1998
CONTENTS

Preface xi

Water Masses and Mixing Near the Antarctic Slope Front
  T. Whitworth III, A. H. Orsi, S.-J. Kim, W. D. Nowlin Jr., and R. A. Locarnini 1

Observations and Modelling of Antarctic Downslope Flows: A Review
  Peter G. Baines and Scott Condie 29

On the Interaction of the Katabatic-Land-Sea Wind System of Antarctica
With the High Latitude Southern Ocean
  Scott L. Goodrich, Richard T. McNider, and William W. Schroeder 51

Thermohaline Variability of the Waters Overlying the West Antarctic Peninsula Continental Shelf
  Eileen E. Hofmann and John M. Klinck 67

Oceanic Erosion of a Floating Antarctic Glacier in the Amundsen Sea
  Hartmut H. Hellmer, Stanley S. Jacobs, and Adrian Jenkins 83

Winter Atmospheric Forcing of the Ross Sea Polynya
  David Bromwich, Zhong Liu, Michael L. Van Woert, and Aric N. Rogers 101

Interannual Ocean and Sea Ice Variability in the Ross Sea
  Stanley S. Jacobs and Claudia F. Giulivi 135

On the Origin and Influence of Adélie Land Bottom Water
  Stephen R. Rintoul 151

Ocean-Ice Shelf Interaction and Possible Bottom Water Formation in Prydz Bay, Antarctica
  Annie P. S. Wong, Nathaniel L. Bindoff, and Andrew Forbes 173

Acoustical Techniques in Antarctic Oceanography
  John D. Penrose 189

Transport and Water Masses of the Antarctic Slope Front System in the Eastern Weddell Sea
  Karen J. Heywood, Ricardo A. Locarnini, Russell D. Frew, Paul F. Dennis, and Brian A. King 203

Western Weddell Sea Thermohaline Stratification
  Arnold L. Gordon 215

Transient Tracer Observations From the Western Weddell Sea
During the Drift and Recovery of Ice Station Weddell
  Manfred Mensch, William M. Smethie Jr., Peter Schlosser, Ralf Weppernig, and Reinhold Bayer 241

Interactions Between Floating Ice Platelets and Ocean Water in the Southern Weddell Sea
  Andreas Bombosch 257
Impact of Grounded Icebergs on the Hydrographic Conditions Near the Filchner Ice Shelf

Ole Anders Nøst and Svein Østerhus

Physical Controls on Ocean Circulation Beneath Ice Shelves Revealed by Numerical Models

Michael J. M. Williams, Adrian Jenkins, and Jürgen Determann

Ocean Circulation Beneath the Western Ronne Ice Shelf, as Derived From in situ Measurements of Water Currents and Properties

K. W. Nicholls and K. Makinson

Marine Ice Beneath Filchner Ice Shelf: Evidence From a Multi-Disciplinary Approach

K. Grosfeld, H. H. Hellmer, M. Jonas, H. Sandhöger, M. Schulte, and D. G. Vaughan

Tides in the Weddell Sea

Robin Robertson, Laurie Padman, and Gary D. Egbert

The New Bathymetric Charts of the Weddell Sea: AWI BCWS

Hans Werner Schenke, Heinrich Hinze, Semme Dijkstra, Bernd Hoppmann, Fred Niederjasper, and Tilo Schöne
