## Information Filtering

A Study of Belief Revision in the Context of Adaptive Information Filtering  
*Raymond Lau, Arthur H.M. ter Hofstede, Peter D. Bruza*

Evaluating Performance Indicators for Adaptive Information Filtering  
*Carsten Lanquillon*

## Agent / Active Networks I

Optimizing Data-Mining Processes: A CBR Based Experience Factory for Data Mining  
*Kai Bartlmae*

## Data Mining

Analysing Warranty Claims of Automobiles: An Application Description Following the CRISP-DM Data Mining Process  
*Jochen Hipp, Guido Lindner*

An Adaptive Method of Numerical Attribute Merging for Quantitative Association Rule Mining  
*Jiuyong Li, Hong Shen, Rodney Topor*

Discovering Tendency Association between Objects with Relaxed Periodicity and Seismology Application  
*Tang Changjie, Rynson W. H. Lau, Yang Lu, Yin Huabei, Yu Zhonghua, Xiang Limin, Qing Li, Tianqing Zhang*

## Web Databases

Algebraic Operations on Bags in a Web Warehouse  
*S. S. Bhowmick, S. K. Madria, W.-K. Ng, E. P. Lim*

A Distributed Search System Based on Markov Decision Processes  
*Yipeng Shen, Dik Lun Lee, Lian Wen Zhang*

A Framework for Warehousing the Web Contents  
*Yan Zhu*
User Interface

Dynamic Generation and Browsing of Virtual WWW Space Based on User Profiles .................................................. 93
Norihide Shinagawa, Hiroyuki Kitagawa

SemiLog: A Logic-Based Query Language for Hierarchical Data in Web Documents ............................................. 109
Seung-Jin Lim, Yiu-Kai Ng

Reduction of Object Overlap in Three-Dimensional Browsing Space for Internet Data ........................................ 121
Toshihiro Kakimoto, Yahiko Kambayashi

Multimedia

ScoopCast: Dynamic Video Production and Delivery from Indexed Live Video Stream ............................................ 133
Kazutoshi Sumiya, Tomoaki Kawaguchi, Akthiro Doi, Katsumi Tanaka, Kuniaki Uehara

About Tours in the OTHY Hypermedia Design ...................... 146
Franck Barbeau, José Martinez

Aspect-Oriented Design (AOD) Technique for Developing Distributed Object-Oriented Systems over the Internet ..................... 156
Joon-Sang Lee, Sang-Yoon Min, Doo-Hwan Bae

Modeling

Modeling Enterprise Objects in a Virtual Enterprise Integrating System: ViaScope .............................................. 166
Xiaochun Yang, Guoren Wang, Ge Yu, Dik Lun Lee

Object-Oriented Design of an E-Commerce System for Retailing Business ......................................................... 176
Simon Fong, Chan Se-Leng

Extended Awareness Support for Cooperative Work in Non-WYSIWIS Condition ............................................... 186
Yusuke Yokota, Hiroyuki Tarumi, Yahiko Kambayashi

Information Retrieval

Query Length, Number of Classes and Routes through Clusters: Experiments with a Clustering Method for Information Retrieval ........ 196
Patrice Bellot, Marc El-Bèze
Self-Organizing Neural Networks for Data Projection .......................... 206
   Mu-Chun Su, Hisao-Te Chang

ROC Performance Evaluation of Web-Based Bibliographic Navigator
Using Extended Association Rules .................................................. 216
   Minoru Kawahara, Hiroyuki Kawano

Workflow

Specifying and Reasoning about Workflows with Path Constraints ........ 226
   Wenfei Fan, Scott Weinstein

Prototyping Web-Based SmartFlow Multi-application System Using Smart
Card Technology ................................................................. 236
   Patrick C. K. Hung, Kamalakar Karlapalem

Temporally Constrained Workflows .............................................. 246
   Eleana Kafeza, Kamalakar Karlapalem

Applications

A Simple MDCT-Based Speech Coder for Internet Applications .......... 256
   Kwong Cheuk Fai, Wing Man Pang, Hon Cheung Wu, Keang-Po Ho

Supporting Real-Time Faxing over the Internet ............................. 264
   K. Jin, S.C. Hui, C.K. Yeo

Developing Quality of Service Capabilities for Distributed Imagery
Dissemination Service ............................................................. 274
   Andrew K Lui, Mark W Grigg, Michael J Owen

Agent / Active Networks II

A Unified Model of Internet Scale Alerting Services ........................ 284
   Annika Hinze, Daniel Faensen

Supporting Internet Applications Beyond Browsing: Trigger Processing
and Change Notification .......................................................... 294
   Ling Liu, Calton Pu, Wei Tang

Mobility and Distributed Databases I

Improving Computer Support for Cooperative Applications over Internet. 305
   J.C. Burguillo, M.J. Fernández, M. Llamas, L. Anido
A Data Registry-Based Approach for Semantic Representation and Exchange of XML Documents ........................................... 311
Hong-Seok Na, Jin-Seok Chae, Doo-Kwon Baik

Organization of Mobile Networks Under Privacy Constraints .................. 317
Toshihiko Hamano, Hiroki Takakura, Yahiko Kambayashi

Protocol I

Mean Time Offset Protocol for Cluster of Auction Servers over TCP/IP Network ................................................................. 323
Kok Meng Yew, R.M. Zahidur, Sai Peck Lee

A Comparative Analysis of Transition Mechanisms for IPv6/IPv4 Routing Environment ......................................................... 329
Waleed Hosny Sayed, Tarek M. Kamel, Samir Shaheen

Scalable Protocols for the Internet to Reduce Service Time and Server Load 346
P. Krishna Reddy, Masaru Kitsuregawa

Distributed Systems

An Integrated Approach for Flexible Workflow Modeling .................... 354
Yongjie Ren, K.F. Wong, B.T. Low

Integrating Different Signature Purposes in Workflow Systems – A Case Study .............................................................. 360
Karl R.P.H. Leung, Lucas C.K. Hui, Ricky W.M. Tang

Management of Workflow over the Web Supporting Distributed Process Evolution .......................................................... 367
Sang-Yoon Min, Doo-Hwan Bae, Sung-Chan Cho, Young-Kwang Nam

Data Placement and Retrieval Policy For Serving Video Operations through Sequential Access in Video Server ......................... 373
Keun-Hyung Kim, Seog Park

A Buffering/Caching Mechanism for Continuous Media Players .......... 379
Zhiyong Peng

Applications

An Agent-Based Environment for Remote Diagnosis, Supervision and Control ............................................................... 385
Reinhold Ploesch, Rainer Weinreich
The Delivery of Effective Integrated Community Care with the Aid of Agents

Martin D. Beer, Trevor J. M. Bench-Capon, Andrew Sixsmith

Application of Aglet Technology

Rosane Maria Martins, Magali Ribeiro Chaves, Luci Pirmez, Luiz F. Rust

An Internet-Integrated Manufacturing System Prototype

Stephen Chi Fai Chan, Vincent Ng, K.M. Yu, Albert Au

Information Retrieval and Filtering

Example-Based Chinese Text Filtering Model

Lin Hongfei, Zhan Xuegang, Yao Tianshun

Navigation-Dependent Web-Views: Defining and Controlling Semantic Unit of Web Pages

Hidenari Kiyomitsu, Katsumi Tanaka

An Efficient Chinese Word Segmentation Algorithm for Chinese Information Processing on the Internet

P.K. Wong

Push-Based News Delivery with CORBA

Gary Yat Chung Wong, Andy Hon Wai Chun

Web Technologies

Mutual Synergy between Web Caches

Ahmed Mokhtar, Gerardo Rubino

Architecture of Object Web

Gary Yat Chung Wong, Andy Hon Wai Chun

JWeb: An Innovative Architecture for Web Applications

Mario Bochicchio, Roberto Paiano, Paolo Paolini

XML Arouse the Web Architecture Revolution

Chai Xiaolu, Cao Jing, Gao Yongqing, Shi Baile

E-Commerce

Knowledge Beads - Approach for Knowledge Representation and Market Place Negotiations for Internet Agents

Simon Fong, Chin Kok Poh
AOM: An Agent Oriented Middleware Based on Java
Kwang-Jin Paek, Tai-Yun Kim

CORBA-based Open Authentication Service of Electronic Commerce
Kyung-Ah Chang, Byung-Rae Lee, Tai-Yun Kim

A Publish/Subscribe Framework: Push Technology in Electronic Commerce
Edward C. Cheng

Mobility and Distributed Databases II
SemNet: A Semantic Network for Integration of Databases
Jeong-Oog Lee, Doo-Kwon Baik

Reliable Communication Service for Mobile Agent Based on CORBA
Byung-Rae Lee, Kyung-Ah Chang, Tai-Yun Kim

Protocol II
Technology of Image Coding for Cell Losses in ATM Transmission
Jian Cong, Suo Cong, Zaimin Li, Gansha Wu, Wen Jin
