## Contents

Preface to 1997 edition  ix  
Preface to 1990 edition  xi  
Prologue  xiii

### Part I Introduction  1

1 What is a catastrophe?  3  
Definitions old and new  5  
The question of scale  8  
Catastrophe – the right word?  12  
More styles of change  14  
Why study catastrophism?  17

2 What is catastrophism?  22  
Guidelines for studying the Earth  22  
Theories of the Earth  27  
Ways of viewing Earth history  33

### Part II The rise and fall of catastrophism  39

3 Non-actualistic catastrophism and the inorganic world  41  
A succession of catastrophes in a timeless world  41  
Singular events in a timebound, violent world  43  
The English diluvialists  55  
Scriptural geology  57

4 Actualistic catastrophism and the inorganic world  59  
Endless revolutions in a timeless world  59  
Repeated catastrophes in a timebound world  60  
Conclusion  72
vi Contents

5 Gradual change and the inorganic world 74
   The roots of gradualism 74
   Stately change in an unchanging world 76
   Slow, directional change 81
   Catastrophism versus uniformitarianism 85

6 Catastrophes, gradual change and the organic world 88
   Progression through catastrophes 88
   Sudden change in a steady-state world 93
   Gradual progression 96
   Gradual change in a steady-state world 104

Part III The revival of catastrophism 109

7 Inorganic history 111
   Background to the modern debates 111
   The rate debate and the inorganic world 113
   Time's arrow or time's cycle? 127
   Different worlds, different processes 145

8 Organic history 150
   Levels of evolutionary change 150
   The motor of organic history 154
   The tempo of organic change 157
   The tempo of biotic change 163
   Direction in the organic world 181

9 Synthesis 193
   Catastrophe and uniformity - a question of isms 194
   Asteroids, comets and biospheric crises 196
   The source and speed of biological change 198
   Non-linear dynamics - organized chaos 202

   Bibliography 211
   Index 247
