Table of Contents

Invited Talks

Issues Raised by Three Years of Developing PJama: An Orthogonally Persistent Platform for Java™ 1
Malcolm Atkinson, Mick Jordan

Novel Computational Approaches to Information Retrieval and Data Mining 31
Christos H. Papadimitriou

Tutorial

Description Logics and Their Relationships with Databases 32
Maurizio Lenzerini

Query Languages

An Equational Chase for Path-Conjunctive Queries, Constraints, and Views 39
Lucian Popa, Val Tannen

Adding For-Loops to First-Order Logic 58
Frank Neven, Martin Otto, Jurek Tyszkiewicz, Jan Van den Bussche

Logic

Definability and Descriptive Complexity on Databases of Bounded Tree-Width 70
Martin Grohe, Julian Mariño

Decidability of First-Order Logic Queries over Views 83
James Bailey, Guozhu Dong

Performance I

Urn Models and Yao's Formula 100
Danièle Gardy, Laurent Némirovski

On the Generation of 2-Dimensional Index Workloads 113
Joseph M. Hellerstein, Lisa Hellerstein, George Kollios

Increasing the Expressiveness of Analytical Performance Models for Replicated Databases 131
Matthias Nicola, Matthias Jarke
## Table of Contents

### Concurrency and Distribution

Transactions in Stack, Fork, and Join Composite Systems......................150  
*Gustavo Alonso, Armin Fessler, Guy Pardon, Hans-Jörg Schek*

Databases for Tracking Mobile Units in Real Time.................................169  
*Ouri Wolfson, Liqin Jiang, A. Prasad Sistla, Sam Chamberlain, Naphtali Rishe, Minglin Deng*

### Constraint Databases

On Capturing First-Order Topological Properties of Planar Spatial Databases........................................187  
*Bart Kuijpers, Jan Van den Bussche*

On the Orthographic Dimension of Constraint Databases.......................199  
*Stéphane Grumbach, Philippe Rigaux, Luc Segoufin*

### Index Structures

When Is “Nearest Neighbor” Meaningful?.............................................217  
*Kevin Beyer, Jonathan Goldstein, Raghu Ramakrishnan, Uri Shaft*

On Rectangular Partitionings in Two Dimensions: Algorithms, Complexity, and Applications........................................236  
*S. Muthukrishnan, Viswanath Poosala, Torsten Suel*

Optimal Dynamic Range Searching in Non-replicating Index Structures.....257  
*K. V. Ravi Kanth, Ambuj Singh*

Index Structures for Path Expressions.............................................277  
*Tova Milo, Dan Suciu*

### Semi-structured Data

Schemas for Integration and Translation of Structured and Semi-structured Data........................................296  
*Catriel Beeri, Tova Milo*

In Search of the Lost Schema..........................................................314  
*Stéphane Grumbach, Giansalvatore Mecca*

### Mediation

Tableau Techniques for Querying Information Sources through Global Schemas........................................332  
*Gösta Grahne, Alberto O. Mendelson*

Optimizing Large Join Queries in Mediation Systems.............................348  
*Ramana Yerneni, Chen Li, Jeffrey Ullman, Hector Garcia-Molina*
Computational Issues

Incremental $FO(+, <) \text{ Maintenance of All-Pairs Shortest Paths for Undirected Graphs after Insertions and Deletions}$ ........................................... 365

Chaoyi Pang, Ramamohanarao Kotagiri, Guozhu Dong

A Framework for the Investigation of Aggregate Functions in Database Queries ................................................................. 383

Luca Cabibbo, Riccardo Torlone

Discovering Frequent Closed Itemsets for Association Rules ............... 398

Nicolas Pasquier, Yves Bastide, Rafik Taouil, Lotfi Lakhal

Views

View Disassembly ........................................................................ 417

Parke Godfrey, Jarek Gryz

Answering Queries Using Materialized Views with Disjunctions ........ 435

Foto N. Afrati, Manolis Gergatsoulis, Theodoros Kavalieros

Selection of Views to Materialize Under a Maintenance Cost Constraint ... 453

Himanshu Gupta, Inderpal Singh Mumick

The Data Warehouse of Newsgroups ............................................. 471

Himanshu Gupta, Divesh Srivastava

Author Index .................................................................................. 489
