CONTENTS

PREFACE	ix
1. MINIMIZATION AND MOUNTAIN-PASS THEOREMS	1
1.1. Differential Calculus for Mappings in Banach Spaces	2
1.2. Variational Principles and Minimization	11
1.3. Deformation Theorems and Palais-Smale Conditions	22
1.4. Mountain-Pass Theorems	35
2. SADDLE-POINT AND LINKING THEOREMS	51
2.1. Saddle-Point Theorems	52
2.2. Local Linking and Three Critical Points Theorems	61
2.3. Linking of Deformation Type and Generalized Saddle-Point Theorems	72
3. APPLICATIONS TO ELLIPTIC PROBLEMS IN BOUNDED DOMAINS	81
3.1. Neumann Problem for Semilinear Second-order Elliptic Equations.	83
3.2. Existence Results for Hammerstein Integral Equations with Positive Kernel	93
3.3. Nontrivial Solutions of Hammerstein Integral Equations with Indefinite Kernel	101
4. PERIODIC SOLUTIONS FOR SOME SECOND-ORDER DIFFERENTIAL EQUATIONS	113
4.1. The Quadratic Form I	114
4.2. Periodic Solutions of Equation (E)	126
5. DUAL VARIATIONAL METHOD AND APPLICATIONS	139
5.1. Legendre-Fenchel Transform and Duality Method	141
5.2. Applications to Problems for Semilinear Fourth-order Differential Equations with Continuous Nonlinearity	149
5.3. Applications to Problems for Semilinear Fourth-order Differential Equations with Discontinuous Nonlinearity	156

6. MINIMAX THEOREMS FOR LOCALLY LIPSCHITZ FUNCTIONALS AND APPLICATIONS	173
6.1. Generalized Gradients	174
6.2. Mountain-Pass Theorems for Locally Lipschitz Functionals	184
6.3. Applications to Differential Equations with Discontinuous Nonlinearities	197
7. HOMOCLINIC SOLUTIONS OF DIFFERENTIAL EQUATIONS	207
7.1. Preliminaries on Dynamical Systems	209
7.2. Positive Homoclinic Solutions for a Class of Second-Order Differential Equations	214
7.3. Homoclinic Solutions for the Extended Fisher-Kolmogorov Equations	227
7.4. Nontrivial Solutions to the Semilinear Schrödinger Equation on \mathbf{R}^n	233
7.5. Semilinear Schrödinger Equations in Strip-like Domains	240
7.6. Nontrivial Solutions to a Semilinear Equation relative to a Dirichlet Form	246
NOTATIONS	265
INDEX	267
