Table of Contents

Overview	Reservoir Quality Prediction in Sandstones and Carbonates: An Overviewvii <i>Julie A. Kupecz, Jon G. Gluyas, and Salman Bloch</i>
1	Porosity Prediction in Frontier Basins: A Systematic Approach to Estimating Subsurface Reservoir Quality From Outcrop Samples 1 <i>R.C. Tobin</i>
2	Prediction of Porosity in Compacted Sands19 <i>Jon G. Gluyas and Christopher A. Cade</i>
3	Porosity Variation in Carbonates as a Function of Depth: Mississippian Madison Group, Williston Basin 29 <i>Alton Brown</i>
4	Predicting Reservoir Quality Using Linear Regression Models and Neural Networks 47 <i>K.M. Love, C. Strohmenger, A. Woronow, and K. Rockenbauch</i>
5	Global Patterns in Sandstone Diagenesis: Their Application to Reservoir Quality Prediction for Petroleum Exploration 61 <i>Tim J. Primmer, Christopher A. Cade, Jonathan Evans, Jon G. Gluyas, Mark S. Hopkins, Norman H. Oxtoby, P. Craig Smalley, Edward A. Warren, and Richard H. Worden</i>
6	Burial History and Porosity Evolution of Brazilian Upper Jurassic to Tertiary Sandstone Reservoirs 79 <i>Cristiano Leite Sombra and Hung Kiang Chang</i>
7	A Geological Approach to Permeability Prediction in Clastic Reservoirs 91 <i>Jonathan Evans, Christopher A. Cade, and Steven Bryant</i>
8	Detecting Permeability Gradients in Sandstone Complexes— Quantifying the Effect of Diagenesis on Fabric103 <i>Robert Ehrlich, Mark C. Bowers, Virginia L. Riggert, and Chris M. Prince</i>
9	Geostatistical Simulation of Reservoir Porosity Distribution from 3-D, 3-C Seismic Reflection and Core Data in the Lower Nisku Formation at Joffre Field, Alberta115 <i>Raúl Cabrera-Garzón, John F. Arestad, Kadri Dagdelen, and Thomas L. Davis</i>

10	Geometry of Dolomite Bodies Within Deep-Water Resedimented Oolite of the Middle Jurassic Vajont Limestone, Venetian Alps, Italy: Analogs for Hydrocarbon Reservoirs Created Through Burial Dolomitization127 <i>William G. Zempolich and Lawrence A. Hardie</i>
11	Poroperm Prediction for Wildcat Exploration Prospects: Miocene Epoch, Southern Red Sea163 <i>Jon G. Gluyas and Trevor Witton</i>
12	Porosity-Depth Trends in Deeply Buried Upper Jurassic Reservoirs in the Norwegian Central Graben: An Example of Porosity Preservation Beneath the Normal Economic Basement by Grain-Coating Microquartz177 <i>Mogens Ramm, Arne W. Forsberg, and Jens S. Jahren</i>
13	Poroperm Prediction for Reserves Growth Exploration: Ula Trend, Norwegian North Sea201 <i>Jon G. Gluyas</i>
14	Predicting Porosity Distribution Within Oolitic Tidal Bars211 <i>Larry J. Cavallo and Richard Smosna</i>
15	Predicting Reservoir Quality at the Development Scale: Methods for Quantifying Remaining Hydrocarbon Resource in Diagenetically Complex Carbonate Reservoirs231 <i>R.P. Major and Mark H. Holtz</i>
16	Depositional Controls Over Porosity Development in Lithic Sandstones of the Appalachian Basin: Reducing Exploration Risk249 <i>Richard Smosna and Kathy R. Bruner</i>
17	Predicting Reservoir Properties in Dolomites: Upper Devonian Leduc Buildups, Deep Alberta Basin267 <i>Eric W. Mountjoy and Xiomara M. Marquez</i>
