Contents

<i>Preface</i>	<i>page ix</i>
Part One: Fourier Series and Periodic Distributions	
1 Preliminaries	3
1.1 Basic Definitions and Examples	3
1.2 Classification into Types	12
1.3 Boundary and/or Initial Value Problems	21
1.4 Separation of Variables: Heat Flow in a Bar	36
1.5 The Schrödinger and the Wave Equations	49
1.6 The Dirichlet Problem in the Unit Circle	55
1.7 Maximum Principles and Uniqueness	66
2 Fourier Series: Basic Theory	79
2.1 Spaces of Periodic Functions and Sequences	79
2.2 The Fourier Transform	91
2.3 Geometric Interpretation	96
2.4 Decay and Differentiability	101
2.5 The Inversion Formula: Pointwise Convergence	106
2.6 Periodic Heat Flow	113
2.7 Approximate Identities and Summability	123
2.8 Césaro Summability	128
3 Periodic Distributions and Sobolev Spaces	132
3.1 C^∞ Periodic Functions	133
3.2 Periodic Distributions	139
3.3 Topological Remarks	155
3.4 Fourier Series in \mathcal{P}'	187
3.5 The Convolution in \mathcal{P}'	195
3.6 Sobolev Spaces	201

Part Two: Applications to Partial Differential Equations	211
4 Linear Equations	213
4.1 A Functional Calculus	213
4.2 Linear Evolution Equations in H_{per}^s	218
4.3 Strongly Continuous Semigroups*	231
4.4 The Wave Equation	252
5 Nonlinear Evolution Equations	258
5.1 Local Well-Posedness Revisited	258
5.2 Maximal Intervals of Existence	268
5.3 GNLS as a Hamiltonian System	281
6 The Korteweg-de Vries Equation	292
6.1 The Regularized Problem	293
6.2 Some Fundamental Estimates	298
6.3 Local Well-Posedness	306
6.4 Global Well-Posedness	314
Part Three: Some Nonperiodic Problems	321
7 Distributions, Fourier Transform and Linear Equations	323
7.1 Distributions	323
7.2 The Fourier Transform	336
7.3 Convolutions	348
7.4 L^2 -type Sobolev Spaces in \mathbb{R}^n	356
7.5 The Heat and (Free) Schrödinger Equations	365
8 KdV, BO and Friends	370
8.1 The $H^s(\mathbb{R})$ Theory	370
8.2 KdV in Weighted Sobolev Spaces	377
8.3 BO in Weighted Sobolev Spaces	380
8.4 Bore-like Initial Conditions	384
Appendix A Tools from the Theory of ODEs	394
Appendix B Commutator Estimates	397
<i>Bibliography</i>	401
<i>Index</i>	409
