PREAMBLE	V	SYSTEMS OF FISSURES	43
		<i>The network of deep-seated fissures</i>	43
PREFACE	VII	<i>The supergene networks of fissures and pores</i> ...	44
FOREWORD	IX	THE EFFECTS OF POROSITY ON WEATHERED MATERIAL	48
ACKNOWLEDGEMENTS	XI	DISCUSSION	50
INTRODUCTION	1		
PART 1.		PART 2.	
GENERAL CONCEPTS	5	PATTERNS OF WEATHERING	53
CHAPTER 1.		CHAPTER 4.	
WEATHERING AND ALTERITES	7	MICROMORPHOLOGICAL DESCRIPTIONS	55
DEFINITIONS	7	THE DEGREE OF WEATHERING	55
<i>Weatherability</i>	8	SECONDARY POROSITY	57
DIFFERENTIATION OF THE ALTERITES	26	<i>Pore-space along transmineral fractures</i>	57
<i>Alteroplasmation and pedoplasmation</i>	26	<i>Pore-space along intermineral fractures</i>	58
<i>The concept of isalterite</i>	27	<i>Intramineral pore-space</i>	59
<i>The concept of alloterite</i>	28	PATTERNS OF ALTERATION AND WEATHERING ...	80
<i>The concept of isovolume</i>	30	<i>Conservation of volumes</i>	80
<i>Relative and absolute accumulations</i>	31	<i>Penetration in a mineral:</i>	
CHAPTER 2.		<i>the pathways of weathering</i>	80
SAMPLING	35	DESCRIPTIONS AND CLASSIFICATION	82
IN THE PROFILE	35	<i>Pellicular pattern of organization</i>	82
IN THE TOPOSEQUENCE	36	<i>Linear and banded patterns</i>	85
IN THE LANDSCAPE	37	<i>Irregular patterns</i>	87
CHAPTER 3.		<i>Complex patterns</i>	91
THE SYSTEMS OF PORE-SPACE	39	CHAPTER 5.	
DEFINITION, CLASSIFICATION	39	PARTLY WEATHERED MINERALS ..	123
CONTACT MICROSYSTEMS	40	MORPHOLOGY OF THE PRIMARY CORES AND RESIDUES	123
PLASMA MICROSYSTEMS	41	MORPHOLOGY OF THE SECONDARY PRODUCTS ...	125
<i>Primary plasmas</i>	41	PATTERNS OF SECONDARY POROSITY	126
<i>Secondary plasmas</i>	42	<i>Microporosity</i>	126
		<i>Mesoporosity</i>	126

PART 3.	
ALTEROMORPHS	149
CHAPTER 6.	
DEFINITIONS	151
CHAPTER 7.	
PRESERVATION OF SHAPES	
AND VOLUMES	153
GEOMETRICAL CRITERIA: GENERAL CASES	154
<i>Iso-alteromorphs</i>	154
<i>Meso-alteromorphs</i>	154
<i>Kata-alteromorphs</i>	154
GEOMETRICAL CRITERIA: PARTICULAR CASES ...	172
<i>Pseudomorphs</i>	172
<i>Echino-alteromorphs</i>	172
<i>Phanto-alteromorphs</i>	173
<i>Crypto-alteromorphs</i>	174
CHAPTER 8.	
THE CONTENT	
OF ALTEROMORPHS	205
THE PROPORTION OF SOLID AND PORE VOLUMES .	206
<i>Holo-alteromorphs</i>	206
<i>Koilo-alteromorphs</i>	206
<i>"Poro"-alteromorphs</i>	221
PORE VOLUME AS A DISTINGUISHING CRITERION .	221
<i>Alveoporo-alteromorphs</i>	221
<i>Centroporo-alteromorphs</i>	223
<i>Phylloporo-alteromorphs</i>	224
<i>Retiporo-alteromorphs</i>	225
SOLID VOLUME AS A DISTINGUISHING CRITERION .	237
<i>Botryo-alteromorphs</i>	238
<i>Glomero-alteromorphs</i>	238
<i>Septo-alteromorphs</i>	239
COMPLEX "PORO"-ALTEROMORPHS	242
CHAPTER 9.	
CRITERIA FOR A GENETIC	
CLASSIFICATION	259
COMPOSITE ALTEROMORPHS	259
<i>Polygenetic alteromorphs</i>	259
<i>Polyphase alteromorphs</i>	277

CHAPTER 10.	
ALTEROMORPHS AND PROCESSES	
OF ACCUMULATION	307
CUMULO-ALTEROMORPHS	307
CHAPTER 11.	
"PORO"-ALTEROMORPHS	
AND FURTHER EVOLUTION	315
CHAPTER 12.	
DISCUSSION	343
PART 4.	
LITHERELICS,	
ALTERORELICS, NODULES,	
PISOLITHS	345
CHAPTER 13.	
DEFINITIONS	347
LITHERELICS	347
ALTERORELICS	347
PEDORELICS	348
CONCRETIONS	348
PISOLITHS	348
CHAPTER 14.	
COMPOSITION, ORIGIN	
AND MORPHOLOGY	349
LITHERELICS	349
<i>Composition</i>	349
<i>Point of origin</i>	349
<i>Morphology</i>	350
ALTERORELICS	361
<i>Allochthonous alterorelics</i>	361
<i>Autochthonous alterorelics</i>	361
PEDORELICS	362

CHAPTER 15.		CHAPTER 17.	
EVOLUTION	363	PISOLITHS IN BAUXITE	425
PHYSICAL DISAGGREGATION	363	INTRODUCTION	425
<i>Process of disaggregation</i>	363	PROCESSES OF FORMATION	425
<i>Weatherability</i>	363	DISTRIBUTION IN THE LANDSCAPE	426
CHEMICAL WEATHERING	364	<i>Erosion of the bauxitic profiles</i>	426
CENTRIPETAL CORTIFICATION	378	<i>Deposition of clayey material on the slopes</i>	427
<i>Process of induration and textural evolution</i>	378	<i>Evolution of the clayey material</i>	428
<i>Persistent minerals within areas of cortification</i>	378	<i>Process of induration and development</i>	
<i>Pedoplasmation of the residual textures</i>	379	<i>of pisolitic bauxite</i>	428
CENTRIFUGAL CORTIFICATION	389	<i>Profile of the pisolitic bauxite</i>	428
<i>Process of development of the peripheral</i>		MICROMORPHOLOGY	429
<i>stress cutans</i>	389	<i>The nucleus</i>	429
<i>Development of an accretion cortex</i>	389	<i>The cortex</i>	429
<i>Mineral content of the accretion cortex</i>	390	<i>The internodular matrix</i>	429
FURTHER EVOLUTION	403	EVOLUTION AND DEGRADATION	443
<i>Textural modification in transported nodules</i>	403	<i>First stage: iron depletion in the bauxite</i>	443
<i>Interconnected and bridged nodules</i>	403	<i>Second stage: alveolization</i>	
<i>Cortification and the formation of concretions</i>	403	<i>of the internodular matrix</i>	443
CHAPTER 16.		<i>Third stage: destruction of the pisoliths</i>	443
BRIDGED NODULES		<i>Fourth stage: infilling of the pore volumes</i>	443
AND DEVELOPMENT		CHAPTER 18.	
OF IRON CRUST	415	SECONDARY OXIDES	
EXTENSION OF THE BRIDGED TEXTURES	415	AND HYDROXIDES	459
MICROMORPHOLOGY	415	REFERENCES	
DISTRIBUTION OF THE INDURATED		AND BIBLIOGRAPHY	469
AND UNINDURATED PLASMAS	416	REFERENCES USED IN THE TEXT	469
<i>The nuclei</i>	416	ADDITIONAL BIBLIOGRAPHY CONCERNING	
<i>The concentric and interconnecting cortices</i>	416	THE SAMPLES DESCRIBED	470
<i>The large volumes of plasma</i>	416	GLOSSARY	473
<i>The small volumes of plasma</i>	417	INDEX	479
DISCUSSION	417	ABOUT THE AUTHOR	495
