Contents

Preface vii

1. Ordinary Differential Equations 1
   1.0 Introduction 1
   1.1 Linear Variation of Parameters 2
   1.2 Nonlinear Variation of Parameters 4
   1.3 VPF in Terms of Lyapunov-Like Functions 19
   1.4 Boundary Value Problems 20
   1.5 Monotone Iterative Technique 24
   1.6 Exponential Dichotomy 27
   1.7 Sensitivity Analysis 34
   1.8 Existence of Almost Periodic Solutions 38
   1.9 Stability and Asymptotic Behavior 43
   1.10 Controllability 53
   1.11 Variational Comparison Result 58
   1.12 Notes 64

2. Integrodifferential Equations 65
   2.0 Introduction 65
   2.1 Linear Variation of Parameters 65
   2.2 Nonlinear Variation of Parameters 76
   2.3 Monotone Iterative Technique 81
   2.4 Stability Criteria 86
   2.5 Controllability 95
   2.6 Notes 100

3. Differential Equations with Delay 103
   3.0 Introduction 103
   3.1 Linear Variation of Parameters 103
   3.2 Nonlinear Variation of Parameters 111
   3.3 VPF in Terms of Lyapunov-Like Functions 118
   3.4 Asymptotically Self-Invariant Sets 122
   3.5 Asymptotic Equivalence 124
   3.6 Generalized Comparison Principle 134
   3.7 Notes 140

4. Difference Equations 141
   4.0 Introduction 141
   4.1 Linear Variation of Parameters 141
   4.2 Nonlinear Variation of Parameters 149
   4.3 Periodic Solutions 156
   4.4 Boundary Value Problems 159
