Chapter 2  Non-Rigidity in van der Waals Molecules: Some Case Studies 34
R. G. A. Bone

1 Introduction 34
2 Tunneling Phenomena and Symmetry 37
3 Occurrence of Argon, C₂H₂ and SO₂ in Atmospheres and the Cosmos 39
  3.1 Argon 39
  3.2 C₂H₂ 40
  3.3 SO₂ 40
4 Examples of Non-Rigidity in van der Waals Molecules 41
  4.1 Ar-SO₂ 41
  4.2 (SO₂)₂ 43
  4.3 (C₂H₂)₂ 47
  4.4 (C₂H₂)₃ 49
  4.5 (C₂H₂)₄ and (C₂H₂)₅ 51
  4.6 Ar-C₂H₂ 53
5 Conclusions 55
References 56

Chapter 3  Dimeric Absorption in the Atmosphere 60
A. A. Vagasin

1 Introduction 60
2 Weakly Bound Species in Planetary Atmospheres 61
  2.1 Jupiter, Saturn, and Titan 61
  2.2 Mars and Venus 67
  2.3 Earth 72
3 Water Vapor Continuum Absorption 81
  3.1 Water Complexes and Continuum Absorption 84
  3.2 About Controversies of Dimeric Hypothesis 88
  3.3 Concluding Remarks 91
References 92
Chapter 4  Dimers in Earth's and Planetary Atmospheres:
The (H$_2$O)$_2$, (N$_2$)$_2$, N$_2$-O$_2$, (O$_2$)$_2$, (O$_3$)$_2$, (CO$_2$)$_2$, (H$_2$)$_2$, and Ar-N$_2$ Cases
Z. Slanina, S. J. Kim, K. Fox, F. Uhlik, and A. Hinchliffe

1  Introduction  101
2  The Water Dimer  102
3  The (N$_2$)$_2$, N$_2$-O$_2$, and (O$_2$)$_2$ Species  112
4  The Ozone Dimer  116
5  (CO$_2$)$_2$ & Venus  119
6  (H$_2$)$_2$ & Jupiter  122
7  Ar-N$_2$ & Titan  124
8  Concluding Remarks  125

References  125

Chapter 5  Fullerenes & Other Carbon Aggregates, and the Diffuse Interstellar Bands
Z. Slanina, L. Adamowicz, J.-P. François, and E. Ōsawa

1  Introduction  134
2  The Diffuse Interstellar Bands  136
2.1  Highly Unsaturated Hydrocarbons  139
3  Small Carbon Clusters  142
4  C$_{60}$ and C$_{70}$ Fullerenes  150
4.1  Fullerenes in Nature  154
4.2  Seminatural Occurrence of Fullerenes  157
5  Higher Fullerenes  159
6  Modified Fullerenes  162
7  Concluding Remarks  165

References  166
Chapter 6  Planetary Atmospheres: The Role of Collision-Induced Absorption  
L. M. Trafton

1 Introduction  177
2 Historical Background  178
3 CIA Enhancement of the Greenhouse Effect  181
4 Voyager Observations of the CIA Rotational-Translational Band of H₂-He  183
   4.1 The He/H₂ Ratio  183
   4.2 The Ortho-Para H₂ Ratio  185
5 Post-Voyager Results  185
   5.1 Ground Based Observations of the H₂ Fundamental Band  186
   5.2 Venus and CIA Night Sky Emission from CO₂  186
   5.3 A Massive Early Atmosphere on Triton?  187
   5.4 The 2.15 μm N₂ Ice Band and the Atmospheres of Triton and Pluto  187
6 Extrasolar Planets  188
References  190

Chapter 7  Chemical and Optical Properties of Molecular Complexes Using Matrix Isolation Spectroscopy  
L. Schriver-Mazzuoli

1 Introduction  194
2 Experimental Techniques  195
   2.1 Closed-cycle Refrigeration  195
   2.2 Sample Preparation  196
   2.3 Sample Deposition  199
   2.4 Matrix Properties  200
   2.5 IR Spectroscopy in Matrices  202
3 Vibrational Spectroscopy  202
   3.1 Charge Transfer Complexes  202
3.2 Hydrogen Bonded Complexes

--- Halogen-Base Complexes
--- Ozone-Base Complexes
--- SO$_2$ and SO$_3$-Base Complexes
--- Oxygen-Base Complexes
--- Hydrogen-Base Complexes
--- Weak and Medium Hydrogen Bonded Complexes
--- Hydrogen Halides
--- Water: Self Association
--- Water: Heteromolecular Complexes
--- Water Ices
--- Alcohols
--- Ammonia, Hydoroxylamine
--- Nitric and Nitrous Acid
--- Carboxylic Acids
--- Proton Transfer

3.3 Trapping of Two Structural Arrangements of Weak Complexes

4 Infrared Photodissociation of Hydrogen Bonded Complexes

4.1 Hydrogen Bonded Complexes IH...B
--- C → U Conversion
--- C ↔ U Back Conversion

4.2 Infrared Photoisomerization of the ROH Aggregates (R = CH$_3$, H)
--- Methanol Dimer
--- Methanol Trimer
--- Water Dimer

5 UV and Visible Photochemistry

5.1 Case Study: Photodissociation of the O$_3$: Br$_2$ and O$_3$: BrCl Complexes in Argon Matrix at 532, 633, and 870 nm

References
Chapter 8  Infrared Spectroscopy of Size-Selected Free and Adsorbed Water Complexes  
F. Huisken  

1  Introduction  

2  Experimental  
   2.1  Principle of Measurements  
   2.2  Experimental Details  

3  Results  
   3.1  Free Water Clusters  
   3.2  Water Complexes Embedded in Argon Host Clusters  
   3.3  Water Complexes Embedded in Helium Host Clusters  
   3.4  Methanol Attached to Water Host Clusters  

4  Discussion  
   4.1  Assignments  
   4.2  Comparison with Calculations  
   4.3  Solvated Water Complexes  
   4.4  Correlation between Frequency Shift and Critical Temperature  

5  Summary
