

British Iron and Steel  
AD1800–2000 and Beyond

*Edited by*  
C. Bodsworth

# CONTENTS

Preface	vii
Chapter 1	
Nineteenth Century Developments, by C. Bodsworth	1
1. Introduction	1
2. Ironmaking Processes	4
3. Steelmaking Processes	34
4. Fabrication	68
5. Physical Metallurgy	81
6. References	87
Chapter 2	
Technological Developments in Iron and Steel During the Twentieth Century, by T. Gladman and F. B. Pickering	91
1. Introduction	91
2. A View of AD2000 From the Perspective of AD1900	93
3. Iron and Steel Manufacturer, Circa AD1900	97
4. Hot Rolling Processes, Circa AD1900	103
5. Forging, Circa AD1900	105
6. Tube- and Pipe-making, Circa AD1900	106
7. Cold Working Processes, Circa AD1900	107
8. Heat Treatment, Circa AD1900	108
9. Investigational Techniques, Circa AD1900	109
10. Concepts, Circa AD1900	110
11. Alloy Steels, Circa AD1900	111
12. Developments in Ironmaking and Steelmaking in the Twentieth Century	113
13. Developments in Mechanical Working in the Twentieth Century	131
14. Heat Treatment in the Twentieth Century	141
15. Welding Developments in the Twentieth Century	145
16. Surface Engineering in the Twentieth Century	151
17. The Developments of Investigational Techniques in the Twentieth Century	154
18. Conceptual Developments in the Twentieth Century	166
19. Developments in Steel Compositions and Types in the Twentieth Century	172
20. Closure	191
21. Bibliography	195
Chapter 3	
The Iron and Steel Institute, by C. Bodsworth	201
1. Early Developments	201
2. Co-operative Research	214

3. Grosvenor Gardens Headquarters	212
4. Carlton House Terrace and The Metals Society	216
5. References	218
Chapter 4	
BISRA – The British Iron and Steel Research Association, by G. D. Spenceley MBE and P. H. Scholes	221
1. Introduction	221
2. Formation of BISRA	222
3. Organisation and Administration of BISRA	228
4. Selection of Work Undertaken	236
5. Transfer of BISRA in 1968 to BSC	297
6. Acknowledgements	298
7. References	299
Chapter 5	
Twenty-first Century Ironmaking and Steelmaking, by R. B. Smith and M. G. Sexton	301
1. Introduction	301
2. Developments to Existing Plant	302
3. New Process Technologies	307
4. Environmental Sustainability	324
5. Choice of Process Route	326
6. Summary	327
7. References	328
Appendix: Some Brief Histories of Some British Iron and Steel Companies	329
Brown Bailey Steels Ltd, by C. Bodsworth	329
Colvilles Ltd, by I. M. Mackenzie	332
Daniel Doncasters, by R. Fenn	340
Dorman Long and Co. Ltd, by C. Bodsworth	346
Edgar Allen and Co. Ltd, by C. Bodsworth	353
English Steel Corp. Ltd, by C. Bodsworth	358
Thomas Firth and John Brown Ltd, by C. Bodsworth	364
The Hadfields Company, by R. Fenn	371
Samuel Osborn and Co. Ltd, by R. Fenn	379
Richard Thomas and Baldwins Ltd, by C. Bodsworth	385
Skinningrove Iron Co. Ltd, by C. Shepherd	390
Stewarts and Lloyds Ltd, by C. Bodsworth	396
John Summers and Sons Ltd, by C. Bodsworth	401
United Steel Companies Ltd, by C. Bodsworth	405
References	409
Index	411
