145 Isoperimetric Inequalities

Contents

Preface	<i>page ix</i>
I Introduction	1
I.1 The Isoperimetric Problem	1
I.2 The Isoperimetric Inequality in the Plane	4
I.3 Preliminaries	13
I.4 Bibliographic Notes	28
II Differential Geometric Methods	30
II.1 The C^2 Uniqueness Theory	30
II.2 The C^1 Isoperimetric Inequality	44
II.3 Bibliographic Notes	51
III Minkowski Area and Perimeter	52
III.1 The Hausdorff Metric on Compacta	53
III.2 Minkowski Area and Steiner Symmetrization	58
III.3 Application: The Faber–Krahn Inequality	78
III.4 Perimeter	81
III.5 Bibliographic Notes	99
IV Hausdorff Measure and Perimeter	100
IV.1 Hausdorff Measure	100
IV.2 The Area Formula for Lipschitz Maps	110
IV.3 Bibliographic Notes	116
V Isoperimetric Constants	117
V.1 Riemannian Geometric Preliminaries	118
V.2 Isoperimetric Constants	127
V.3 Discretizations and Isoperimetric Inequalities	139
V.4 Bibliographic Notes	155

VI	Analytic Isoperimetric Inequalities	157
VI.1	L^2 Sobolev Inequalities	157
VI.2	The Compact Case	161
VI.3	Faber–Krahn Inequalities	165
VI.4	The Federer–Fleming Theorem: The Discrete Case	170
VI.5	Sobolev Inequalities and Discretizations	174
VI.6	Bibliographic Notes	183
VII	Laplace and Heat Operators	185
VII.1	Self-adjoint Operators and Their Semigroups	185
VII.2	The Laplacian	192
VII.3	The Heat Equation and Its Kernels	201
VII.4	The Action of the Heat Semigroup	216
VII.5	Simplest Examples	222
VII.6	Bibliographic Notes	224
VIII	Large Time Heat Diffusion	225
VIII.1	The Main Problem	226
VIII.2	The Nash Approach	234
VIII.3	The Varopoulos Approach	236
VIII.4	Coulhon’s Modified Sobolev Inequality	240
VIII.5	The Denouement: Geometric Applications	243
VIII.6	Epilogue: The Faber–Krahn Method	249
VIII.7	Bibliographic Notes	253
	Bibliography	255
	Author Index	263
	Subject Index	265
