Fixed Point Theory and Applications

CAMBRIDGE
UNIVERSITY PRESS

Contents

<i>Preface</i>	<i>page</i> vii
1 Contractions	1
2 Nonexpansive Maps	12
3 Continuation Methods for Contractive and Nonexpansive Mappings	19
4 The Theorems of Brouwer, Schauder and Mönch	28
5 Nonlinear Alternatives of Leray-Schauder Type	48
6 Continuation Principles for Condensing Maps	65
7 Fixed Point Theorems in Conical Shells	78
8 Fixed Point Theory in Hausdorff Locally Convex Linear Topological Spaces	94
9 Contractive and Nonexpansive Multivalued Maps	112
10 Multivalued Maps with Continuous Selections	120
11 Multivalued Maps with Closed Graph	130
12 Degree Theory	142
<i>Bibliography</i>	159
<i>Index</i>	169
