ASIS '99

Proceedings of the 62nd ASIS Annual Meeting

Volume 36 1999

Washington, DC
October 31-November 4, 1999

Knowledge: Creation, Organization and Use

Technical Program Chair
Marjorie M.K. Hlava
Access Innovations, Inc.

Proceedings Editor
Larry Woods
University of Iowa

Published for the American Society for Information Science

by
Information Today, Inc.

Medford, NJ
TABLE OF CONTENTS

ASIS Officers and Committees .................................................................................................................. iii
Preface ...................................................................................................................................................... v

PART I: CONTRIBUTED PAPERS

HOW WE SEARCH: THE WEB
Information Seeking on the Web — An Integrated Model of Browsing and Searching
  Chun Wei Choo, Brian Detlor, and Don Turnbull ................................................................. 3
Envisioning the Web: User Expectations about the Cyber-experience
  Craig Scull, Allen Milewski, and David Millen ................................................................. 17

DIGITAL IDS AND CODES
A Proposal for an International Standard Object Number
  David Austin ...................................................................................................................................... 25

DIGITAL LIBRARIES
Outline and Preliminary Evaluation of the Classical Digital Library Model
  Steven L. MacCall, Ana D. Cleveland, and Ian E. Gibson ................................................ 33
The Seamless Web-based Library: A Meta Site for the 21st Century
  Stephen C. Weiss ......................................................................................................................... 47
Indirect Geospatial Referencing Through Place Names in the Digital Library: Alexandria Digital Library
  Experience with the Developing and Implementing Gazetteers: Analysis and Preliminary Evaluation of the
  Classical Digital Library Model
  Linda L. Hill and Qi Zheng ......................................................................................................... 57

STUDYING STUDENTS SEARCHING
Web Search Engines for Children: A Comparative Study and Performance Evaluation of
  Yahooligans!, Ask Jeeves for Kids™ and Super Snooper™
  Dania Bilal ...................................................................................................................................... 70
Information Seeking on the Web: Navigational Skills of Grade-Six Primary School Students
  Andrew Large and Jamshid Beheshti, Haidar Moukdad ..................................................... 84
Evaluation of Web Search Engines by Undergraduate Students
  Louise T. Su and Hsin-liang Chen .............................................................................................. 98

KNOWLEDGE MANAGEMENT
Developing a Framework for Managing Knowledge in Enterprises
  Adeline du Toit ............................................................................................................................ 115
Cooperation, Coordination and Cultural Change for Effective Information Management in the
  Hybrid Academic Library
  Christine Dugdale .................................................................................................................... 123
Adapting Knowledge Management to a Heterogeneous Information Environment: A Case Study of County Judges and Clerks in Rural Texas Courts
Sanda Erdelez and Philip Doty ................................................................. 135

RULE LEARNING, TEXT MINING & VIRTUAL COMMUNITIES
Knowledge Guided Rule Learning
Venkateswarlu Kolluri and Douglas P. Metzler ....................................... 146

Planning and Implementing a High Performance Knowledge Base
Edwin M. Cortez .................................................................................. 161

METADATA
Using Ordinary Language to Access Metadata of Diverse Types of Information Resources: Trade Classifications and Numeric Data
Youngin Kim, Barbara Norgard, Aitao Chen and Fredric Gey ............ 172

Icons As Visual Form of Knowledge Representation on the World Wide Web: A Semiotic Analysis
Yan Ma and Virgil Diodato ................................................................. 181

Contextual Classification in the Metadata Object Manager (M.O.M.)
Thomas Pole ..................................................................................... 194

Utilizing Faceted Structures for Information Systems Design
Uta Priss and Elin Jacob .................................................................. 203

ELECTRONIC PUBLICATIONS
Electronic Publication of Health Information in an Object-Oriented Environment
Maureen Prettyman, Robert Antonucci, Paul Lynch, and Lee Mericle .......... 213

Retrospective Conversion of Journal Titles to Online Formats: Which Disciplines Make Good Choices?
Eileen E. Pritchard ........................................................................ 228

Electronic Theses and Dissertations at the University of Virginia
Cristina W. Sharretts, Jackie Shieh, and James C. French ..................... 240

INTERACTION, NAVIGATION AND VISUALIZATION
Users’ Interaction with the World Wide Web: Problems & Problem-solving
William B. Hawk and Peiling Wang .................................................. 256

Temporal Visualization for Legal Case Histories
Chanda Harris, Robert B. Allen, Catherine Plaisant, and Ben Shneiderman 271

WEB POLICIES
Rhetoric and Policy: How Is It Being Used in Pornography and the Internet?
Rodney Marshall ............................................................................ 280

Copyright Management Information in Electronic Forms:
User Compliance and Modes of Delivery
Shelly Warwick and Hong (Iris) Xie .................................................. 292
### KNOWLEDGE CAPTURE AND RE-USE

**Q&A: A System for the Capture, Organization and Reuse of Expertise**  
*Jay Budzik and Kristian Hammond* ............................................................... 302

**The Business Pattern: A New Tool for Organizational Knowledge Capture and Reuse**  
*James Falconer* ................................................................................................. 313

### ANALYSIS AND VISUALIZATION

**Understanding Patterns of User Visits to Web Sites:**  
Interactive Starfield Visualizations of WWW /Log Data  
*Harry Hochheiser and Ben Shneiderman* ........................................................... 331

**Topological Indices of Textual Identity Networks**  
*Gregory H. Leazer and Jonathan Furner* ........................................................... 345

*Mark Rorvig, Michael M. Smith and Aya Uemura* .............................................. 359

**Clustering Terms in Health Care Terminologies**  
*Timothy B. Patrick, MaryEllen C. Sievert, James Ries, Mihail Popescu, James Andrews, and John C. Reid* .............................................................. 365

### INTERACTION, RELEVANCE AND DESIGN

**Rethinking the Reference Interview: From Interpersonal Communication to Online Information Process**  
*Tula Giannini* ........................................................................................................ 373

**Relevance Criteria Uses and Importance: Progress in Development of a Measurement Scale**  
*Linda Schamber and Judy Bateman* ................................................................. 381

**Designing a Visual Interface for Online Searching**  
*Xia Lin* ................................................................................................................. 390

**Modeling the Importance of End-User Relevance Criteria**  
*Judy Bateman* ...................................................................................................... 396

### DIGITAL LIBRARY EVALUATION

*Paul B. Kantor and Tefko Saracevic* ..................................................................... 407

### INFORMATION DISSEMINATION TOOLS

**Active Tools for Better Knowledge Dissemination**  
*Peter Mikulecky and Jaroslava Mikulecká* .......................................................... 420

**Electronic Publications at National Libraries—Now and in the Future**  
*Jörg Berkemeyer* .................................................................................................. 428

**DAPHNE — A Tool for Distributed Web Authoring and Publishing**  
*Zhongdong Zhang, Andreas Heuer, Thomas Engel and Christoph Meinel* .......... 432
SPECIAL POPULATIONS
Information Exchange Networks in Low-Income Neighborhoods: Implications for Community Networking
Ann Peterson Bishop, Susan Shoemaker, Tonyia J. Tidline, and Pamela Salela ................................................. 443

LEArning Portfolio for Accessing Engineering Information for Engineers
Zorana Ercegovac ......................................................................................................................................................... 450

Information Environment of a Military University Campus: An Exploratory Study
Maxine Reneker, Ann Jacobson, Linda Wargo and Amanda Spink ............................................................... 462

DOMAIN SPECIFIC APPLICATIONS
The Identification of Index Terms in Natural Language Object Description
P. Bryan Heidorns ......................................................................................................................................................... 472

Using Ontologies for Knowledge Management: An Information Systems Perspective
Igor Jurisica, John Mylopoulos, and Eric Yu ........................................................................................................... 482

Derivative Bibliographic Relationships Among Theological Works
Richard P. Smiraglia .................................................................................................................................................. 497

DIGITAL LIBRARY SEARCHING
Estimating the Number of Relevant Documents in Enormous Collections
Paul Kantor, Myung-Ho Kim, Ulukbek Ibraev and Koray Atasoy ........................................................................ 507

Information Access for a Digital Library: Cheshire II and the Berkeley Environmental Digital Library
Ray R. Larson and Chad Carson ............................................................................................................................. 515

The Information Quest: A Dynamic Model of User's Information Needs
Paul B. Kantor, Endre Boros, Benjamin Melamed and Vladimir Meñkov ........................................................... 536

KNOWLEDGE ORGANIZATION
Data Stewardship: The Care and Handling of Named Entities
Stephan Greene and Richard Lutz ........................................................................................................................... 546

A Postmodern Theory of Knowledge Organization
Jens-Erik Mai ............................................................................................................................................................. 547

An Empirical Study of Knowledge Structures of Research Topics
Peiling Wang ............................................................................................................................................................... 557

WORK ENVIRONMENTS
Physical Environment as a Resource in Information Work Settings
Laura Neumann ............................................................................................................................................................. 572

Enterprise Information Space: User's View, Developer's View, and Market Approach
Claire Vishik, Adam Farquhar and Reid Smith ......................................................................................................... 587

Collaborative Information Retrieval
Harry Bruce and Raya Fidel .................................................................................................................................... 604
DIGITAL LIBRARIES

Evaluation of Digital Libraries: A DEA Approach
Wonsik Shim and Paul B. Kantor ................................................................. 605

Patterns of Use and Usage Factors for Online Databases in Academic and Public Libraries
Carol Tenopir and Danielle Green ................................................................. 616

REPRESENTING USERS

New Wine and Old Vessels: The Evaluation and Integration of Web Based Information in Well-Established Resources
Jacqueline H. Trolley and Jill O'Neill ............................................................... 628

Pheromonic Representation of User Quests by Digital Structures
Endre Boros, Paul B. Kantor, and David J. Neu ........................................... 633

Models of the Behavior of People Searching the Internet: A Petri Net Approach
Paul B. Kantor and Ragnar Nordlie ............................................................... 643

IMAGE PROCESSING AND RETRIEVAL

Performance of Visual, Verbal, and Combined Video Surrogates
Wei Ding, Dagobert Soergel and Gary Marchionini ........................................ 651

Abby Goodrum and Amanda Spink ............................................................... 665

Text Indexing of Images Based on Graphical Image Content
Timothy B. Patrick, MaryEllen C. Sievert, and Mihail Popescu .......................... 675

An Exploratory Study of Video Browsing, User Interface Designs and Research Methodologies: Effectiveness in Information Seeking Tasks
Tony Tse, Sandor Vegh, Ben Shneiderman and Gary Marchionini ................. 681

THEORY

Does Genre Define the Shape of Information? The Role of Form and Function in User Interaction with Digital Documents
Elaine G. Toms, D. Grant Campbell, and Ruth Blades ..................................... 693

Towards a Theory of the Digital Information Environment
Howard Rosenbaum ....................................................................................... 705

Undergraduates' Information Seeking Behavior:
The Role of Epistemological Development Theories and Models
Ethelene Whitmire ......................................................................................... 713

INVESTIGATING INFORMATION

Watson: Anticipating and Contextualizing Information Needs
Jay Budzik and Kristian Hammond ............................................................... 727

Constructing Indices from Citations in Collections of Research Papers
Shannon Bradshaw and Kristian Hammond .................................................... 741
An Automated Method for Studying Interactive Systems
Berry de Bruijn, Robert Holte and Joel Martin .................................................................751

A Relevance-based Quantitative Measure for Internet Information Retrieval Evaluation
Steven L. MacCall and Ana Cleveland ..................................................................................763

PART II. SPECIAL INTEREST GROUP (SIG) SESSIONS AND PANELS

The Net Benefits of KDD: Converting Commercial Applications into Research Tools ...............771
(SIG STI, CRS)

Knowledge Management in Three Institutional Settings .......................................................774
(SIG CR)

The Sound of Information: Auditory Browsing and Audio Information Retrieval .....................775
(SIG VIS)

XML: What it Is and How it Will Affect Current Web Practices and Future Directions ..............776
(Standards Committee)

Deep NLP: Applications and Theory ....................................................................................777
(SIG ALP)

System and User Oriented Evaluation of Information Retrieval Systems ..................................778
(SIG ALP)

Knowledge Organization and Use as Viewed by Caregivers (AKA Librarians) .......................779

Doctoral Research Forum .......................................................................................................781
(SIG ED)

Historical Perspectives on Knowledge Dissemination ..........................................................782
(SIG HFIS)
From Revolution to Orthodoxy: An Evolutionary History of the International Encyclopedia of Unified Science
Mikel Breitenstein ...................................................................................................................783

The Metadata Architecture: Issues, Problems, and Future Research ......................................798
(SIG CR, STI)

Database Protection: The Reality After the European Directive ..............................................800
(SIGs IFP, III and PUB)
Database Protection: Issues and Emotions
Shelly Warwick .....................................................................................................................801

Machine Aided Indexing - Knowledge Management Tool ....................................................811

Telemedicine: To Mt. Everest and Beyond .............................................................................812
(SIG MED)

Automatic Techniques for the Visualization of Semantics in Text .........................................813
(SIG ALP, HCI)
INFORMATION RETRIEVAL FROM SPEECH ................................................................. 814
(SIG CR, VIS)

THE INFLUENCE OF DISCIPLINE/DOMAIN ON INFORMATION SEEKING BEHAVIOR ..................................................... 815
(SIG USE)

EMERGING TRENDS IN LIBRARY SERVICE FOR DISTANCE EDUCATION .......................................................... 816
(SIG PUB, LAN)

THE TRANSFORMATION OF SCIENTIFIC COMMUNICATION: BEHAVIORAL AND ORGANIZATIONAL DETERMINANTS .......... 817
(SIG STI)

USER MODELING: ONE MIND, ONE INTERFACE ......................................................................................... 818
(SIG CON)

AUTHENTICATION AND AUTHORIZATION: HOW IS IT BEING IMPLEMENTED? ............................................................ 819
(SIG LAN)

INTELLIGENT INFORMATION RETRIEVAL .................................................................................................................. 820
(SIG ALP)

BEYOND RESOURCE DISCOVERY: USES OF METADATA IN INFORMATION SYSTEMS ................................................. 821
(SIG CR, VIS)

ELECTRONIC BOOKS: ISSUES FOR PRODUCERS, LICENSEES, PURCHASERS, AND USERS ................................... 822
(SIG PUB, LAN)

INTELLIGENT INFORMATION RETRIEVAL .................................................................................................................. 823
(SIG ALP)

VOCABULARY MANAGEMENT TECHNOLOGY ............................................................................................................. 824

Lexicography Without Limits: A Web-Based Solution
Trish Yancey, Dave Clarke and Justine Carson .............................................................. 825

Resistance is Futile: [1] Inescapable Networked Information Made Accessible Using the Getty Vocabularies
Patricia Harpring................................................................................................................. 833

Local and Web-Based Vocabulary Management
Hector Echevarria............................................................................................................. 848

REDESIGNING A MASTER’S PROGRAM FOR DISTRIBUTED LEARNING:
CHALLENGES OF CONTENT & DELIVERY .............................................................. 849

KNOWLEDGE MANAGEMENT OR LIBRARY 101: IS THERE A DIFFERENCE? .................................................... 850
(SIG MGT)

HISTORICAL PERSPECTIVES ON INFORMATION TECHNOLOGY ................................................................. 851
(SIG HFIS)

INFORMATION PROFESSIONALS FOR THE TWENTY-FIRST CENTURY: IDENTIFYING WORKFORCE
NEEDS AND EDUCATING TO MEET THE NEED .................................................................................. 852
(NCLIS, ALISE)
NEW INTERFACE TECHNOLOGIES, OLD SEARCH INTERACTION MODELS: WHAT NEXT? .........................................................853
(SIG HCI)

TEXT CATEGORIZATION, TEXT ROUTING AND TEXT EXTRACTION: CURRENT STATE OF THE ART ..........................854
(SIG ALP)

DESIGNING INTERFACES FOR PEOPLE WITH SPECIAL NEEDS: CURRENT OPTIONS, DESIGN, AND FUTURE DEVELOPMENTS IN A WALKUP-AND-USE WORLD .................................................................855
(SIG HCI, TIS)

EMERGING METADATA PRACTICES IN DIGITAL LIBRARIES .....................................................................................856
(SIG PUB, LAN)

FIFTY YEARS OF JASIS; PERSPECTIVES ON PUBLISHING IN INFORMATION SCIENCE ...........................................857
(SIG HFIS)

KNOWLEDGE MANAGEMENT IN THE VIRTUAL ORGANIZATION ........................................................................858
(SIG MGT)

PART III: PLENARY SESSIONS

KNOWLEDGE MANAGEMENT: A CELEBRATION OF HUMANS CONNECTED WITH QUALITY INFORMATION OBJECTS ........................................................861
(Plenary Session 1)

INTELLECTUAL PROPERTY RIGHTS AND THE EMERGING INFORMATION INFRASTRUCTURE .....................................862
(Plenary Session 2)

KNOWLEDGE: CREATION, ORGANIZATION AND USE: CONFERENCE WRAP UP SESSION .........................................863

Author Index .........................................................................................................................................................864

SIG/Panel Index ................................................................................................................................................868
