ESTUARINE AND COASTAL MODELING

PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE

October 22-24, 1997
Alexandria, Virginia

EDITED BY
Malcolm L. Spaulding and Alan F. Blumberg

ASCE American Society of Civil Engineers
1801 ALEXANDER BELL DRIVE
RESTON, VIRGINIA 20191–4400

Contents

Session 2A: Hydrodynamic Model Formulation

Session 2B: Waste Load Allocation

Pollutant Load Reduction Models for Estuaries 1
Y. Peter Sheng

The Chesapeake Bay Experience 16
Harry V. Wang, Billy H. Johnson, and Carl F. Cerco

Session 3A: Hydrodynamic Model Refinements

Improvement of Estuarine and Coastal Modeling Using High-Order Difference Schemes 28
Peter C. Chu and Chenwu Fan

Session 3B: Water Quality Model Applications

Modeling Dissolved Oxygen Dynamics of Tampa Bay During Summer of 1991 35
Eduardo A. Yassuda and Y. Peter Sheng

A Three-Dimensional Model of Florida's Sebastian River Estuary 59
Peter V. Sucsy, Frederick W. Morris, Martien J. Bergman, and Lou J. Donnangelo

Three-Dimensional Contaminant Transport/Fate Model 75
Mark S. Dortch, Carlos Ruiz, Terry Gerald, and Ross W. Hall

Session 4A: Buoyancy-Driven Circulation

Modeling the Baroclinic Residual Circulaton in Coastal Seas Under Freshwater Influence 90
Y. Sugiyama, F. Takagi, K. Nakatsuji, and T. Fujiwara

Modeling the Mighty Burdekin River in Flood 103
Brian King, Simon Spagnol, Eric Wolanski, and Terry Done

Modeling Realistic Events of the Mine Coastal Current 116
Monica J. Holboke

Session 4B: Transport Model Formulation

Assessment of the Random Choice Method for Modeling Tidal Rectification in Coastal Water Bodies 131
Eugenio Gomez-Reyes

Analysis and Application of Eulerian Finite Element Methods for the Transport Equation 138
James L. Hench and Richard A. Luettich, Jr.

Interfacing Hydrodynamic and Water Quality Models with the Eulerian–Lagrangian Method 153
Ling Tang and E. Eric Adams

Session 5A: Tidal Dynamics Modeling

Barotropic Tidal and Residual Circulation in the Arabian Gulf 166
Cheryl Ann Blain

Seasonal Characteristics of the Tidal Current Circulation in Omura Bay 181
Tadashi Fukumoto, Akihide Tada, Takehiro Nakamura, and Hiroyoshi Togashi

Session 5B: Water Quality Model Skill Assessments

Field Data Collection and Modeling for Verification of an Ecosystem Model in Osaka Bay, Japan 196
N. Yamane, K. Nakatsuji, H. Kurita, and K. Muraoka

Development of a Waste Load Allocation Model Within Charleston Harbor Estuary Phase I: Barotropic Circulation 211
Steven Peene, Eduardo Yassuda, and Daniel Mendelsohn

COASTMAP, An Integrated System for Monitoring and Modeling of Coastal Waters: Application to Greenwich Bay 231
M.L. Spaulding, S. Sankaranarayanan, L. Erikson, T. Fake, and T. Opishinski

Evaluating the Uncertainty in Water Quality Predictions: A Case Study 252
James D. Bowen

Session 6: Hydrodynamic Model Simulations

Control of Multi-Dimensional Wave Motion in Shallow Water 267
Brett F. Sanders and Nikolaus D. Katopodes

Coastal Flow Modeling Using an Inverse Method with Direct Minimisation 279
Graham Copeland

Hydrodynamic Modeling of Johor Estuary: Johor, Malaysia 293
Johnny D. Martin and Jeffrey G. Shelden

Hydrodynamic Modeling: Croatan/Pamlico Sound System, North Carolina 308
Jeffrey G. Shelden and Johnny D. Martin

Empirical Techniques for A Priori Parameter Estimation 323
Thomas O. Herrington and Michael S. Bruno

Application of Multigrid Technique to Hydrodynamic Equations 338
Prasada Rao and Scott A. Yost

Session 7: General Joint Session II

Session 8A: Nowcast Modeling I

Development of Model-Based Regional Nowcasting/Forecasting Systems 355
Bruce B. Parker

Real-Time Predictions of Surge Propagation 374
Norman W. Scheffner and Patrick J. Fitzpatrick

A Predictive Model of Sediment Transport 389
Wilbert Lick, Zenitha Chroneer, Craig Jones, and Rich Jepsen

Session 8B: Sediment Transport Processes

Physical Processes Affecting the Sedimentary Environments of Long Island Sound 400
Richard P. Signell, Harley J. Knebel, Jeffrey H. List, and Amy S. Farris

Session 9A: Nowcast Modeling II

Development of an Experimental Nowcast-Forecast System for Chesapeake Bay Water Levels 413
Kathryn Thompson Bosley and Kurt W. Hess

Real-Time Data Acquisition and Modeling in Tampa Bay 427
Mark Vincent, David Burwell, Mark Luther, and Boris Galperin

Development of a Nowcast/Forecast System for Galveston Bay 441
Richard A. Schmalz, Jr.

Session 9B: Sediment Transport Model Applications I

Morphodynamic Responses to Extratropical Meteorological Forcing on the Inner Shelf of the Middle Atlantic Bight: Wind Waves, Currents, and Suspended Sediment Transport 456
Sung-Chan Kim, L. Donelson Wright, Jerome P.-Y. Maa, and Jian Shen

A Particle Method for Sediment Transport Modeling in the Jade Estuary 467
Frank Bergemann, Günther Lang, and Gerd Flügge

Resuspension and Advection of Sediment During Hurricane Andrew on the Louisiana Continental Shelf 481
Timothy R. Keen and Scott M. Glenn

Session 10A: Three-Dimensional Hydrodynamic Model Applications

Three-Dimensional Numerical Modeling of the Tidal York River System, Virginia 495
J. Shen, M. Sisson, A. Kuo, J. Boon, and S. Kim

Modeling Thermal Structure and Circulation in Lake Michigan 511
Dmitry Beletsky and David J. Schwab

Session 10B: Forcing Function Improvements

Hydrographic Data Assimilation on Georges Bank 523
Daniel R. Lynch and Christopher E. Naimie

Open Boundary Conditions for Use in Coastal Models 541
R.P. Matano, E.D. Palma, J.M. Mesias, and P.T. Strub

Impact of Satellite-Derived Cloud Data on Model Predictions of Surface Heat Flux and Temperature: A Lake Erie Example 556
Yi-Fei P. Chu and Keith W. Bedford

Session 11A: Three-Dimensional Coastal Hydrodynamic Model Applications

Three-Dimensional Model Simulations off the West Coast of Vancouver Island **570**
M.G.G. Foreman and P.F. Cummins

A Three-Dimensional Ocean Circulation Model with Wave Effects **584**
James K. Lewis

Comparison of Observed and Forecasted Sea Levels Along the West Florida Coast **601**
William P. O'Connor, Frank Aikman III, Eugene J. Wei, and Philip H. Richardson

Session 11B: Forecasting for 1996 Olympic Games

Finite Element Model of Wassaw Sound with Synthetic Marsh Flooding Boundary Conditions **613**
Thomas F. Gross and Francisco E. Werner

Numerical Simulation of Tidal Currents with TELEMAC for Olympic Games Atlanta '96 ..... **627**
Jean-Marc Janin, Michel Benoit, and Thomas F. Gross

Surface Currents in a Three-Dimensional Model of Wassaw Sound **640**
Roger Proctor and Rod Carr

Circulation Modeling and Forecasts for the Danish Sailors During the 1996 Olympic Yachting Events **656**
Jan Borup Jakobsen and Morten Rugbjerg

Session 12: Water Quality Model Simulations

Use of a Hydrodynamic Model for Establishing a Minimum Freshwater Flow to the Lower Hillsborough River Estuary **663**
XinJian Chen and Michael S. Flannery

Hydrodynamic Flow and Water Quality Simulation of a Narrow River System Influenced by Wide Tidal Marshes **679**
Gavin Gong, Ken Hickey, and Mel Higgins

An Eulerian–Lagrangian Particle Dispersion Modeling for Surface Heat Transport **693**
Seung-Won Suh

Models for Suspended Sediment Dispersion and Drift **708**
C.G. Hannah, Z. Xu, Y. Shen, and J.W. Loder

Wave and Sedimentation Modeling for "Bahia San Juan de Dios", Mexico **723**
Claudio Fassardi and J. Ian Collins

Design of Field Program and Use of Field Measurements To Calibrate a Hydrodynamic and Water Quality Model of an Estuarine River System **737**
Ken Hickey, Mark Gerath, Gavin Gong, and James D. Bowen

Session 13A: Data Assimilation and Model Skill

Data Assimilation Experiments with the Navy Layered Ocean Model **752**
Igor Shulman and Ole Martin Smedstad

Evaluation of Subtidal Water Level in NOAA's Coastal Ocean Forecast System for the U.S. East Coast 766
John R. Schultz and Frank Aikman III

Session 13B: Sediment Transport Model Applications II

Sediment Transport Dynamics in a Dredged Channel 781
Sean O'Neil and David P. Podber

Hydrodynamical Modeling of Nontidal Coastal Areas Assessing the Morphological Behaviour 792
H. Weilbeer and W. Zielke

Numerical Simulation of Hydrodynamics for Proposed Inlet, East Matagorda Bay, Texas 805
Adele Militello and Nicholas C. Kraus

Session 14A: Two-Dimensional Model Applications

Stage-Frequency Estimates for the Louisiana Coast 819
S. Rao Vemulakonda, Norman W. Scheffner, David J. Mark, and Mitchell E. Brown

An Analysis of Grid Convergence for the Dynamic Grid Adaptation Technique Applied to the Propagation of Internal Waves 834
David P. Podber and Keith W. Bedford

Session 14B: Thermal and Biological Transports

Tidal Circulation and Larval Transport Through a Barrier Island Inlet 849
Richard A. Luettich, Jr., James L. Hench, Crystal D. Williams, Brian O. Blanton, and Francisco E. Werner
