| Introduction | xiii |
| Notes on Style | xxxix |
| List of Short Titles | xlv |

January–March 1850
Danger to Smithsonian in attempting too much—Bulletin to Alexander Dallas Bache: “repugnant” letter from John Locke, Andrew Johnson’s attitude toward the Smithsonian (Doc. 4)—Visit to President Taylor—On use of scientist—Building collapse—Fatal fall of workman; Henry on his duties as secretary; success of lecture series; criticism of Smithsonian Building—Testimony in telegraph case—Death of John C. Calhoun.

April–June 1850
John Torrey warns of Louis Agassiz’s “erroneous doctrines” (Doc. 22)—Charles Babbage on tree-ring analysis—Role of Smithsonian assistants—On optical Doppler effect—Samuel F. B. Morse’s role in development of telegraph—Morse accuses Henry of “contemptuous arrogance” (Doc. 30)—Crystal Palace Exhibition—Elections in District of Columbia and progress in construction of the Smithsonian Building—Bache lambastes American Journal of Science.

July–September 1850
Building difficulties resolved—Spencer F. Baird appointed assistant secretary—To Bache: “I think the Institution will soon be fairly afloat” (Doc. 46)—Sudden death of President Taylor—Assistant Secretary Charles Coffin Jewett on Baird’s appointment: “Prof. H. will not be continually suspicious & jealous of him as he has been of me” (Doc. 49)—Jewett’s stereotyped library catalog and cataloging rules—Address to the American Association for the Advancement of Science (Doc. 54)—Smithsonian publication policy—Storm warnings by telegraph.

October–December 1850
Introduction of William Jones Rhees—Complaint about Crystal Palace Exhibition—Memorandum on improvement of the Mall—Consulta-
tions with Andrew Jackson Downing—Proposal for system of international exchange of scientific publications—Mediating dispute between Matthew Fontaine Maury and Bache—Edward Sabine on cooperation in meteorology.

January–March 1851

April–June 1851
George Robins Gliddon ridicules Henry and Smithsonian—Locke on his “offensive letter” to Henry (Doc. 106)—Collaboration with American Antiquarian Society—Intervention of President Fillmore on behalf of Downing—Death of James Henry—Arrangements with American Antiquarian Society about Increase A. Lapham’s memoir—Experiments with Foucault pendulum—Report on Downing’s progress.

July–September 1851
Defending Downing—James P. Espy’s plan for producing rain—American exhibits at Crystal Palace Exhibition—Experiments on cohesion and on conduction of sound—Request for Henry’s opinion of Foucault pendulum—Science instruction at United States Naval Academy—Remarks on Egyptian artifacts—Bulletin to Bache: distressing support among scientists for Henry M. Paine, AAAS “becoming powerful for good or evil” (Doc. 138)—Honorary doctorate from Harvard—Inquiry about 1839 letter to Morse—From Sabine on meteorological cooperation and international exchange.

October–December 1851
“I am constantly called upon to decide upon, not what ought to be given, but what can be” (Doc. 148)—From Bache in Maine: regret at Jefferson Davis’s resignation from Senate, strategy concerning national academy of science, dispute with Maury over Gulf Stream, evaluation of Robert Hare—Bulletin to Bache: difficulties with Hare’s donation of apparatus, progress on Mall improvements and Smithsonian publications—Appointment to commission to test marble for the Capitol Building—Letter to Marsh: response to Stephen A. Douglas’s criticism of Smithsonian, Downing’s improvements on Mall, speculations on presidential election—To Dorothea Dix on challenges of being secretary—Henry’s version of 1848 meeting with Morse—Arrangements with Arnold Guyot concerning meteorological system.
Contents

January–March 1852 272
Danger from “internal disension” (Doc. 165)—Letter from disgruntled meteorological observer—Maury’s meteorological plans—Consultation with Bache on meteorology—Policy toward misguided authors—Rumored resignation of James Carnahan, president of Princeton; plan for national university in Albany—Support for Espy’s appropriation—Letter from Downing: “I will make the Capital ‘blossom like the rose’” (Doc. 175)—Mary E. Howard Schoolcraft’s complaints about Harriet Henry—Request of Babbage for information on James Smithson—Request for army meteorological data—Sabine pledges Royal Society cooperation in international exchange system—Experiments with Espy on heated air.

April–June 1852 300
Experiments with blowing machine—Smithson’s effects—Experiments on galvanic light; thoughts on crystallization—Proposal for analyzing light from comet—“Very important that I keep clear of all connection with the patent office” (Doc. 193)—To Hare on his apparatus and on Espy’s meteorological theories—To Sabine on international exchange and meteorology—Offer to mediate dispute between Charles Wilkes and Gray—On auroras and shooting stars—Anguished letter from Leonard D. Gale—Strategy for mediating Wilkes-Gray dispute—To Lewis R. Gibbes on Smithsonian lectures and publications, and scientific instruments—Offer of chair of chemistry at medical department of University of Pennsylvania—Gray’s appreciation for Henry’s “friendly intervention” (Doc. 215)—Bulletin to Bache: public defense of Smithsonian program, commission to examine Robert Grant’s light, method of observing solar prominences, work on sunspots used by Angelo Secchi without credit.

July–September 1852 356
Praise for Henry’s defense of Smithsonian—Alonzo Potter’s plans for University of Pennsylvania—“The present is almost a crisis in the history of the Institution” (Doc. 223)—Resolution of Wilkes-Gray dispute—Bulletin to Bache: investigation of Grant’s light, Agassiz’s complaints about Charles Girard, problems at Patent Office—Trip to New York to examine Grant’s light—Offer of chair of chemistry at the University of Virginia—Attempt to resolve Agassiz-Girard dispute—Election as president of American Association for the Advancement of Education—Election as president of Metropolitan Mechanics’ Institute—Appointment to the United States Light-House Board.

October–December 1852 392
Attacks on Smithsonian—Refereeing procedures—Democratic election victory—Observations on winds—Publication of meteorological
January–March 1853
On publication of foreign memoirs; argument for subordination of library and museum—Request for naval cooperation in procuring and transporting specimens—George Ord on museums—Geomagnetic observatory at Smithsonian—Letter from India.

April–June 1853
Request for Henry's opinion on "spirit rappings and table tippings" (Doc. 262)—"The programme is too broad for our income" (Doc. 264)—To Gray: "The support of a large library and an extensive museum is incompatible with the limited income of the institution" (Doc. 266)—Request for clarification of Henry's contributions to telegraph—Nomination as provost of University of Pennsylvania—Complaint about "fantastic and almost useless building" (Doc. 272)—Report on acoustics, heating, and ventilation of Capitol Building.

July–September 1853

October–December 1853
Proposal for government purchase of Smithsonian Building—Reflections on presidency of Princeton—Questions on aurora borealis—Offer of endowed professorship at Princeton—Hall on Henry's early telegraph work—On spiritualism: "I am doomed to perpetual skepticism" (Doc. 299)—Request for navy appropriation for care of government specimens—Refereeing problems—On oversight duties: "I am responsible for all blunders" (Doc. 303)—Appointment to commission to examine marble for Capitol Building.
