APPROACHES TO SCALING OF TRACE GAS FLUXES IN ECOSYSTEMS

Edited by

A.F. BOUWMAN

*National Institute of Public Health and Environment Protection,
P.O. Box 1, 3720 BA Bilthoven, The Netherlands*

Report of the workshop

"Scaling of trace gas fluxes between terrestrial and aquatic ecosystems and the atmosphere"

Organized by

International Soil Reference and Information Centre (ISRIC)

ELSEVIER

AMSTERDAM - LAUSANNE - NEW YORK - OXFORD - SHANNON - SINGAPORE - TOKYO

TABLE OF CONTENTS

Foreword	vii
Acknowledgements	ix
1. Towards reliable global bottom-up estimates of temporal and spatial patterns of emissions of trace gases and aerosols from land-use related and natural sources <i>A.F. Bouwman, R.G. Derwent and F.J. Dentener</i>	1
2. Methods for stable gas flux determination in aquatic and terrestrial systems <i>R.L. Lapitan, R. Wanninkhof and A.R. Mosier</i>	27
3. Some recent developments in trace gas flux measurement techniques <i>O.T. Denmead, R. Leuning, D.W.T. Griffith and C.P. Meyer</i>	67
4. Working group report: How can fluxes of trace gases be validated between different scales? <i>W.A.H. Asman, M.O. Andreae, R. Conrad, O.T. Denmead, L.N. Ganzeveld, W. Helder, T. Kaminski, M.A. Sofiev and S.E. Trumbore</i>	85
5. Experimental designs appropriate for flux determination in terrestrial and aquatic ecosystems <i>D. Fowler</i>	99
6. Toward the use of remote sensing and other data to delineate functional types in terrestrial and aquatic systems <i>J.E. Estes and T.R. Loveland</i>	123
7. Working group report: How can we best define functional types and integrate state variables and properties in time and space ? <i>S. Seitzinger, J.-P. Malingreau, N.H. Batjes, A.F. Bouwman, J.P. Burrows, J.E. Estes, J. Fowler, M. Frankignoulle and R.L. Lapitan</i>	151
8. Modelling carbon dioxide in the ocean: A review <i>D. Archer</i>	169
9. Simulation models of terrestrial trace gas fluxes at soil microsites to global scales <i>D.S. Schimel and N.S. Panikov</i>	185
10. The application of compensation point concepts in scaling of fluxes <i>R. Conrad and F.J. Dentener</i>	203

11.	Working group report: Relations between scale, model approach and model parameters <i>J.J. Middelburg, P.S. Liss, F.J. Dentener, T. Kaminski, C. Kroeze, J.-P. Malingreau, M. Novák, N.S. Panikov, R. Plant, M. Starink and R. Wanninkhof</i>	217
12.	Validation of model results on different scales <i>M.A. Sofiev</i>	233
13.	Role of isotopes and tracers in scaling trace gas fluxes <i>S.E. Trumbore</i>	257
14.	Inverse modelling approaches to infer surface trace gas fluxes from observed atmospheric mixing ratios <i>M. Heimann and T. Kaminski</i>	275
15.	Working group report: How should the uncertainties in the results of scaling be investigated and decreased ? <i>R.G. Derwent, A.R. Mosier, S. Bogdanov, J.H. Duyzer, V. Garçon, S. Houweling, M.A. Sofiev, H.A.C. Denier van der Gon, F. Wania and R. Wanninkhof</i>	297
16.	Current and future passive remote sensing techniques used to determine atmospheric constituents <i>J.P. Burrows</i>	315
