit Maneuvers 92
On-Orbit Rendezvous 94
Deorbit Maneuvers 97
Space-Age Slingshots 101
Ballistic Capture Missions 103

5. Boosting a Satellite into Orbit 107
The Rocket as a Momentum Exchange Device 108
Robert Goddard’s Contributions 109
Typical Liquid- and Solid-Fueled Rockets 111
Specific Impulse 113
The Rocket Equation 114
Multistage Rockets 116
  A Typical Single-Stage Rocket 116
  A Typical Two-Stage Rocket 117
  Trajectory Losses 118
Acceleration Profiles 120
Adding Lightness 121
  Balloon Tank Design 122
  Common Bulkheads 122
  Higher-Density Propellants 124
The High Cost of Accelerating Unburned Propellants 124
Staging Techniques 126

6. Today's Family of Global Boosters 127
NASA's Reusable Space Shuttle 128
  The Russian Space Shuttle 130
America's Expendable Rockets 132
  The Delta Booster 132
  The Atlas Family 133
  The Titan 134
The Winged Pegasus Booster 134
The European Ariane 136
Soviet Boosters on Parade 137
  The Japanese H-2 139
  The Chinese Long March 139
Advanced Booster Concepts Emerging from the Drawing Boards 139
  The X-33 Reusable Space Plane 139
  The Ariane V 140
  The Delta III 140
Novel Concepts for the Future 142
  Arthur Schnitt's Big, Dumb Booster 142
  Ed Keith's Asparagus-Stalk Booster 143
  The Maglifter Concept 146

7. Enhancing the Performance of Booster Rockets 149
Lunar-Orbit Rendezvous 150
Propellant Utilization Systems 151
  The Programmed Mixture Ratio Scheme 153
Optimal Fuel Biasing 156
Optimal Trajectory Shaping 158
Postflight Trajectory Reconstruction 163
Summary of Performance Gains 166

8. Choosing the Proper Orbit for a Satellite 169

Polar Orbits and Polar Birdcage Constellations 169
  The Transit Navigation Satellites 170
  The Iridium Constellation 172
Sun-Synchronous Orbits 172
Full-sun, Sun-Synchronous Orbits 175
Geosynchronous Orbits 175
  Inclined Geosynchronous Orbits 175
  The Perturbations Acting on a Geosynchronous Satellite 177
  Nullifying the Effects of the Perturbations 182
12-Hour Semisynchronous Orbits 182
Russia's Molniya Communication Satellites 185
Ace-Orbit Constellations 185
Frozen Orbits 189
Three-Body, Libration-Point Orbits 190
Interplanetary Trajectories 192
Grand Tour Missions 195
Special Orbits in Review 196

9. Choosing the Proper Constellation Architecture 203

What is a Constellation? 204
  A Sampling of Today's Constellations 204
  Spatial Locations for the Selected Constellations 207
What is the Largest Constellation Ever Launched into Space? 209
What is the Smallest Constellation of Satellites That Can Cover Earth? 210
  John Walker's Rosette Constellations 211
  John Draim's Four-Satellite Constellations 211
  The Smallest Constellation That Can Provide Global Coverage 213
Computer-Modeling Techniques 215
  Map Projections 216
  Coverage Analysis 217
