CONTENTS

Preface ix

Introduction 1

1 Test functions and distributions 4
1.1 Some notations and definitions 4
1.2 Test functions 5
1.3 Distributions 7
1.4 Localization 10
1.5 Convergence of distributions 13
Exercises 15

2 Differentiation, and multiplication by smooth functions 17
2.1 The derivatives of a distribution 17
2.2 Some examples 18
2.3 A distribution obtained by analytic continuation 20
2.4 Primitives in \( \mathcal{D}'(\mathbb{R}) \) 22
2.5 Product of a distribution and a smooth function 23
2.6 Linear differential operators 25
2.7 Division in \( \mathcal{D}'(\mathbb{R}) \) 27
2.8 Duality 29
Exercises 30

3 Distributions with compact support 34
3.1 Continuous linear forms on \( C^\infty(X) \), and distributions with compact support 34
3.2 Distributions supported at the origin 36
Exercises 39

4 Tensor products 40
4.1 Test functions which depend on a parameter 40
4.2 Affine transformations 42
4.3 The tensor product of distributions 44
Exercises 48
Contents

Appendix: topological vector spaces 162
Bibliography 170
Notation 171
