# Table of Contents

## Invited Speech

The Story of the IDEA Methodology  
*Stefano Ceri, Piero Fraternali*  
1

## Requirements Engineering I

- Integrating Semi-formal and Formal Requirements  
  *Roel Wieringa, Eric Dubois, Sander Huyts*  
  19
- Stimuli and Business Policies as Modelling Constructs: Their Definition and Validation Through the Event Calculus  
  *Óscar Díaz, Norman W. Paton*  
  33
- Using Scenarios to Validate Requirements in a Plausibility-Centred Approach  
  *Despina Filippidou, Pericles Loucopoulos*  
  47

## Information Systems Design

- Behaviour Specification in Database Interoperation  
  *Mark W.W. Vermeer, Peter M.G. Apers*  
  61
- Implementing Semantic-Based Decomposition of Transactions  
  *Sushil Jajodia, Indrakshi Ray, Paul Ammann*  
  75
- Negotiation Transactions: An Approach to Increase the Automation of Workflows  
  *Juha Puustjärvi*  
  89

## Requirements Engineering II

- Towards Method-Driven Trace Capture  
  *Klaus Pohl, Ralf Dömges, Matthias Jarke*  
  103
- A Multi-perspective Framework for the Analysis of Legacy Information Systems  
  *Silvana Castano, Valeria De Antonellis*  
  117
- Facilitating Analysis and Diagnosis in Organisations  
  *Luis Carriço, Nuno Guimarães*  
  131
Methods, Environments and Tools I

OO-METHOD: An OO Software Production Environment Combining Conventional and Formal Methods
Osca r Pastor, Emilio Insfrán, Vicente Pelechano, José Romero, José Merseguer
Application of a Generator-Based Software Development Method Supporting Model Reuse
Joachim Altmeyer, Jan Peter Riegel, Bernd Schuermann, Martin Schuetze, Gerhard Zimmermann
A Toolkit for Reuse in Conceptual Modelling
Raul Ruggia, Ana Paula Ambrosio

Methods, Environments and Tools II

Performance Engineering of Human and Computerised Workflows
Gunnar Brataas, Peter H. Hughes, Arne Solvberg
Meta-CASE in Practice: A Case for KOGGE
Jürgen Ebert, Roger Süttenbach, Ingar Uhe
Augmenting CASE Tools with Hypertext: Desired Functionality and Implementation Issues
Janne Kaipala

Conceptual Modelling I

Interval-Based Representation of Spatio-Temporal Concepts
Toshimi Tagashira, Toshiyuki Amagasa, Masayoshi Aritsugi, Yoshinari Kanamori
Temporal Object Role Modelling
Andreas Steiner, Moira C. Norrie
Complex Object Versioning
Chabane Oussalah, Christelle Urtado

Distributed Information Systems I

A Methodology for the Design of Distributed Web Systems
Guido Poncia, Barbara Pernici
Digital Neighbourhoods: Partitioning the Web for Information Indexing and Searching
Pedro Falcão Gonçalves, Ana Carolina Salgado, Silvio Lemos Meira
Intranet Facilitated Knowledge Management: A Theory and Tool for Defining Situational Methods
Marnix Klooster, Sjaak Brinkkemper, Frank Harmsen, Gerard Wijers
Conceptual Modelling II

A Conceptual Approach to Meta-Modelling
E. Dominguez, M.A. Zapata, J. Rubio

Preserving Behaviour: Why and How
Fabienne Cathala, Pascal Poncelet

Modeling Behavior of Geographic Objects: An Experience with the Object Modeling Technique
Nectaria Tryfona, Dieter Pfoser, Thanasis Hadzilacos

Distributed Information Systems II

Design of Distributed Applications Based on the OSI Model
Peter McBrien

DELOS - A Repository Based Environment for Developing Network Centric Applications
P. Klimathianakis, Pericles Loucopoulos

TDE: Supporting Geographically Distributed Software Design with Shared, Collaborative Workspaces
Antero Taivalsaari, Sami Vaaraniemi

Workflow Systems

Semantics of Reactive Components in Event-Driven Workflow Execution
Dimitrios Tombros, Andreas Geppert, Klaus R. Dittrich

Workflow Transparency
Peter Bichler, Günter Preuner, Michael Schrefl

Towards Real-Scale Business Transaction Workflow Modelling
A.P. Barros, A.H.M. ter Hofstede, H.A. Proper

Author Index
