Volume II

WA4  TOMOGRAPHY

Chair: Francine Desharnais

Two Inversion Methods for Ocean Acoustic Tomography .................................................. 743
  Patrick Pignot and Bernard Faure

Modeling the Mechanical and Flow-induced noise on the Surface Suspended Acoustic Receiver ........................................... 748
  Jason I. Gobat and Mark A. Grosenbaugh

Underwater Light Bulb Implosions: A Useful Acoustic Source ........................................ 755
  Garry J. Heard, M. McDonald, N. R. Chapman, and L. Jaschke

xii
Matched Field Geoacoustic Tomography Experiments Using Light Bulb Sound Sources in the Haro Strait Sea Trial ........................................ 763
N. R. Chapman, L. Jaschke, M. A. McDonald, H. Schmidt, and M. Johnson

A Sediment Imaging System Using Acoustic Tomographic Techniques ........................................ 769
Thomas C. Austin, Richard Arthur, Dezhang Chu, Alan Hinton, and Dajun Tang

WB4  SIGNAL & INFORMATION PROCESSING II
Chairs:  Ferial El-Hawary and Ben Gauthier

Time Adaptive Pattern Recognition and Prediction for Situational Robustness ........................................ 773
David H. Kil and Frances B. Shin

Model-Based Array Processing in a Fading Channel ........................................ 779
E. J. Sullivan

Undersea Magnetic Noise Reduction ........................................ 784
B. Deniel

A Robust Discriminant Parameter Set for the Underwater Object Classification ........................ 789
Emanuel Radoi and André Quinquis

WC4  OCEANOGRAPHIC INSTRUMENTATION I—PROFILING
Chair:  Gordon Youle

Analysis of Wind Measurements from a Moored Buoy ........................................ 795
David Wang

The Drifting, Rotating Deep-Ocean Shearmeter ........................................ 796
Timothy F. Duda and Douglas C. Webb

Experimental Setup for the Artificial Generation of Well Defined Micro-structures for Calibration of Oceanographical Microstructure Probes ........................................ 802
Werner Kroebel

Measurements Using Moored and Drifting Buoys for Air-sea Interaction Studies ........................ n/a
M. R. Nayak, V. B. Peshwe, P. Mehra, and S. B. Tengali

WD4  SIGNAL PROCESSING—BEAMFORMING
Chair:  Bill Carey

Towards Development of Autofocusing Schemes for Phase Compensation of Synthetic Aperture Sonars ........................................ 803
Valérie Tonard and Marc Brussieux

Squint and Forward Looking Synthetic Aperture Sonar ........................................ 809
Patrice Caprais and Stéphane Guyon

Detecting Small Seabed Targets Using a High Frequency Multibeam Sonar: Geometric Models and Test Results ........................................ 815
Mike B. Brissette, J. E. Hughes-Clarke, J. Bradford, and B. MacGowan

Synthesis of Aperiodic Planar Arrays by a Stochastic Approach ........................................ 820
Andrea Trucco

WE4  ADVANCED PLATFORMS & TRENDS
Chair:  Robert Bannon

Multi-Sensor Instrumentation on a FOCUS-1500 Search and Survey System ........................................ 826
Edward Saade, Gary Parker, and Robert Morton

Development of the Autonomous Surface Craft “ACES” ........................................ 827
Justin E. Manley

A Solar Autonomous Underwater Vehicle System ........................................ 833
D. R. Blidberg, James C. Jalbert, and Mikhail Ageev

Trends in UUV Development Within the U.S. Navy ........................................ 841
Robert L. Wernli
WF4 ACOUSTIC COMMUNICATIONS III

Chairs: Mark Wood and Josko Catapovic

A Reliable, Low Power Acoustic Modem for AUV Communications ............................................. n/a
Matthew Grund and Mark Johnson

Autonomous Control System for Offshore Oil Exploitation Using Digital Acoustic Communication .................................................. 849
Cassio Kuchpil, Atila L. F. Xavier, José Augusto P. da Silva, and Marcelo Roberto B. P. L. Jimenez

Error Correction Coding for Communication in Adverse Underwater Channels ........................................ 854
Maurice D. Green and Joseph A. Rice

A Broadband UWA Communication System Based on COFDM Modulation ........................................... 862
W. K. Lam and R. F. Ormondroyd

Underwater Acoustic Voice Communications Using Digital Pulse Position Modulation ........................................ 870
Hayri Sari and Bryan Woodward

WG4 AUV NAVIGATION & CONTROL IV

Chair: Fred Guptill

From Autonomous Underwater Vehicles (AUVs) to Supervised Underwater Vehicles (SUVs) .................................................. 875
Hubert Thomas and Eric Petit

Modeling and Control of an Autonomous Underwater Shuttle for the Transportation of Benthic Laboratories ............... 888
A. Aguiar and A. Pascoal

Feature-Based Concurrent Mapping and Localization for AUVs .......................................................... 896
Christopher M. Smith, John J. Leonard, Andrew A. Bennett, and Christopher Shaw

Self-tuning Control of Autonomous Underwater Vehicles Based on Discrete Variable Structure System .................. 902
Pan-Mook Lee, Seok-Won Hong, and Yong-Kon Lim

Thursday Sessions

ThA1 BOTTOM CLASSIFICATION

Chair: Gordon Fader

Development and Feasibility Testing of an Acoustic Buried Cable Detection System ........................................... 913
Stephen J. Szender and Jim Kosalos

Acoustic Seabed Classification and Correlation Analysis of Sediment Properties by QTC View ...................... 921
Alexander S. Tsemahman, William T. Collins, and Bradley T. Prager

Multi-beam High Frequency Imaging in a Range-dependent Environment ................................................. 927
Melvin D. Wagstaff, Roger W. Meredith, and Heidi A. Terrill-Stolper

The Depth Accuracy of Flat and Circular Face Arrays in Multibeam Echo-Sounder ........................................... n/a
Dimitris Pantzartzis, Jens Steenstrup, and Burr Bridge

ThB1 MULTIBEAM SONAR DATA PROCESSING

Chairs: Russell Parrott and Roger Dwyer

Multibeam Sonar Bottom Detection Using Multiple Subarrays ............................................................. 932
Luren Yang and Torfinn Taxt

Real-Time Bathymetric Artifact Flagging for the SeaBeam 2100 System .................................................. 939
Sharon E. Spitzak and Kushal K. Talukdar

Bottom Detection for Multibeam Sonars with Active Contours ......................................................... 943
Luren Yang, Torfinn Taxt, and Fritz Albregtsen

ThC1 ROPES AND CABLES

Chairs: James Hamilton and Frank Leban

Marine Fouling of Optica Fibre Micro-Cables ......................................................................................... 951
Hedley Pullin and Andrew B. Yule

Corrosion Resistance of Certain Strength Wires Used in a Small Fiber-Optic Cables Exposed to Seawater .......... 957
Colin J. Sandwith and Robert L. Ruedisueli

Synthetic Ropes Subjected to Tension and Trolley Loads ........................................................................ 964
P. Petrina and S. L. Phoenix
ThD1  MAPPING, CHARTING & SURVEILLANCE

Chair: Maurice Moroney Jr.

Tidal Overlay and Dynamic ECDIS—A Giant Step from Paper Chart and Tide Tables ................................................. 967
Bohdan Pillich

Registration Algorithms for Geophysical Maps ................................................................. 974
Behzad Kamgar-Parsi and Behrooz Kamgar-Parsi

Integrated Maritime Surveillance (IMS) for the Grand Banks ................................................. 981
R. E. Moutray and A. M. Ponsford

World Geodetic System 1984—A Summary of Enhancements through the Development
of the New Geopotential Model EGM96 ...................................................... 1504
Patrick J. Fell

ThE1  AUV SYSTEMS

Chair: Claude Brancart

Sea Trials of AUV “R-one Robot” Equipped with a Closed Cycle Diesel Engine System ................................................. 987
Tamaki Ura and Takashi Obara

REMUS: A Small, Low Cost AUV: System Description, Field Trials and Performance Results ................................................. 994
Ben Allen, Roger Stokey, Tom Austin, Ned Forrester, Rob Goldsborough, Mike Purcell, and Chris von Alt

The Theseus Autonomous Underwater Vehicle—A Canadian Success Story ................................................. 1001
J. M. Thorleifson, T. C. Davies, M. R. Black, D. A. Hopkin, R. I. Verrall, A. Pope, I. Monteith,
V. Den Hertog, and B. Butler

Development of Autonomous Underwater Vehicle ‘Aqua Explorer 2’ for Inspection of Underwater Cables ................................................. 1007
Junichi Kojima, Yuichi Kato, Kenichi Asakawa, Sigetaka Matumoto, Satoru Takagi, and Naomi Kato

ThF1  REMOTE SENSING II—RADAR

Chair: Jim Hanlon

Snow Thickness Radar System ................................................................................. 1505
Louis Lalumiere

Field Experiment with an Ocean Surface Current Sensing Microwave Radar ................................................. 1013
H. H. Shih, R. Williams, C. L. Sun, and I. P. Popstefanija

Surface Current Response to Land-Sea Breeze Circulation in Monterey Bay, California
as Observed by a New Multifrequency HF Radar ................................................. 1019
John F. Vesecky, Calvin C. Teague, Robert G. Onstott, Jason Daida, Peter Hansen, Dan Fernandez,
Neil Schnepf, and Ken Fischer

The Use of Near-Real Time In-Situ Sea Level to Improve Global Data Bases ................................................. 1025
Bernard J. Kilonsky, Mark Merrifield, and Patrick Caldwell

ThG1  MARINE EDUCATION

Chairs: Fred Crickard and Aldo Chircop

Coral Reef Circular Materials Translation Project ................................................. 1035
Sharon H. Walker, Amanda Newton, and Alida Ortiz

GMDSS Training—The Impact of New Technology ................................................. 1036
David Underwood

The Marine Advanced Technology Education (MATE) Center:
A National Clearinghouse and Partnership Network for the Effective Training
of Oceanographic, Marine, Coastal and Environmental Technicians ................................................. 1041
Susan Cook, Nicole Crane, Kam Matry, Vince Kelley, Tom Murphree, and Andrew Palowitch

ThA2  TRANSDUCERS I

Chair: Yolande Bonin

An Application of Tapered, PZT Composite Lenses in an Acoustic Imaging Sonar with 1-cm Resolution ................................................. 1043
Edward O. Belcher and Dana C. Lynn
A Method for Computing Calibrated Ocean Wave Spectra from Measurements with a Nautical X-Band Radar
Joerg Seemann, Friedwart Ziemer, and Christian M. Senet

Active/Passive Microwave Method for Sea Surface Temperature Estimation
Nai-Yu Wang and John F. Vesely

Satellite Radar Scatterometer (NSCAT) Studies of Ocean Surface Stress in Near Coastal Regions
David E. Weissman

Comparison Between AVHRR Real Time and EFS-2 SAR Near Real Time Data in an Oceanographic Cruise in the Western Mediterranean
Oscar Chic, Jordi Font, and Zacarias Garcia

Using the World Wide Web to Link Marine Scientists and Educators
Frances Lee Larkin and Vicki P. Clark

Conversion of Fishing Vessels and Training of Fishermen for Oceanographic Surveys
John H. Ryther Jr. and Charlotte M. Cogswell

Global Considerations for Vessel Traffic Control and Electronics Navigation Systems on Inland Waterways
Maurice J. Moroney Jr.

Nondestructive Testing of Wooden Vessels
Kurt A. Hansen

1-3 Piezocomposites, SonoPanels, Arrays, and SmartPanels
Richard Gentilman, Daniel Fiore, Patrick McGuire, Craig Near, and William Serwatka

Combined Finite Element/Boundary Element Analysis of a Viscoelastic Anechoic Panel for Underwater Applications

Development of a Broadband-Underwater Sound Projector
Thomas R. Howarth and Robert Y. Ting

Design of a Hydrophone Array for Littoral Waters
Kirk E. Jenne and Larry E. Ivey

Gray-Scale Visualization of Wave Spectra in an Ocean Eddy
Ian A. Fraser and W. Cary Risley

Three-Dimensional Visualization of Oceanographic Data: A Case Study of the Gulf of Mexico’s Coastal Interface with Texas and Louisiana
Gilbert L. Rochon, Phu V. Luong, J. Houston Costolo, Gregory Ruby, and Ludwig A. Goon

Applications of 3-D Visualizations of Oceanographic Data Bases
Martha E. M. Head, Phu Luong, J. Houston Costolo, Kenneth Countryman, and Carl Szczeczowski

Interactive 3D Tools for Pipeline Route Planning
Mark Paton, Larry Mayer, and Colin Ware

Devising a Misalignment Tolerant Subsea Grasping System
Edward R. Snow and Dana R. Yoerger

Dynamical Measurements of Ship Crane Load Pendulation
M. D. Todd, S. T. Vohra, and F. Leban
Telerobotic Shipboard Handling System
Geoff Lebans, Ken Wilkie, Rickey Dubay, David Crabtree, and Tim Edmonds

ThD3 SEABED MAPPING
Chairs: Don Dinn and Glen Gilbert
CARAIBES: An Integrated Software for Multibeam Echosounders and Sidescan Sonar Data Mapping
L. Le Gal and C. Edy

Principal Components Array Processing for Swath Acoustic Mapping
Paul H. Kraeutner and John S. Bird

Multibeam Echo Sounder for EEZ Mapping
Erik Hammerstad

Multibeam Seabed Topographic Classification
John A. Bunce and Marian O. Clough

ThE3 SIMULATION & CONTROL
Chair: Zhizhang David Chen
Conceptual Re-design Techniques Utilised for Optimisation of a Mine Countermeasure Towed Acoustic Generator Control System
J. S. Baker and D. C. Cowling

SCIMERS: A Sonar Contact Integrated Maneuver Evaluation and Recommendation System
Todd Michael Mansell and Bruce McArthur

Simulation and Active Control of Towed Undersea Vehicles
D. Perrault, G. Hackett, and M. Nahon

ThF3 REMOTE SENSING IV—CIRCULATION
Chair: Brian Whitehouse
Pack Ice Stress and Convergence Measurements by Satellite-Tracking Ice Beacons
S. J. Prinsenberg, A. van der Baaren, G. A. Fowler, and I. K. Peterson

Iceberg Tracking Using HF Surface Wave Radar
H. C. Chan, T. Davies, and P. Hall

Prediction of Sea Ice Movement Using Satellite Data
Chang Kyu Rheem and Hisaaki Maeda

An Air Deployable Buoy for Search and Rescue Operations
W. Cary Risley, Gregory T. Leger, and Anthony Patterson

ThG3 OCEAN ECONOMIC DEVELOPMENT
Chair: Ross Piercey and David King
Physical Environmental Services in Support of the Hibernia Offshore Platform Towout and Installation
L. W. Davidson and Susan K. Woodbury

The Use of Marine Manganese Tailings in Industrial Coatings Applications
John C. Wiltshire

Changing Markets and Emerging Performers in Hawaii's Ocean R&D Industry
Craig D. MacDonald, Andrea L. LaBarge, and Elizabeth Corbin

Role of Sewage Phosphorus in Coastal Water Energy Production
B. Manimaran, V. Ramadhas, and R. Santhanam

ThA4 TRANSDUCERS III
Chair: Dennis Jones
An Ultrasonic Calibration System for the University of New Hampshire Center for Ocean Engineering
Kenneth C. Baldwin, Stephen Boucher, Christopher N. Pacheco, and Mike Simoneau
Extensible Physical Oceanographic Real-Time (PORTS) ......................................................... 1437
Wayne L. Wilmot, Jerry A. Galt, and Ralph T. Cheng

A Nowcast Model for Hazardous Material Spill Prevention and Response, San Francisco Bay, California .......................................................... 1442
Ralph T. Cheng, Wayne L. Wilmot, and Jerry A. Galt

Current Pattern Analysis for Oil Spills—A Case Study Using San Francisco Bay ......................................................... 1448
Jerry A. Galt, Ralph T. Cheng, and Wayne L. Wilmot

**ThF4** GEOSCIENCE INSTRUMENTS

Chair: Dave Heffler

Monitoring System for Submarine Earthquakes and Deep Sea Environment .......................................................... 1453
Hiroyasu Momma, Noriyuki Fujiwara, Katsuyoshi Kawaguchi, Ryoichi Iwase, Shinichiro Suzuki, and Hajimu Kinoshita

ORB—a New Ocean Bottom Seismic Data Logger .......................................................... 1460
F. B. Wooding, K. R. Peal, J. T. Hallinan, and J. A. Collins

SCAMP: A Submarine-Mounted Geophysical Survey System for Use Under the Arctic Ice ............................. n/a

The Design and Testing of a Free-fall Device for Recording Seismic Activity Beneath the Ocean Floor ................. 1466
J. C. Jones, A. Di Meglio, R. F. W. Coates, and P. R. Atkins

Multibeam Bathymetric Data for Regional Assessment of Marine Geology ......................................................... 1475
Russell Parrott, Gordon Fader, John Shaw, and John Hughes-Clarke

**ThG4** SURFACE PLATFORMS & EQUIPMENT

Chair: Charles Schafer

Meeting Mission Needs Through Proper Technology Application and Platform Selection ............................................. 1481
Hank Lobe

R/V Nathaniel B. Palmer: State of the Art in Oceanographic Research for the U.S. Antarctic Program ............. n/a
J. S. Holik

Wideband Passive Mechanical Mounting Systems for Disk Drives on Boats in Rough Seas ................................. 1488
Norman Dennis

CFAV Quest, A Non-intrusive Research Platform ......................................................................................... n/a
D. J. Hussey, C. Laidlow, A. W. George, L. MacInnis, and M. P. Wall

External Magnetic Field Active Compensation for Large Shipboard-type AC Machines ................................... 1496
Alexander Kildishev

**AUTHOR INDEX** ......................................................................................................................... 1507
