SPECIAL PAPER

321

1997
Contents

Preface ......................................................................................................................... v

The inimitable Jess Johnson ......................................................................................... 1
  John A. Talent

SEQUENCE STRATIGRAPHY AND RELATED TOPICS

1. Use of K-bentonite beds as time-planes for high-resolution lithofacies analysis and assessment of net rock accumulation rate: An example from the upper Middle Ordovician of eastern North America ................................................................. 11
  Stephen A. Leslie and Stig M. Bergström

2. Comparison of Lower Silurian shores and shelves in North America and Siberia .......... 23
  Markes E. Johnson, Yuri I. Tesakov, Nikolai N. Predtetchensky,
  and B. Gudveig Baarli

3. Wenlock (Silurian) depositional sequences, eustatic events, and biotic change on the southern shelf of North America ................................................................................ 47
  James E. Barrick

4. Sedimentation and stratigraphic architecture of a Middle Devonian (late Givetian) transgressive-regressive carbonate-evaporite cycle, Coralville Formation, Iowa area ........ 67
  Brian J. Witzke and Bill J. Bunker

5. Sequence stratigraphy of the Middle to Upper Devonian Guilmette Formation, southern Egan and Schell Creek ranges, Nevada ......................................................... 89
  Todd A. LaMaskin and Maya Elrick

BIOSTRATIGRAPHY

6. Graphic correlation of Frasnian (Upper Devonian) sequences in Montagne Noire, France, and western Canada ........................................................................ 113
  Gilbert Klapper
### Contents

7. *A new zonation of middle Lochkovian (Lower Devonian) conodonts and evolution of Flajsella n. gen. (Conodonta)* ................................. 131  
   J. Ignacio Valenzuela-Ríos and Michael A. Murphy

8. *Middle Devonian (Eifelian) conodonts, and their stratigraphic implications, from the mid-Appalachians of Québec* ............................... 145  
   Tom T. Uyeno and Pierre J. Lespérance

9. *Conodont biostratigraphy of the Java Formation (Upper Devonian) and the Frasnian-Famennian boundary in western New York State* ......................................................... 161  
   D. Jeffrey Over

10. *Use of vertebrates to solve biostratigraphic problems: Examples from the Lower and Middle Devonian of western North America* ................................................................. 179  
    David K. Elliott and Heidemarie G. Johnson

11. *Famennian-Tournaisian conodonts and Devonian–Early Carboniferous transgressions and regressions in northeastern Australia* ................................................................. 189  
    Ruth Mawson and John A. Talent

**BIOGEOGRAPHY AND PALEOGEOGRAPHY**

12. *Biogeography of Early Devonian Chitinozoa* ................................................. 235  
    Theresa Winchester-Seeto

13. *Phylogeny and biogeography of Tecnocyrtina (Brachiopoda-Spriferinida) in the Devonian (Givetian-Frasnian) of North America* ................................................................. 245  
    Jed Day

14. *Autochthonous Middle Devonian–Lower Mississippian strata in the southern Hot Creek Range, Nye County, Nevada: Constraints on the placement of the Roberts Mountains thrust* ................................. 263  
    John P. Graham

15. *European Province Late Silurian brachiopods from the Ciudad Victoria area, Tamaulipas, northeastern Mexico* ................................................................. 273  
    A. J. Boucot, Robert B. Blodgett, and John H. Stewart

16. *Sequence of Devonian thelodont scale assemblages in East Gondwana* ................................................................. 295  
    Susan Turner

**PALEOBIOLOGY**

17. *Evolutionary relationships of the Zaphrentidae and Craspedophyllidae (rugose corals, Devonian) in eastern North America* ................................................................. 317  
    William A. Oliver, Jr.

18. *A global perspective of the Silurian tetracoral Goniophyllum* ................................................................. 327  
    Anthony J. Wright

19. *Lochkovian Rugosa of Nevada* ................................................................. 341  
    Alan E. H. Pedder and Michael A. Murphy

*Index* ................................................................. 387
