European Agricultural Research in the 21st Century

Which Innovations Will Contribute Most to the Quality of Life, Food and Agriculture?

Palais de l'Europe, Strasbourg, France 28–29 November 1996

With 35 Figures and 37 Tables
CONTENTS

The Strasbourg Declaration ................................................................. IX

PLENARY SESSION

Foreword
Guy Paillotin ....................................................................................... 2

The New International Economic Context for European Agricultural Research
Joachim von Braun ............................................................................... 5

TOMORROW’S DIET

Workshop 1 – Decisive Elements in the Consumer’s Choice
Trends in Food Consumption in the European Union: Towards a Euro Diet?
Bruce Traill ......................................................................................... 14

Consumer Choices: Tastes, Preferences, Constraints
Pierre Combris ...................................................................................... 20

Effects of Media Discourse and Marketing
Francesco Bisceglia ........................................................................... 30

Influence of Media and Marketing
Chantal Jacquet .................................................................................. 34

Workshop 2 – Quality in the Food Sector
The Components of Quality
Gianfranco Valfré .............................................................................. 37

The Strategy of the Food Industry
Christiane Mercier ............................................................................. 43
Quality from a Consumer's Perspective
Arie van Genderen ................................................................. 48

Application of Biotechnology in the Food Industry
Hans Nieuwenhuis ................................................................. 53

The Role of Public Authorities at the National and International Level
Joachim Heine ................................................................. 60

Workshop 3 – Diet, Well-Being and Health
Food Choice and Health
Pierre Louisot ................................................................. 67

How Functional Foods in the Diet Contribute to Health
Marcel Roberfroid ................................................................. 71

Food Safety
Jean-François Girard ............................................................. 76

AGRICULTURE, ENVIRONMENT AND RURAL AREAS

Workshop 1a – Agriculture, Natural Resources and Environmental Constraints
Water Management for Agriculture
Carlos Tio ................................................................. 80

Soil Management and Agriculture
Christian de Kimpe ............................................................. 84

Man and Biodiversity
Robert Barbault ................................................................. 92

Workshop 1b – Production Improvement
The Genetic Control of Plant Parasites: „Un plat de résistance“
Ian R. Crute ................................................................. 102

Objectives and Challenges in Improving Biological Material for Animal Breeding
Pascal L. Leroy ................................................................. 114
Integrated Agriculture
Jean Thiault ................................................................. 123

Improvements in Production Systems
Dieter Smidt ................................................................. 130

Workshop 2 – Product Diversification
Non-Food Production: Economic, Environmental and Land Use Aspects
Philippe Chartier ........................................................... 138

Non-Food Production: Technological and Scientific Bottlenecks,
The Role of Bioenergy in Europe’s Energy Strategies
Wolfgang Palz ................................................................. 146

Forest and Agroforestry
Jan-Erik Hälgren ............................................................. 165

Trends in Fisheries and Aquaculture Production in Europe
Robin L. Welcomme ........................................................ 174

Workshop 3 – Agriculture as Part of Rural and Regional Development
The Diversity of Rural Space and its Typologies
Elena Saracenono ............................................................ 190

Agriculture at the Local and Regional Level
André Valadier ............................................................... 207

Amenities in Rural Areas: Responding to a New Social Demand
Markus F. Hofreither ....................................................... 209

AGRICULTURAL RESEARCH, INNOVATION AND SOCIETY

Workshop 1 – Research, Technological Change and Economic Development
Lessons from a Macro-Historical Analysis: The Future of European Agricultural Research
Ad M. van der Woude ....................................................... 217

Agricultural Research and Technical Change in Agriculture: Lessons from Microeconomic Studies
Robert E. Evenson .......................................................... 223
The Agro-Food Industry and Innovation
Christian Godde ................................................................. 250

Agricultural Research in France. A Useful Tool in Effective, Pervasive Agriculture
Maurice Rigaud ............................................................. 254

Workshop 2 – The Evolution of Partnerships

First Panel Discussion: Scientific and Industrial Partnerships
Michel Callon, on behalf of Jean Gabolde ........................................... 260

Second Panel Discussion: Future Relations Between Agricultural Research and Agricultural Extension Services
Michel SEBILLOTE ........................................................... 265

Workshop 3 – Research and Society: Scientific Expertise and Public Decisions

Why are Public Organisations Needed for Agronomic Research?
Patrick Cohendet, Pierre-Benoit Joly .................................................... 270

Third Panel Discussion: Scientific Expertise and Public Decision
Noëlle Lenoir ........................................................................... 279

Scientific Appraisals: The Organisation and Responsibility of Experts
Marie-Angele Hermitte .......................................................... 287

PLENARY SESSION

European Agricultural Research, World Food Situation and Development.
Agricultural Research after the World Food Summit
Stein W. Bie ........................................................................... 305

European Agricultural Research, World Food Situation and Development
Michel Petit ........................................................................... 313

Europe and Agricultural Research for Development
Alain Darthenacq .................................................................... 321

Closing Speech
François d’Aubert .................................................................... 329
