

Assessment of Non-Point Source Pollution in the Vadose Zone

Dennis L. Corwin
Keith Loague
Timothy R. Ellsworth
Editors

American Geophysical Union
Washington, DC

Dedication to R. J. Wagenet	ix
Preface	
<i>D. L. Corwin, K. Loague, and T. R. Ellsworth</i>	xi
Advanced Information Technologies: GIS, Remote Sensing, Geostatistics, and Solute Transport Modeling	
Introduction: Assessing Non-Point Source Pollution in the Vadose Zone with Advanced Information Technologies	
<i>D. L. Corwin, K. Loague, and T. R. Ellsworth</i>	1
Solute Transport Modeling	
Options for Modeling Ground Water Pollution Potential by Dissolved Chemicals	
<i>W. A. Jury and P.-H. Tseng</i>	21
Modeling Subsurface Contaminant Reactions and Transport at the Watershed Scale	
<i>J.-P. Gwo, G. V. Wilson, P. M. Jardine, and E. F. D'Azevedo</i>	31
Groundwater Vulnerability Assessment: Hydrogeologic Perspective and Example from Salinas Valley, California	
<i>G. E. Fogg, E. M. LaBolle, and G. S. Weissmann</i>	45
Validation Approaches for Field-, Basin-, and Regional-Scale Water Quality Models	
<i>D. J. Mulla and T. M. Addiscott</i>	63
Quantification of Spatial Variability: Geostatistics, Spatial Statistics, Fuzzy Logic, and Fractals	
Sampling and Spatial Analysis Techniques for Quantifying Soil Map Unit Composition	
<i>R. B. Ferguson and G. W. Hergert</i>	79
Strategies for Improving Spatial Variability Assessments	
<i>A. W. Warrick, J. A. Vargas-Guzmán, S. Mayer, M. Restrepo, and T. R. Ellsworth</i>	93
Incorporating Spatial Variability Into Existing Soils Databases	
<i>R. S. Yost, X. Wang, R. E. Green, C. Sangchayoswat, and C. S. Smith</i>	107
Identifying Effective Parameters for Solute Transport Models in Heterogeneous Environments	
<i>S. Mayer, T. R. Ellsworth, D. L. Corwin, and K. Loague</i>	119
Fuzzy Inference of Soil Patterns: Implications for Watershed Modeling	
<i>A.-X. Zhu</i>	135
Application of Fractals to Soil Properties, Landscape Patterns, and Solute Transport in Porous Media	
<i>J. W. Crawford, P. Baveye, P. Grindrod, and C. Rappoldt</i>	151

CONTENTS

Remote Sensing and Noninvasive Techniques

Remote Sensing in Hydrology	
<i>E. T. Engman</i>	165
Spatially Delineating Actual and Relative Evapotranspiration from Remote Sensing to Assist Spatial Modeling of Non-Point Source Pollutants	
<i>W. G. M. Bastiaanssen, R. Sakthivadivel, and A. Van Dellen</i>	179
Geospatial Measurements of Soil Electrical Conductivity to Assess Soil Salinity and Diffuse Salt Loading from Irrigation	
<i>J. D. Rhoades, D. L. Corwin, and S. M. Lesch</i>	197
Estimating Near-Surface Soil Hydraulic Properties with Microwave Remote Sensing	
<i>T. Schmugge</i>	217

Transfer Functions, Estimation Methods, and Parameterization

The Current Status of Pedotransfer Functions: Their Accuracy, Reliability, and Utility in Field- and Regional-Scale Modeling	
<i>Y. A. Pachepsky, W. J. Rawls, and D. J. Timlin</i>	223
Application of Artificial Neural Networks for Developing Pedotransfer Functions of Soil Hydraulic Parameters	
<i>J. H. M. Wösten and S. Tamari</i>	235
Parameterizing Flow and Transport Models for Field-Scale Applications in Heterogeneous, Unsaturated Soils	
<i>M. L. Rockhold</i>	243

Scale and Scaling Problems

Physical Scales and Spatial Predictability of Transport Processes in the Environment	
<i>P. Baveye and C. W. Boast</i>	261

Case Study and Economics

Spatial and Temporal Variation in Nematicide Leaching, Management Implications for a Costa Rican Banana Plantation	
<i>J. J. Stoorvogel, L. Kooistra, and J. Bouma</i>	281
Estimating a Societal Value of Earth Science Information in the Assessment of Non-Point Source Pollutants	
<i>R. L. Bernknopf, K. A. Lenkeit, L. B. Dinitz, and K. Loague</i>	291

Issues and Perspectives

Science, Information, Technology, and the Changing Character of Public Policy in Non-Point Source Pollution	
<i>J. L. King and D. L. Corwin</i>	309
Modeling Non-Point Source Pollutants in the Vadose Zone: Back to the Basics	
<i>D. L. Corwin, J. Letey, Jr., and M. L. K. Carrillo</i>	323

Epilogue

Current and Future Trends in the Development of Integrated Methodologies

for Assessing Non-Point Source Pollutants

J. P. Wilson 343

Are Advanced Information Technologies the Solution to Non-Point Source Pollution Problems?

K. Loague, D. L. Corwin, and T. R. Ellsworth 363
