The Paramount Role of Joints into the Reliable Response of Structures

From the Classic Pinned and Rigid Joints to the Notion of Semi-rigidity

edited by

C.C. Baniotopoulos
Institute of Steel Structures,
Department of Civil Engineering,
Aristotle University of Thessaloniki,
Thessaloniki, Greece

and

F. Wald

LIST OF CONTENTS

Foreword ix
Workshop Participants xi

I BEHAVIOUR OF STRUCTURES INCLUDING JOINT BEHAVIOUR

1.1 Effects of the Actual Joint Behaviour on the Design of Steel Frames
Maquoi R., Belgium 3

1.2 Behavior and Design of Partially-Restrained Composite Framing Systems
Maleck A. E. and White D. W., U.S.A. 17

1.3 Prediction of Ultimate Load of Steel Frames with Semi-rigid Connections
Iványi M., Hungary 31

1.4 Effective Length Factor Considering Semi-rigid Connections
Petkov Z. B. and Blagov D. T., Bulgaria 47

1.5 Practical Demonstration of the Use of Joint Flexibility in Steel Frame Design
Aroch R., Slovakia 59

1.6 Development, Design and Testing of Joints in Composite Structures
Kvedaras A. K., Lithuania 69

1.7 Application of the Theory of Semi-rigid Joints into Steel and Composite Structures
Pavlov A., Russia 77

1.8 Wind Effects on Large Antennas and Telecommunication Towers: Analysis and Design of Main Components and Joints
Borri C., Betti M. and Biagini P., Italy 87

II EXPERIMENTAL STUDIES OF JOINTS AND FRAMES

2.1 Application of Deformation Criteria in Bolted Connection Strength Design
Kalenov V., Russia 105

2.2 Large-scale Experimental Tests on Steel and Composite Frames
Kozłowski A., Poland 115

2.3 Cyclic Tests on Bolted Steel Double-Sided Beam-to-Column Joints
Dubina D., Stratan A. and Ciutina A., Romania 129

2.4 Experimental Investigation of Load Carrying Capacity of the Joints into an Aluminium Dome
Dakov D., Totev I. and Ganchev O., Bulgaria 139

2.5 Experimental and Analytical Studies on the Cyclic Behaviour of Column-Base Joints
Ádány S., and Dunai L., Hungary and Calado L., Portugal 147

2.6 Bolted Joints in Thin Walled Cross-sections of Type Z Made from Cold Formed Steel
Zygomalas M.D., Greece 159

2.7 Review and Classification of Semi-rigid Connections
Abdalla K.M., Jordan 169
## III BEHAVIOUR OF EARTHQUAKE RESISTANT STRUCTURES INCLUDING JOINT BEHAVIOUR

3.1 Behaviour of Connections of Seismic Resistant Steel Frames  
Mazzolani F. M., Italy  

3.2 Observed Beam Column Joint Failures During the 17 August 1999-Kocaeli and 12 November 1999-Duzce, Turkey Earthquakes  
Çelik O.C., Turkey

3.3 Influence of Semi-rigid and/or Partial-strength Joints on the Seismic Performances of Steel MRF  
Grecea D., Romania

3.4 Cyclic Behaviour of End-Plate Beam-to-Column Composite Joints  
Simões R., Simões da Silva L. and Cruz P., Portugal

3.5 A Nonconvex Optimization Approach for the Determination of the Capacity Curve and the Performance Point of MR Steel Frames Exhibiting Softening under Seismic Loading  
Mistakidis E. S., Greece

3.6 Bi-directional Pseudodynamic Test of a Full-size Three Storey Steel Concrete Building with Rigid and Semi-rigid Joints  
Geradin M. and Molina F. J., Italy

3.7 Influence of Joint Flexibility in the Seismic Performance of Moment Resisting Steel Frames  
Vayas I., Greece and Dinu F., Romania

3.8 Dynamic Analysis of Stiffened Coupled Shear Walls with Flexible Connections under Earthquake Effects  
Aksogan O. and Arslan H. M., Turkey

## IV NUMERICAL SIMULATION OF THE STRUCTURAL RESPONSE OF JOINTS AND FRAMES

4.1 Numerical Modelling of the Structural Behaviour of Joints  
Gebbeken N. and Wanzek T., Germany

4.2 Cyclic Analysis of Structural Joints by Computational Models  
Dunai L. and Ádány S., Hungary

4.3 A Contribution to the Finite Element Study of Pin Connections in Steel Structures  
Mademlis J., Marmoutsidis S. and Avdelas A., Greece

4.4 Recent Advances in the Numerical Modelling of the Response of Structural Steelwork Taking into Account Softening in Connection Behaviour  
Kontoleon M. J. and Baniotopoulos C. C., Greece

4.5 Finite Element Analyses of Steel-Concrete Subassemblage with Partial Shear Connection  
Belev B., Bulgaria

4.6 Butt-Welded Aluminium Joints: a Numerical Study of the HAZ Effect on the Ultimate Tension Strength  
Kontoleon M. J., Preftitsi F. G. and Baniotopoulos C. C., Greece
V ANALYTICAL MODELS FOR JOINTS AND RELIABILITY

5.1 Designing Structural Joints according to Eurocodes
   Jaspart J.-P., Belgium 349

5.2 Rotation Capacity of Steel Joints: Verification Procedure and Component Tests
   Kuhlmann U. and Kühnemund F., Germany 363

5.3 Review of Deformation Capacity of Joints Related to Structural Reliability
   Steenhuis C. M., Snijder H. H. and Herwijnen F. Van, The Netherlands 373

5.4 Modelling of Joints of Sandwiches Panels
   Mareš J., Wald F. and Sokol Z., Czech Republic 387

5.5 New Design Concepts for Structural Timber Connections
   Haller P., Germany 395

5.6 Timber Joints Loaded Perpendicular to the Grain: Long-term Strength, Theory and Experiments
   Larsen H.J., Denmark and Gustafsson P.J., Sweden 407

5.7 Component Method for Historical Timber Joints
   Wald F., Mareš J., Sokol Z. and Drdácký M., Czech Republic 417

5.8 Application of the Component Method to Steel Joints under Fire Loading
   Simões da Silva L., Santiago A. and Vila Real P., Portugal 425

5.9 Stiffness of Lap Joints with Preloaded Bolts
   Gresnigt A.M. and Steenhuis C.M., The Netherlands 435
