

Taking  
Science  
to the  
Moon

Lunar Experiments and the Apollo Program

Donald A. Beattie

The Johns Hopkins University Press  
Baltimore and London

# Contents

Preface	vii
Acknowledgments	ix
List of Abbreviations and Acronyms	xi
Introduction	xiii
<b>1</b> From the Jungle to Washington	1
<b>2</b> Early Theories and Questions about the Moon	12
<b>3</b> What Do We Do after Apollo?	28
<b>4</b> The United States Geological Survey Joins Our Team	58
<b>5</b> Science Payloads for Apollo: The Struggle Begins	78
<b>6</b> Developing the Geological Equipment, Related Experiments, and Sampling Protocols	107
<b>7</b> The Apollo Lunar Surface Experiments Package and Associated Experiments	125
<b>8</b> Walk, Fly, or Drive?	146
<b>9</b> Astronaut Training and Mission Simulation	159
<b>10</b> Studying the Moon from Orbit	189

## Contents

<b>11</b>	On to the Moon: Science Becomes the Focus	194
<b>12</b>	The J Missions: We Almost Achieve Our Early Dreams	227
<b>13</b>	The Legacy of Apollo	251
	Notes	275
	Selected Bibliography	289
	Index	291
